

# Apple unveiled the new 10.2-inch iPad model, price unchanged

As predicted by many experts, Apple has officially launched a new iPad model right within the framework of the iPhone 2019 launch event.

As predicted by many experts, Apple has officially launched a new iPad model right in the context of the launch of the iPhone 2019. Normally, CEO Tim Cook and his colleagues will organize a separate launch event for iPad. in October, and the arrival of the 2019 iPad on stage early this morning made it impossible to sit still. Previously, rumors about a 10.2-inch iPad model will be released in 2019 has appeared quite a lot, but few people thought that Apple will launch this important product in an event focused solely on the iPhone, Apple Watch, as well as some new software and accessories updates.

1. Can Apple release an iPhone SE model no more than \$ 400 next year?

*The 2019 10.2-inch iPad will be a perfect replacement for the current 9.7-inch versions*

This is basically a variant with the 10.2-inch screen size of the current iPad model. Thus, the new iPad will be a perfect replacement for the 9.7 inch version that has existed in the market for many years. This change is reasonable because users are increasingly inclined to favor devices with larger screens. Thanks to the ability to optimize the edge of the screen, smartphones are now increasingly larger display space (average 6.4 inches) while the size is still compact, so there is no reason why the iPad is not in use. Bigger display to keep up the trend.

Despite owning a larger screen, the 10.2-inch iPad still has the same price, from \$ 329 for the 32GB Wi-Fi version. The 32GB Wi-Fi + 4G, 128GB Wi-Fi and 128GB Wi-Fi + 4G versions will certainly have higher prices, but Apple has not yet detailed the price information for each version. There will also be a version for educational purposes only, sold to schools, educational institutions with a preferential price of only 299 USD. This new iPad model will have 3 traditional color options: Silver, gray and gold.

This first iPad model of the 7th generation will support absolute compatibility with the Smart Keyboard keyboard as well as the Apple Pencil.

*10.2 inch iPad 2019 supports absolute compatibility with Smart Keyboard and Apple Pencil*

In terms of configuration equipment, the 2019 10.2-inch iPad will be equipped with a homegrown A10 Fusion chip, a bit inferior to the A10X Fusion chip that is currently equipped on the second-generation iPad Pro, is still quite strong compared to a product of the popular segment such as iPad, and it is important to still be able to 'weigh' well nearly every task from basic to relatively advanced of users.

Like the just-launched Apple Watch Series 5, the aluminum frame of the 10.2-inch iPad 2019 will also be made of 100% environmentally friendly recycled materials. This is a highly appreciated way of doing Apples and should be further expanded in today's technology world.

*10.2 inch iPad 2019 will be sold with 3 traditional color options: Silver, gray and gold.*

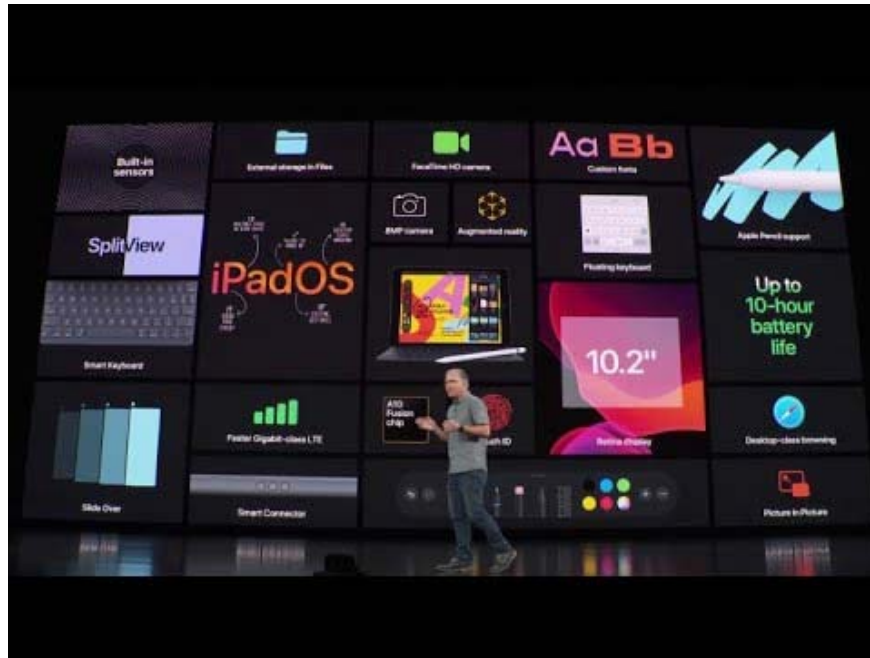

However, during the presentation, Apple Vice President Greg Joz Joswiak did not specify the type of connection that will be used on the 10.2-inch 2019 iPad. This is about the relatively thick screen design along with the appearance of Touch ID, which suggests that the device will still use the Lightning connector. But the improvement in screen size and the ability to support the device's removable device accessories also shows that it is likely to be equipped with a more modern USB-C port.

#### 1. Funny photos of the design of iPhone 11

It is highly likely that the 2019 10.2-inch iPad will still use the Lightning port as information stated on Apple's official product website. Moreover, technology commentators have pointed out that the device will only be compatible with the first-generation Apple Pencil based on Lightning connectivity, so it is likely that the new iPad will not own USB. -C as expected of many people.

On a few other interesting specifications, Apple says the 2019 10.2-inch iPad will weigh only about 1 pound (about 483 grams), the storage capacity starts from 32GB and can expand to 128GB for more than 100 USD. Because it is just a common tablet, the camera on the device does not have too many noticeable points: 8 megapixel camera cluster (rear) and 1.2 megapixel (front), comes with all imaging features, Basic video recording you've ever experienced on previous iPad models (of course it doesn't support Face ID).

#### 1. iOS 13 will be officially released on 9/19, what to prepare before upgrading

*The 2019 10.2-inch iPad will run on iPadOS 13, promising a stable user experience*

The 10.2-inch 2019 iPad will run on iPadOS 13 with many useful multitasking features, relatively comprehensive support for users' basic work and entertainment needs.
