Nakami coolers of any country?

Nakami is a Japanese brand with extensive experience in producing high quality, environmentally friendly, high-quality household water purifiers and air cleaners to meet consumer demand. Since 2008, Nakami has cooperated with Dai Viet Refrigeration Electrical Engineering Joint Stock Company to build a high quality Nakami civil electric assembly factory in Vietnam.

With constant improvements over the past 17 years, Nakami is proud of its products and services to its customers. The development of the company is always associated with the development of the community and society.

Principle of operation of Nakami coolers

Nakami coolers operate on a simple principle that provides high efficiency. The machine will suck hot air from the surrounding environment through the cooling plate, so the temperature will be lowered to 5 - 10oC. It is then blown back to the environment bringing fresh cool wind.

Are Nakami coolers good?

To answer this question, let's first take a look at the advantages that this machine offers. From there you will easily assess whether to buy and use them.

Luxury amenities

Nakami air coolers possess modern and sophisticated design to detail. Not only does it bring a cool fresh air, but the product also serves as a highlight to help each space use more comfort and luxury.

With a variety of designs, the machine is suitable for many spaces such as: Open, open, open. While operating in any space, it does not affect the performance and power consumption.

It's easy to move

If the air conditioner is installed on a high level, then the Nakami cooler is designed with 4 wheels to make traveling easier. In particular, the machine also has remote control to make the use more convenient and simple, users will not take too much effort to adjust their functions during use.

Maximum power saving capability

Nakami air coolers are capable of saving up to 90% of electricity compared to conventional air conditioners.

Quick cooling ability

According to health experts, the air temperature from 25 - 28oC is appropriate and best for the human body. Nakami coolers are capable of reducing the temperature to 25 - 26oC so this is a suitable product for cooling during hot summer.

Once this machine starts working, you can feel the wind mode like a conventional electric fan. About 10 minutes later, the breeze will be cool thanks to the evaporation process and the outside hot air is sucked in and then

moved through the cooling plate. This product has the advantage of being able to cool faster with air conditioning.

High safety

When there is a problem of electric leakage, Nakami coolers will automatically disconnect power to give users absolute safety, especially suitable products for families with young children and the elderly.

In addition, the machine also features deodorizing, purifying air moisture balance for the skin so that users no longer have the dry skin condition as when using other cooling devices.

Another noteworthy point is that the product does not work by cold gas, toxic CFC should be safe for the environment and human health.

Durable operation over time

Parts of the machine are made of guaranteed materials such as:

1. Motor made from 100% pure copper core
2. The shell made from ABS / PP plastic increases life expectancy up to 2 times
3. Motor mounts are made of non-corrosive alloys, ensuring the most robust for the device .
