

Asus Transformer Pad netbook style launched

Based on the netbook design, Asus introduced at Computex in Taiwan two new Transformer Pad members own a 10.1-inch screen, running Android and an Intel Atom Bay Trail.

Based on the netbook design, Asus introduced at Computex in Taiwan two new Transformer Pad members own a 10.1-inch screen, running Android and an Intel Atom Bay Trail.

Asus' new *Transformer Pad* duo owns Intel Atom Z3745 Bay Trail quad-core processor at 1.86 GHz and runs Android 4.4. Although it has not yet been officially announced, both products have been introduced by Asus in the introduction to the company's event.

TF303CL is the most advanced member equipped with 10.1-inch screen with Full HD resolution, 2 GB RAM, 16 GB internal memory, 4G connection with battery with up to 10 hours of operation time. Attached to the machine is a keyboard.

Meanwhile, the TF103C version lacks LTE capabilities as well as 1280 x 800 pixel screen resolution and 1 GB RAM, lower than the brother version. The battery of the device has an operating time of about 9.5 hours.

Information price as well as the time the product has not been posted on Asus.
