

Apple rolls out iOS 15 Beta 3, here's how to install

- Today, Apple has officially launched iOS 15 Beta 3 update to enhance stability and smooth operation for Safari, Focus feature.

After a while of launching iOS 15 Public Beta, Apple has continued to perfect this iOS 15 with the version released this morning.

What's new with iOS 15 beta 3?

1. New intro screen in App Store

Picture 1 of Apple rolls out iOS 15 Beta 3, here's how to install

When a user first opens the App Store on iOS 15 Beta 3, the store will display all the new features, like in-app events or games, widgets.

2. Search screen in Safari, many UI fixes

Apple redesigned the user interface with Safari, which was not well received in previous updates.

3. New icon for 'Text from Camera' in Keyboard

Picture 3 of Apple rolls out iOS 15 Beta 3, here's how to install

iOS 15 introduces a new feature called Live Text that helps you get text from anywhere through the camera. However, this feature is a bit difficult to implement because the icon is long. So Apple has converted the button to become more compact.

4. New addition to Focus Mode

iOS 15 beta 3 also brings a redesigned Apple Music widget. Some even say that the new design is inspired by Spotify. Now, when you play or pause music from the widget, the widget will let you know its status by showing 'Playing' or 'Paused.' Moreover, the color of the widget will change to the color of the album you are listening to.

6. Reset iPhone interface redesign

The 'Reset' in the iPhone settings has become 'Transfer or Reset ?iPhone?'. This is just a change of form.

7. Separate buttons for notifications

Picture 7 of Apple rolls out iOS 15 Beta 3, here's how to install

Earlier in iOS 15, the 'Options' and 'Delete' buttons were stuck together. In iOS 15 beta 3, Apple separated the two buttons, and it's now easier to choose between the two options.

8. Private Relay bug fix

Apple introduced iCloud+ at WWDC 2021. The service lets you use a Private Relay service that lets you surf the web without thinking about fingerprinting and tracking. In previous iOS 15 versions, Private Relay encountered a lot of bugs. Apple fixed some issues with Private Relay in iOS 15 beta 3 and it doesn't disconnect or connect arbitrarily anymore.

9. Fix Wi-Fi name error

Over the past few weeks, a weird iOS Wi-Fi name bug has popped up. When you connect to these Wi-Fi networks, Wi-Fi stops working on your iPhone. Apple fixed the Wi-Fi name in iOS 15 beta 3, as well as iOS 14.7 beta 5.

How to update to iOS 15 Beta 3

If you have pre-installed developer profiles, iOS 15 Beta 3 can be found in settings.
