

Asus will launch 2 3D laptops at the same time

Following the compatriot manufacturer, Acer is coming, Asus will officially join the market of 3-dimensional image display laptops not only with 1 like Acer but 2 products.

Following the compatriot manufacturer, Acer is coming, Asus will officially join the market of 3-dimensional image display laptops not only with 1 like Acer but 2 products. 2 products of the first 3D laptop from Asus will be officially put in line for gamers G with 2 codes as G72GX and G51J3D.

Asus G51J3D laptop "15", one of the company's first 3D laptops.

Despite this announcement, the Taiwanese manufacturer still put more specific information on the two machines in secret. However, there is still a genuine leak information: laptop 15 "Asus G51J3D is integrated with Nvidia's GeForce GTX160M graphics card and 1GB DDR3 and maybe the 17" G72GX will also have graphics and memory configuration the same, similar.

According to the Asus G51J3D test during the introduction of the two laptops, Register Hardware reporter said: 15 people can watch at the same time when wearing glasses.

Photos taken from the demo model show that it uses Geforce graphics cards and Intel Core i7 chips.
