

AudioPen - An AI-powered speech-to-text app.

AudioPen is an AI-powered dictation tool that converts spoken audio recordings into complete text.

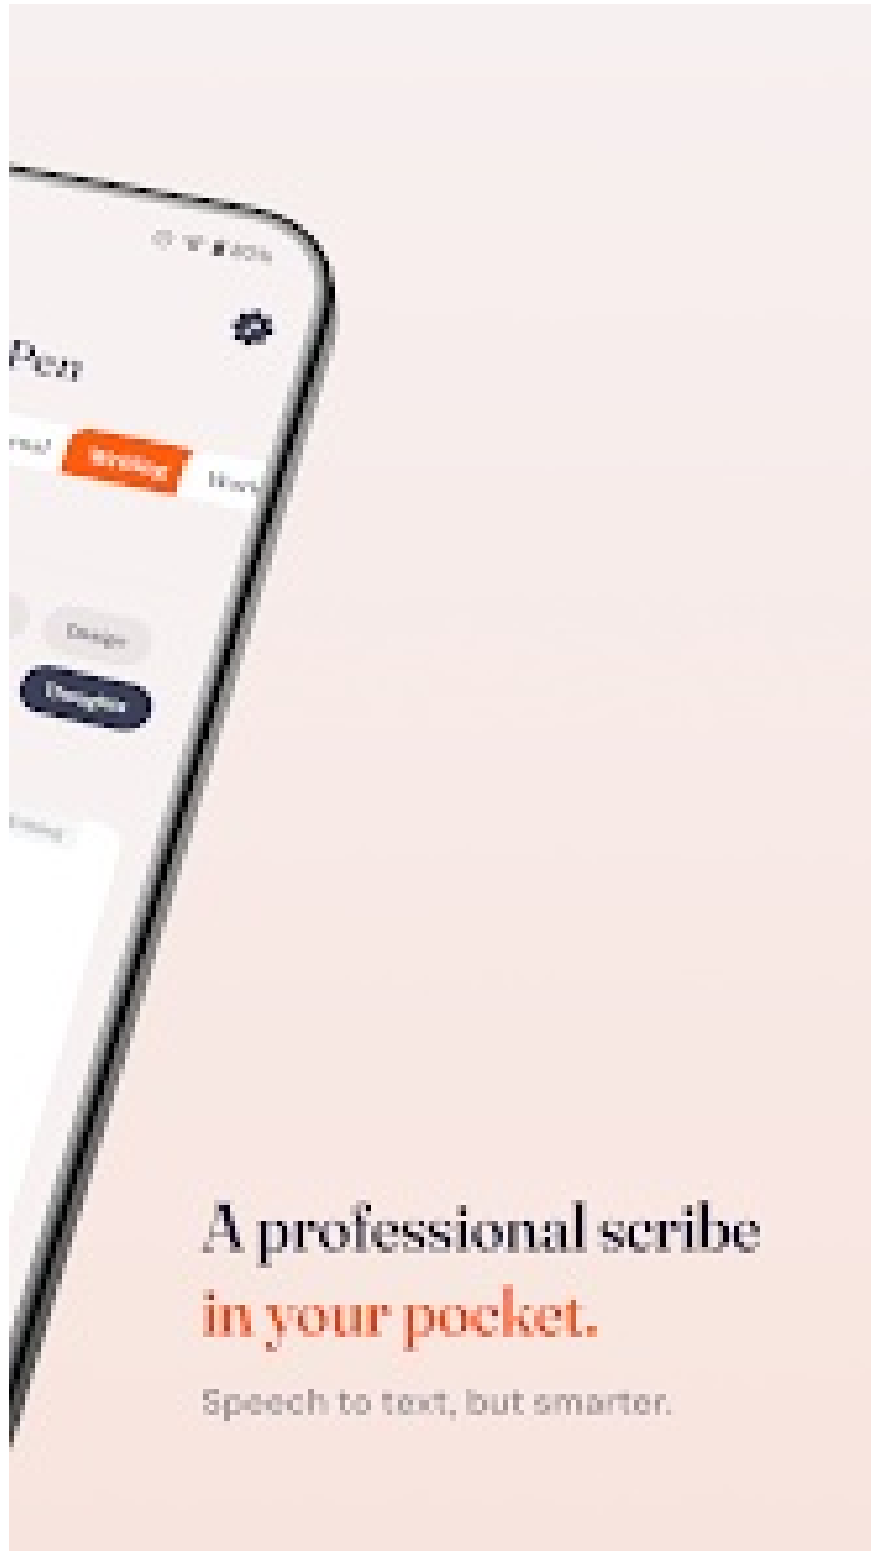

What is AudioPen?

AudioPen is an AI-powered dictation tool that converts spoken audio recordings into complete text. Users can brainstorm or draft essays using the speech-to-text feature. This tool can be helpful for students who struggle with writing, such as those with dysgraphia, dyslexia, and other learning difficulties that affect their writing abilities.

Go from fuzzy thought to clear text. *Fast.*

All you have to do is talk.
AudioPen will clean
things up when
you're done.

A professional scribe
in your pocket.

Speech to text, but smarter.

Output Length

AudioPen's output will be of medium length.

Special words

Add names or specific terms that you want AudioPen to spell correctly.

