

Attractive portable speakers for laptops

Portable speakers for laptops have a compact, easy-to-carry design, but the sound quality is better compared to the computer's external speakers.

Portable speakers for laptops have a compact, easy-to-carry design, but the sound quality is better compared to the computer's external speakers.

With a compact design, equipped with a USB power supply, portable speakers provide much better sound quality than the laptop's external speakers.

Here are the best mobile speakers for laptops on the market today, according to Cnet magazine.

Altec Lansing BXR1220

Altec Lansing portable speaker set has a nice design with a black and rough paint, shaped like cans of water and placed on top by thin legs. Cnet reviews Altec Lansing BXR1220 for good sound quality when compared to other portable speakers.

At a price of over VND 600,000 (in VN) and the ease of use that the product offers, the Altec Lansing BXR1220 is a valuable product for those who want to listen to music while traveling.

JBL On Tour XTB

According to Cnet, JBL's On Tour XTB deserves one of the best portable speaker models on the market by sound quality, along with the ability to control wirelessly via Bluetooth wireless connectivity. JBL's speakers are

shaped like a flying saucer, with four separate speaker clusters arranged on four different sides on the product side.

However, the price of 3.8 million dong for a set of portable speakers like On Tour XTB is also a control for users to be hesitant.

iHome iHM79

With a price of more than one million VND, iHome brings users mobile speakers with quite strange and unique designs, iHome iHM79.

In particular, the left and right speakers must be able to attach to each other, forming a "mobile egg" when the user is not using or when traveling. At the time of use, users also need to turn and turn on the shrug on each speaker left and right before turning on the active speaker.

Logitech Z205

Not as compact and portable as the rest of the speakers on the list, the Logitech Z205 still has a performance in Cnet's selection list because of the sound quality it offers.

Equipped with a USB power supply, the Logitech Z205 can perform better, larger sound than the laptop's weak speakers. Although not yet available in Vietnam, consumers can order Logitech's portable speakers from abroad for about \$ 40.

Altec Lansing Orbit iML237

Not designed in 2.0 style and playing forward-facing sound like the BXR1200 model, Altec Lansing designed the Orbit iML237 speaker set with a single speaker but capable of displaying 360-degree multi-dimensional sound.

Orbit iML237 has a compact design with an outer shell made of synthetic plastic material, adding to the speaker's appearance are yellow aluminum rims. A hidden base on the back of the speaker makes the speaker set in any direction, making the sound more effective.

Twelve South BassJump

At first glance, the BassJump subwoofer (\$ 80) has a look similar to Apple's compact Mac Mini. The speaker is made of aluminum, similar to the material of the MacBook Pro, the four sides are rounded and there is only one micro USB connector on the side.

Designed in an upward-looking subwoofer, Bass Jump is an essential addition to the ability to perform low-frequency sounds too poorly on the laptop speakers. With Bass Jump, your laptop can perform vibrant, powerful

music, not just simple or wordless music.
