

Asus NX90: 'Candidate' for the most attractive laptop in 2010

With the ambition to break the standards of laptop design, the Taiwanese company cooperated with Danish firm Bang & Olufsen to create a product with many unique characteristics.

With the ambition to break the standards of laptop design, the Taiwanese company cooperated with Danish firm Bang & Olufsen to create a product with many unique characteristics.

In addition to the seven-ball design with aluminum cover, the NX90 also has two touch mouse rollers (touchpad) located on either side of the keyboard, providing the ability to control laptops differently than usual.

The product is equipped with a high-resolution 18.4-inch screen, integrated Core i7 chip, Nvidia GeForce GT 334M graphics, storage capacity up to 1,280 GB (two hard drives), Blu-ray drive and support USB 3.0 connection standard.

Time to appear on the market and the price has not been announced.