AudioPen, Louis Pasteur, Nikola Tesla, Taylor

Write in any **style**.

Talk freely. Ramble, if you must. AudioPen rewrites your words in a style and length your choice.

Rewrite Level

Low Medium High

Your voice notes will be rewritten in the style and length that you've chosen. AudioPen may restructure its contents if needed.

Writing Style

Describe a style you want AudioPen to write in.

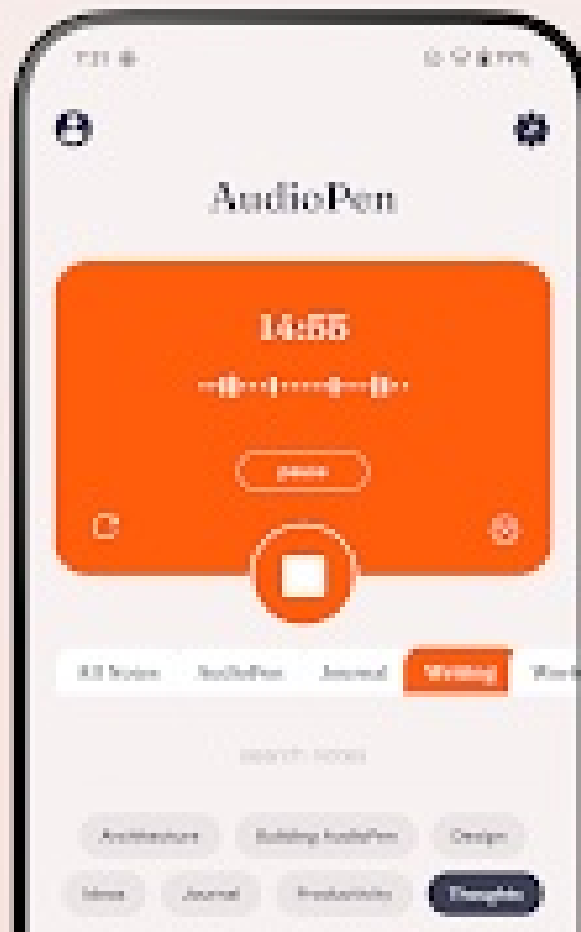

Friendly, flowing, simple sentences. Use simple words. Prioritize clarity above all else.

Architectural Inspiration and Identity

Thinking about how beautiful architecture, and the feelings that comes to mind is that beautiful architects

Note down anything, anywhere. **Just talk.**

Meeting notes, journal entries, or sudden ideas. You do the talking. Let AudioPen do the writing.

