Asus is already associated with the Eee PC brand mini laptop, which introduced the new Asus UL ultraportable series using energy-saving Intel CULV (consumer ultra low voltage) processor. The new casing is made of thin and light aluminum alloy, equipped with Turbo33 technology to improve processing speed by 30% and extend battery life to over 12 hours.

Asus UL - series will use CULV dual-core SU7300 1.3 GHz CPU and can be equipped with both integrated graphics and NVIDIA 210M 512 MB discrete card with the ability to convert to suit the needs of users.

There are 7 UL-series models with screen sizes: 12.1 inch (UL20A); 13.3 inches (UL30A); 14 inches (UL80V, UL80Ag); 15.6 inches (UL50A, UL50Ag, UL50Vg).

Currently Taiwanese computer company has not yet announced the price and the time to sell the device to the market.
