

ATI Radeon HD 5700: Cheap DX11 graphics card for gamers

Support for DirectX 11 graphics library, equipped with Juniper 40nm graphics processor and 128-bit GDDR5 graphics memory with memory bandwidth of 76.8 GB / sec, but HD 5700 series only costs under 3, 6 million VND.

Support for DirectX 11 graphics library, equipped with Juniper 40nm graphics processor and 128-bit GDDR5 graphics memory with memory bandwidth of 76.8 GB / sec, but HD 5700 series only costs under 3, 6 million VND.

Shortly after the release of the high-end DirectX 11 HD 5800 series, AMD announced the new mid-range ATI Radeon HD 5700 graphics card to target the market segment below US \$ 200 (VND 3.6 million) with 2 Main products HD 5770 and HD 5750.

ATI Radeon HD 5770.

HD 5700 series supports DirectX 11 graphics library, equipped with 40nm Juniper graphics processor with 1.04 billion Transistor, 800 processing lines, 40 material handling units and 128-bit GDDR5 graphics memory with Memory bandwidth up to 76.8 GB / sec.

ATI Radeon HD 5770 is priced at 170 USD (about 3 million VND) which is a more expensive version with higher core / memory frequency of 850/1200 MHz respectively. Meanwhile, the Radeon HD 5750 is more affordable: 120 USD (about 2.2 million VND) accepting a core / memory frequency of 770/1150 MHz.

The HD 5770 only has a 1GB version, while the HD 5750 will have two 512MB and 1GB versions. Both of these graphics cards have low power consumption: 16 ~ 18W at idle and 86 ~ 108W at operation. Both the HD 5770 and 5750 support AMD's newly announced Eyefinity multi-screen display technology as well as combining it with the CrossFireX standard.