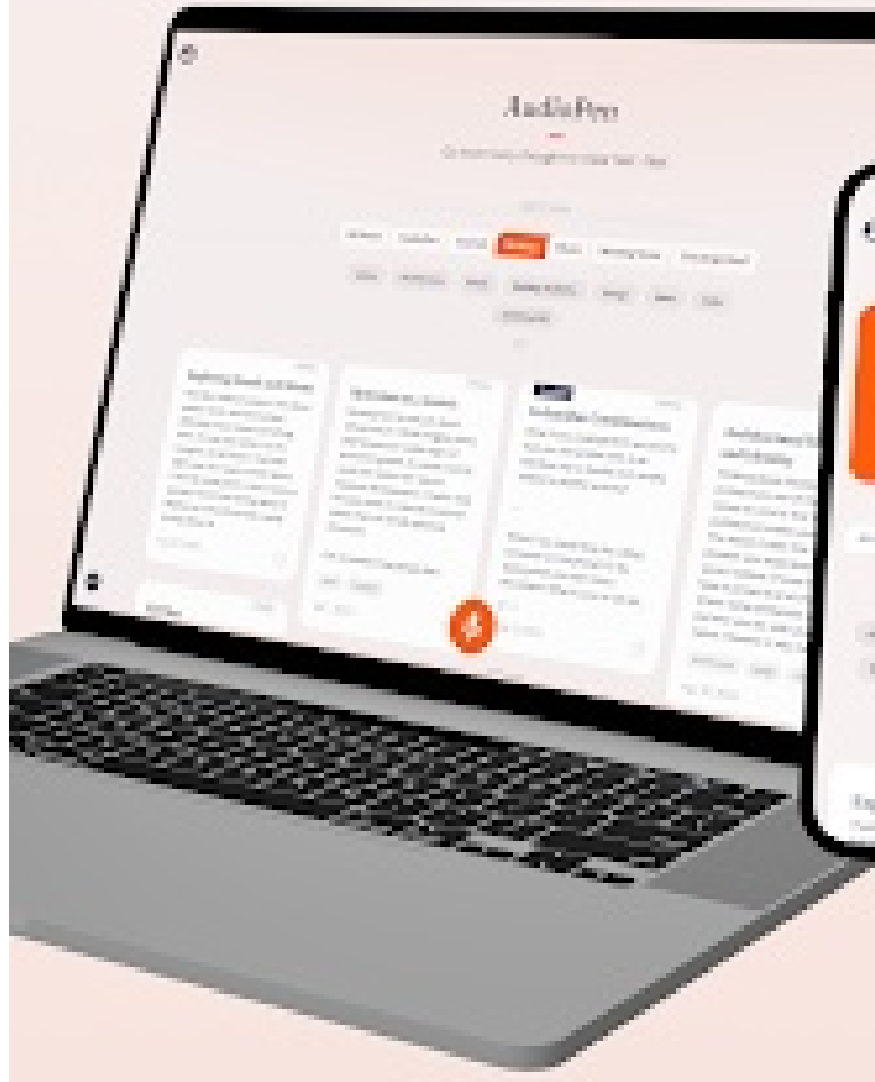

Create first drafts in record time.

