

Asus 3D laptop 'show off'

Asus and Acer are the pioneering manufacturers in the 3D laptop segment ...

Asus and Acer are the pioneers in the 3D laptop segment.

Asus G51J3D equipped nVidia GeForce GTX260M discrete graphics card, 4 GB RAM with 1 GB RAM for DDR3 vRAM, 2 320 GB hard drives and Intel Core i7 quad-core processor.

Users will have to use specialized glasses to experience excellent 3D images. However, unlike Acer, which uses polarized glasses technology, Asus uses shutter-glasses technology (active-shutter) to allow better HD video display.

In addition, the shutter glass technology is much more convenient because it allows users to enjoy 3D images at any viewing angle, not always looking directly at the screen.

Expected, the G51J3D will be available on the market right this Christmas with a price of more than VND 40 million.

Specifications of Asus G51J3D:

- Operating system: Windows 7 Ultimate / Home Premium
- Size: 375 x 265 x 34.3 - 40.6 mm
- Weight: 3.3 kg (with 6-cell battery)
- Screen: 15.6 inches, 1366 x 768 pixels
- 4 GHz Core i7-720QM quad-core processor (with Turbo Boost can upgrade to 2.8 Ghz)
- Discrete graphics card: nVidia GeForce GTX 260M with 1GB DDR3 vRAM
- Support 2 hard drives: 320/500 GB (7200 rpm), 250/320/500 GB (5400 rpm)
- RAM: 4 GB
- Optical drive: DVD burner (users can choose Blu-ray optical drive version)
- Ports: USB x 4, e-SATA, IEEE 1394, HDMI, VGA, RJ-45, RJ-11, all-in-one card reader, Express Card
- Webcam: 2 megapixels
- Wireless standard: 802.11n, Bluetooth 2.1 + EDR
- CMSS surround sound technology, EAX Advance HD4.0, integrated bass speaker
- Price: NT \$ 79,900 (more than VND 44 million)

We invite you to admire the close-up image of Asus G51J3D during the launch ceremony in Taiwan yesterday, November 25:

Asus exploits the current leading technology of nVidia to create this 3D laptop model

G51J3D is the first computer for Asus gamers

Active shutter glasses and nVidia 3D Vision standard transmitter

The screen has a scanning speed of 120 Hz, allowing users to enjoy 3D images

The Acer 3D laptop - Aspire 5738DG. This model is cheaper than Asus' 3D laptop, only about 21 million VND

Asus G51J3D

The external design of the G51J3D is quite beautiful

The G51J3D has a palm rest and a spacious touchpad, a separate numeric keypad located on the right of the keyboard

Chiclet keyboard with wide spacing between keys makes the user feel comfortable when manipulating. The keyboard has lights on its back, allowing users to conveniently use it in dark environments

Left edge (from left to right): VGA, IEEE 1394, e-SATA, HDMI, USB x 2, Express Card

Edge must have DVD optical drive, 2 USB ports, headphone jack, microphone jack

The rear edge of the device has an RJ-45 port, power jack and security keyhole

Bass speakers on the underside of the device
