

Attendance for the largest TV models in Vietnam today

Samsung, LG and Sharp are the most high-end brands with screens from 80 to nearly 100 inches, on par with home cinema projectors.

Here are the largest models of Vietnam TV being sold on the market. Samsung, LG and Sharp are the most high-end brands with screens from 80 to nearly 100 inches, on par with home cinema projectors.

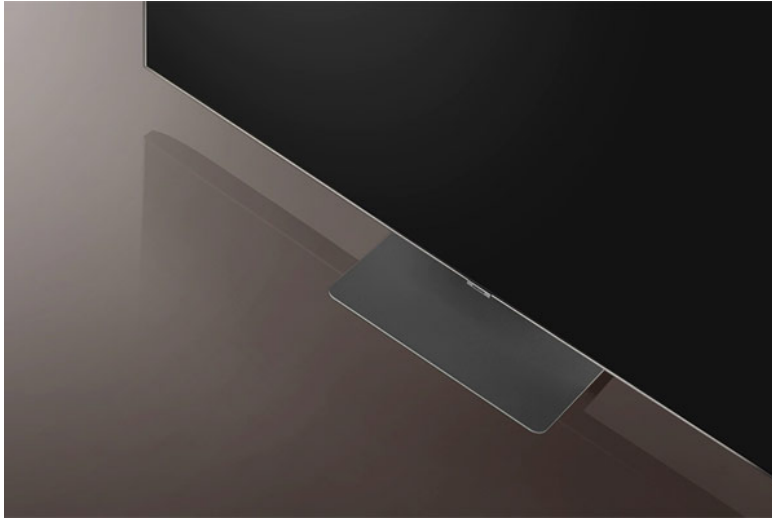

Samsung QLED Q900R 98 inches (2.3 billion VND)

Owning a 98 inch screen, this is the largest 8K TV model in the world. Not only large in size, this model of Samsung TV is also equipped with many modern technologies such as automatically improving low-quality content to high-resolution 4K, 8K thanks to AI. The 98-inch Q900R's screen shows 33 million pixels, which is four times the resolution of 4K.

This 'giant' TV costs 2.3 billion, about the same price as a luxury car or a high-class apartment.

LG UM7500PTA 86 inches (VND 150 million)

With 86 inch screen, LG UM7500PTA is the second largest TV in Vietnam market. But because this TV is only equipped with regular LED screens and 4K resolution, its price is much lower than the 98-inch model of Samsung.

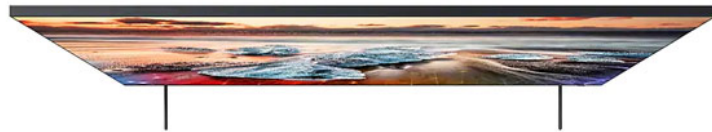

UM7500 is equipped with current technologies such as 4K Cinema HDR support, AI features, voice command support, audio and image optimization for each broadcast content .

Samsung Q900R 82 inches (VND 300 million)

This is a miniature version of the 98-inch Samsung QLED Q900R, it is only 82 inches in size and is 8 times cheaper. 82-inch Q900R is equipped with technology and image quality does not change much compared to 98-inch Q900R, is still an AI processor to enhance images.

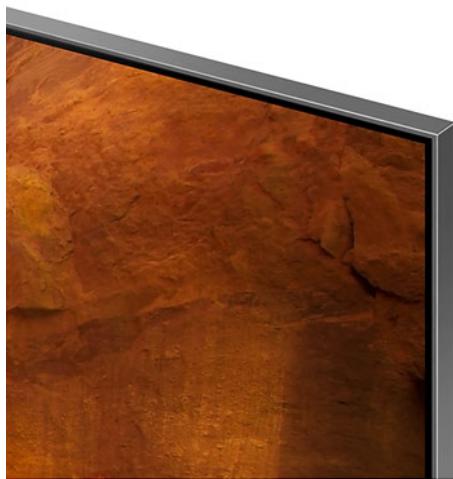

This TV model has a screen resolution of 8K 33 million pixels, for image quality much higher than the 4K screen of the same size.

Samsung Q90RA 82 inch (VND 196 million)

This is the top model of Samsung's 4K TV lineup in 2019. This model is equipped with LCD screen technology with LED backlight directly, Quantum Dot (QLED) technology, high brightness up to 2000 nit.

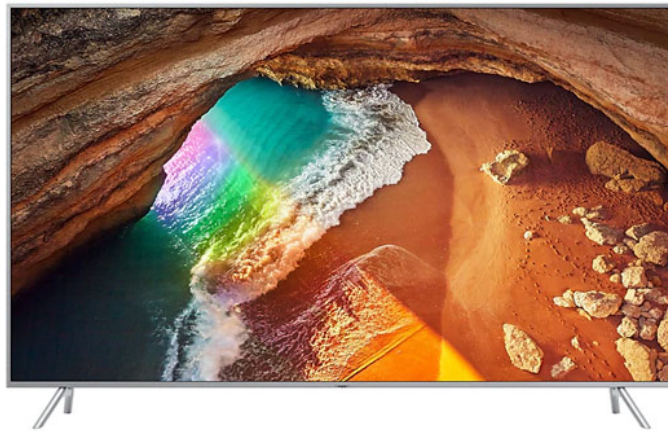

The product is capable of upgrading low-quality content to sharp 4K standards thanks to its own image processor, integrated AI called Quantum 4K.

Samsung QLED Q75 and Q65R 82 inches (from VND 126 million)

The next 2 products also belong to the Korean TV company, 4K QLED Q75 and Q65R TVs with 82 inch screen size.

The Q65 series uses the familiar edge-to-edge LED screen, while the Q75 series is equipped with a backlit LED screen and a high brightness of 1,000 nit. Both of these QLED TVs from Samsung have 4K resolution.

Sharp 8T-C80AX1X 80 inches (VND 350 million)

Despite having the smallest screen on the list, the Sharp 8T-C80AX1X has a standard 8K resolution. This TV series is equipped with a speaker system hidden under the screen that allows emitting vivid sound from the center of the frame. The base of the TV is tall and long, can be placed directly under the floor without shelves. Sharp 8T-C80AX1X 80 inch capable of controlling, inputting voice by running Android TV operating system.
