

Asus ROG Zephyrus Duo launched: Two-screen gaming laptop, 10th-generation Intel Core chip, priced from \$ 2999

ROG Zephyrus Duo is a gaming laptop with an impressive dual-screen design and top-of-the-line configuration.

Immediately after Intel announced the 10th generation high-performance H-Series Core chips for laptops, Asus has also officially launched the ROG Zephyrus Duo 15. gaming laptop Not only equipped with Intel Core generation chips 10, which ROG Zephyrus Duo 15 also attracts attention by the unique dual-screen design.

Inspired by the ZenBook Pro Duo launched last year, ROG Zephyrus Duo 15 also has an extra screen placed above the keyboard with a 14.1-inch 4K resolution, called Asus ScreenPad Plus. The secondary display also supports both the stylus and the Asus Pen, helping users use and create content.

The difference of ScreenPad Plus on ROG Zephyrus Duo 15 is that this screen will be pushed to an angle of 13 degrees, not flat like on ZenBook Pro Duo. This makes it easy for users to observe the secondary screen when placing the machine on a table without leaning over.

In terms of configuration, ROG Zephyrus Duo belongs to the top of the table today with Intel Core i9-10980HK / i7-10875H chip, up to 32GB RAM, NVIDIA RTX 2080/2070 GPU SUPER Max-Q, two M2 NVMe SSD slots, screen main 15.6 inch 4K IPS 60Hz / FHD IPS 300Hz and 90Wh battery.

To enhance thermal performance, Asus uses liquid metal thermal paste from manufacturer Thermal Grizzly, which Asus claims will help reduce 8 degrees C compared to previous models.

ROG Zephyrus Duo 15 will start at \$ 2999 and will go on sale from Q2 2020.
