

# Asus revealed the high-end Zenbook UX301 model ultrabook

Having exhibited at Computex 2013 in May, Asus recently revealed their high-end Zenbook Infinity. Machine promises will be announced at IFA 2013.

**Having exhibited at Computex 2013 in May, Asus recently revealed their high-end Zenbook Infinity. Machine promises will be announced at IFA 2013.**

In the video, Asus seems to have revealed the new name for the product is the **Zenbook UX301**. In terms of configuration, the UX301 is equipped with a 13.3-inch high-resolution screen of 2560x1440, Intel's latest Core i7 chip Haswell platform, WiFi 802.11ac standard, SonicMaster audio technology.

It will also be very thin with a thickness of only 15.5 mm. In addition, this will probably be the first ultrabook with a Gorilla Glass tempered glass 3, which will give it 3 times better scratch resistance than the previous generation Zenbook Prime (Zenbook Prime).
