

Assign your avatar to Contact on your Android phone

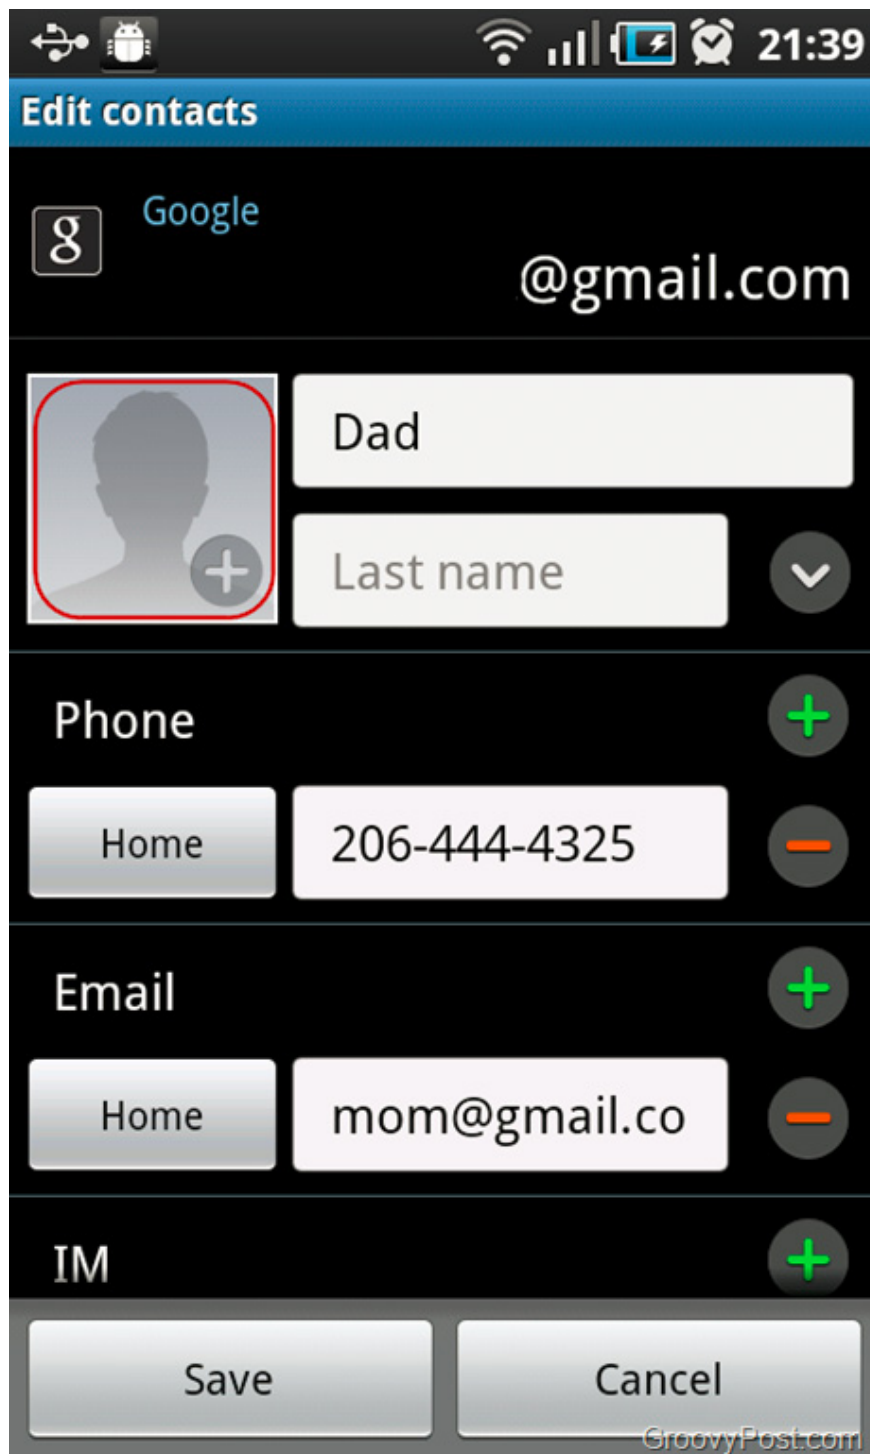

In the following article, we will present some basic operations to assign your avatar to any Contact list on your Android phone. And then, instead of the phone screen showing the phone number and contact name, you will see their avatar ...

TipsMake.com - In the article below, we will present some basic operations to assign your avatar to any Contact list on your Android phone. And then, instead of the phone screen showing the phone number and contact name, you will see their avatar.