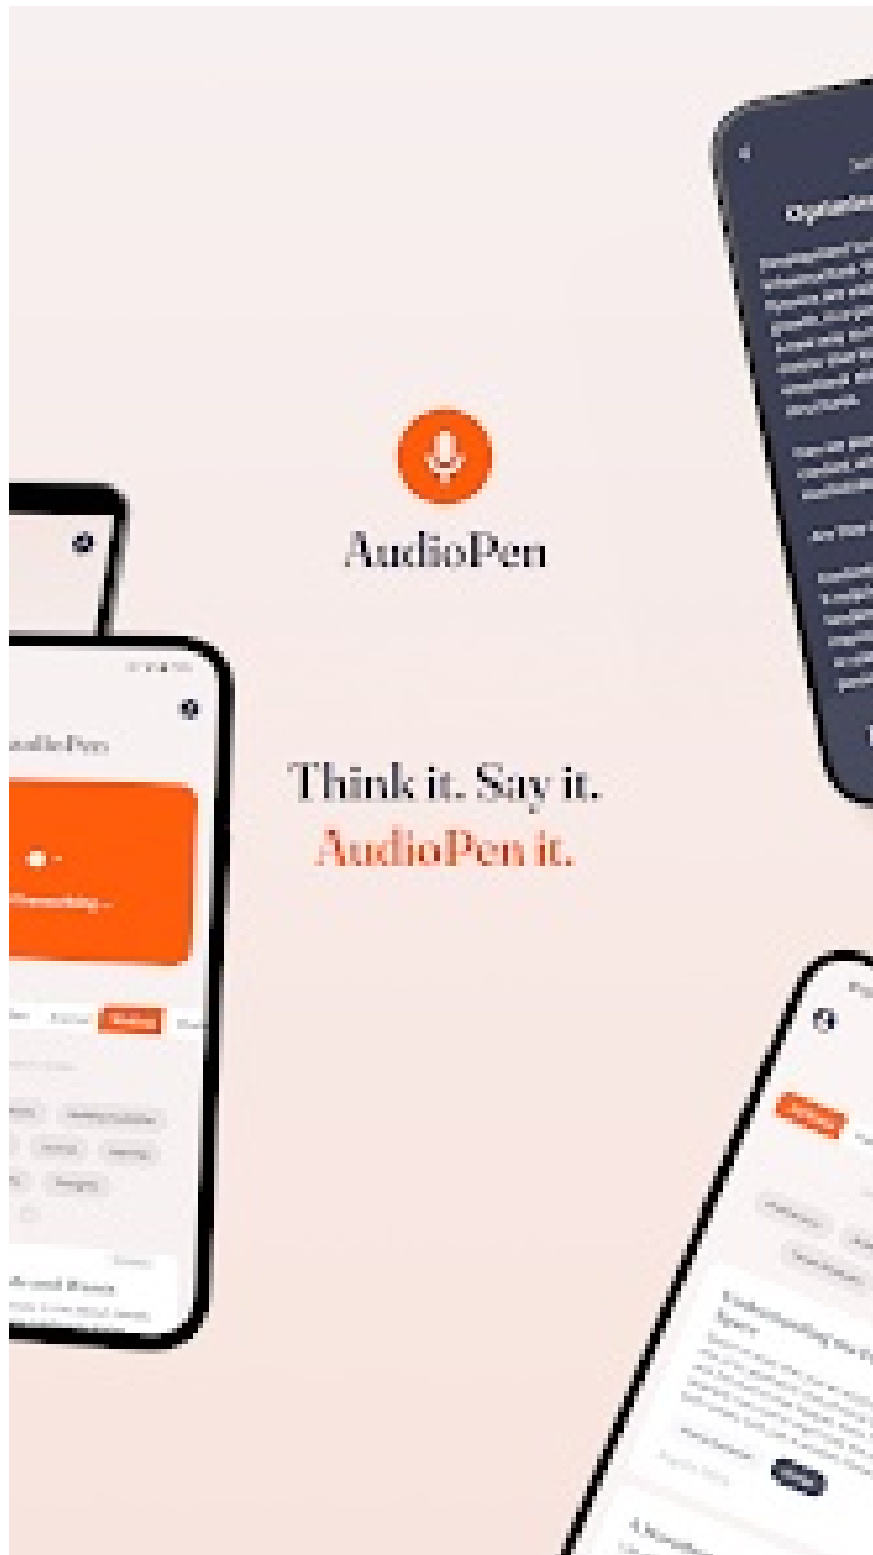

No more blinking cursors on blank screens.
Draft essays, papers, blog posts, and more.
All you have to do is talk.

Capture. Edit. Organise. On any device.

AudioPen works on mobile, web and
as a Chrome-extension.
Talk whenever. Type wherever.

How does AudioPen work?

AudioPen works by capturing speech and converting it into text. This process uses advanced algorithms to convert audio files into text, which can then be edited and shared. Simply speaking into the app allows users to create clear, ready-to-distribute text, eliminating the need for manual typing and enabling faster communication.

