

Asus announced the Zenbook UX301 and UX302 duo

Besides 2 new ultraportable ultrabook models launched at IFA 2013, Asus has just released 2 more touch-sensitive ultrabooks of the zenbook series called UX301 and UX302.

Besides 2 new ultraportable ultrabook models launched at IFA 2013, Asus has just released 2 more touch-sensitive ultrabooks of the zenbook series called UX301 and UX302.

Zenbook UX301 and UX302

Launched not long ago at Computex 2013, but two models of ultrabook with special protection thanks to being equipped with Gorilla Glass toughened glass in the case and metal design at IFA 2013 this time, Asus has just provided grant more details.

Specifically, users can opt for a 1920x1080 pixel or 2560x1400 pixel resolution touchscreen display for the **UX301** model , while the **UX302** only has a single option with 1920x1080 pixel resolution and upwards viewing angle. 178 degrees.

Both models will also support 10-touch multitouch users, running **Windows 8** , the processor is Intel's 4th generation (Haswell) Core i series, in which the UX301 offers Core i5- processor options. 4200U, i7-4500U or i7-4558U, while the UX302 offers two Core i5-4200U and Core i7-4500U processor options. However, the UX302 offers more graphics-related options such as Intel HD 4400 or Nvidia GeForce GT 730M with 2 GB VRAM memory.

UX301 equipped with 512 GB SSD drive and optional 4 GB or 8 GB RAM. Meanwhile, the UX302 is equipped with up to 750 GB hard drive combined with a 16 GB SSD with two options of 2 GB RAM and 4 GB. Also UX301 will support high-end connections like Wi-Fi 802.11 ac, Bluetooth 4.0 and USB 3.0.

Currently, Asus only details more white and blue colors for the UX301 line and information about the price and release date for both models has not been officially announced.