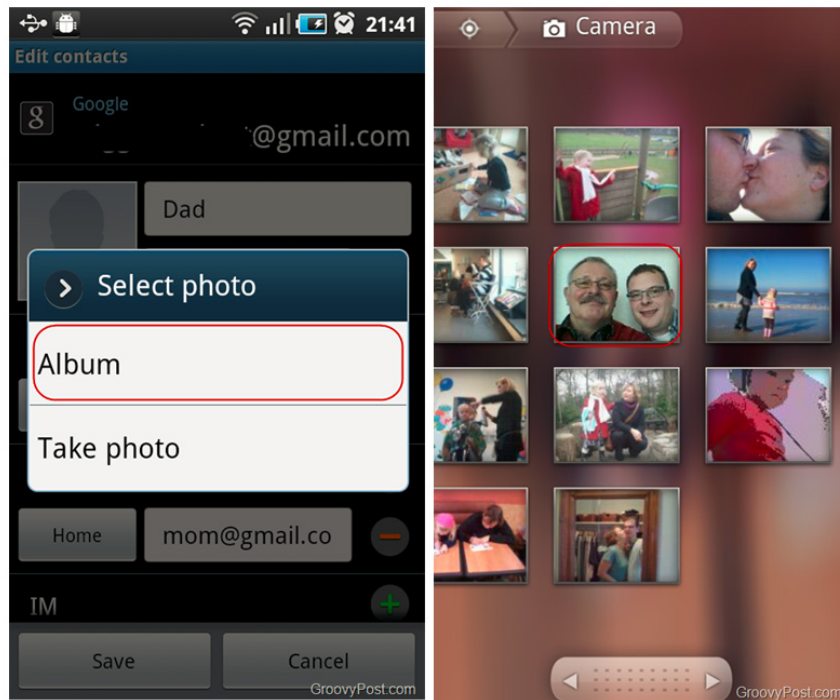

First of all, you need to prepare photos that match the accounts you need to apply. Then, open the Contact list section on your phone, open the **Contact** section you want to customize and click **Settings> Edit:**

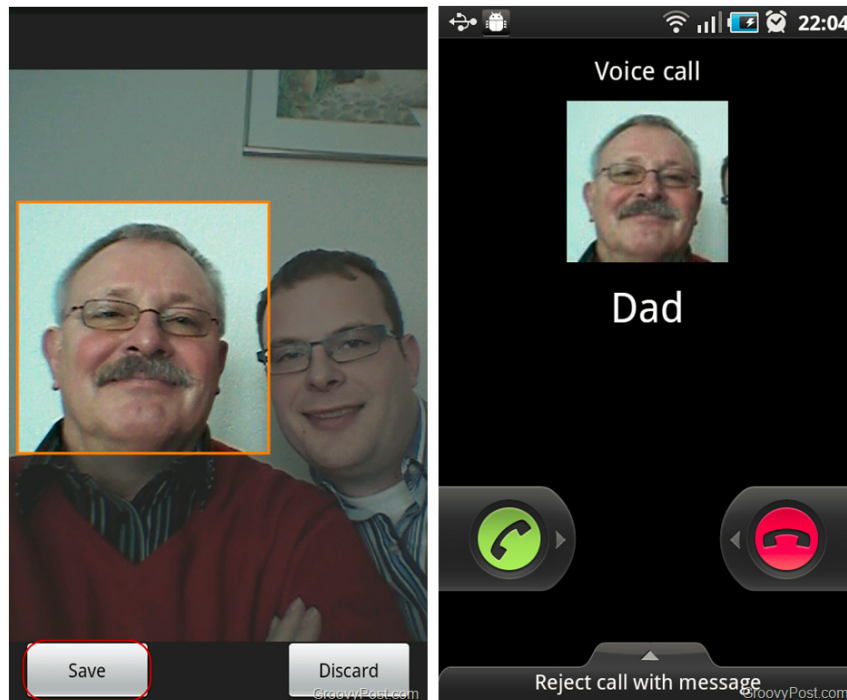

Still in that **Contact** section, select the small section above to match the quadrilateral:

The system will display options for taking photos from Album or directly through camera. Therefore, you point the link to the **album** and the appropriate photo:

The selected image will display a selection area with a light yellow border, and when touching the outer line, the system will display an arrow to resize. When you are satisfied with your work, click the **Save** button:

Our result will look like this, now you just need to press the Save button again. And if the user proceeds to synchronize data on the phone with Google Gmail for example, these communication components are also combined. If they delete the data on the phone, immediately, the relevant information and data on Gmail is also deleted. Good luck!
