Acer's new line of high-end laptop Timeline promises to be "a formidable rival" of both Macbook Air, Dell Amodo or HP Voodoo not only because of its "ultra-thin, light" fashion design, but also large battery life. at a very affordable price. Aspire Timeline includes 3 versions of 15.6 inches, 14 inches and 13.3 inches.

Aspire Timeline T4810 model uses 14-inch screen, 16: 9 ratio with a resolution of 1366 x 768 pixels, equipped with "ultra-portable" Intel CULV U3300 Core 2 Solo 1.2 GHz processor, RAM memory 2 GB, HDD HDD Seagate Momentus 120GB 5400 rpm. In addition, users can upgrade to 8 GB RAM or choose solid-state SSD.

The first impression of users when using Aspire Timeline T4810 is the extremely light weight of the phone (14 inch version weighs about 1.9 kg), extremely bright screen, cool machine even when used for a long time and use big battery.

The battery of Aspire Timeline T4810 is also very compact but can guarantee continuous operation time of 8 to 10 hours. The eco-friendly "green" AC adapter comes with a high-performance machine with a waste of about 0.1 Watt for a period of full charge.

Aspire Timeline is considered a "high-end" model in terms of both design and hardware but has a very

affordable price, the characteristic of Acer laptop.