Features, functions, and benefits of AudioPen

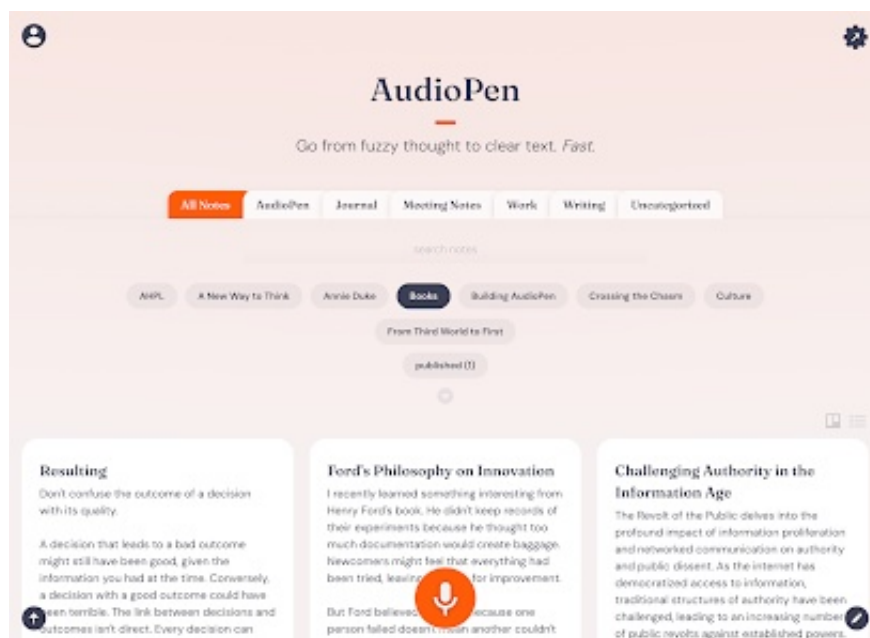

AudioPen offers a range of features designed to enhance productivity and simplify the speech-to-text conversion process. These features not only facilitate speech-to-text conversion but also provide additional functionality to improve the user experience.

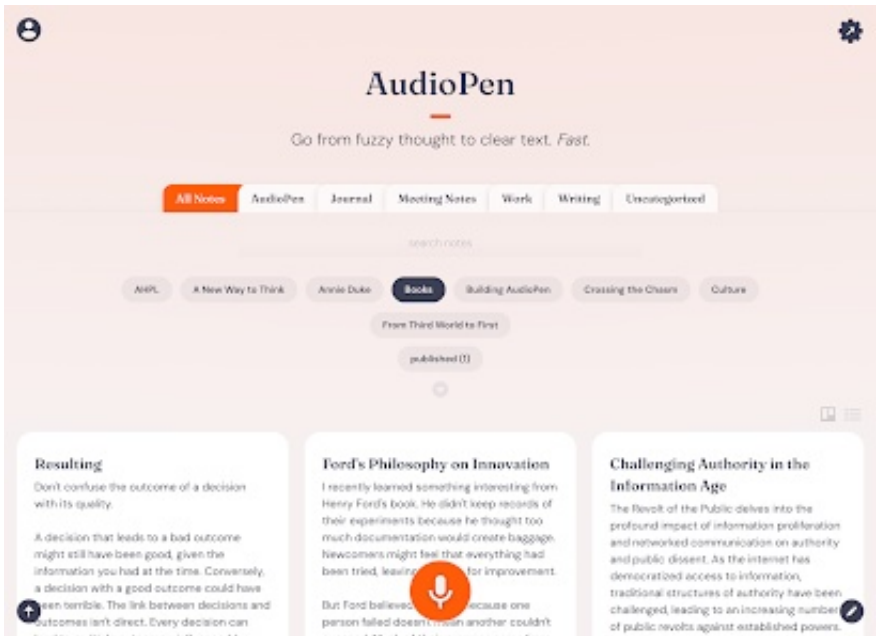

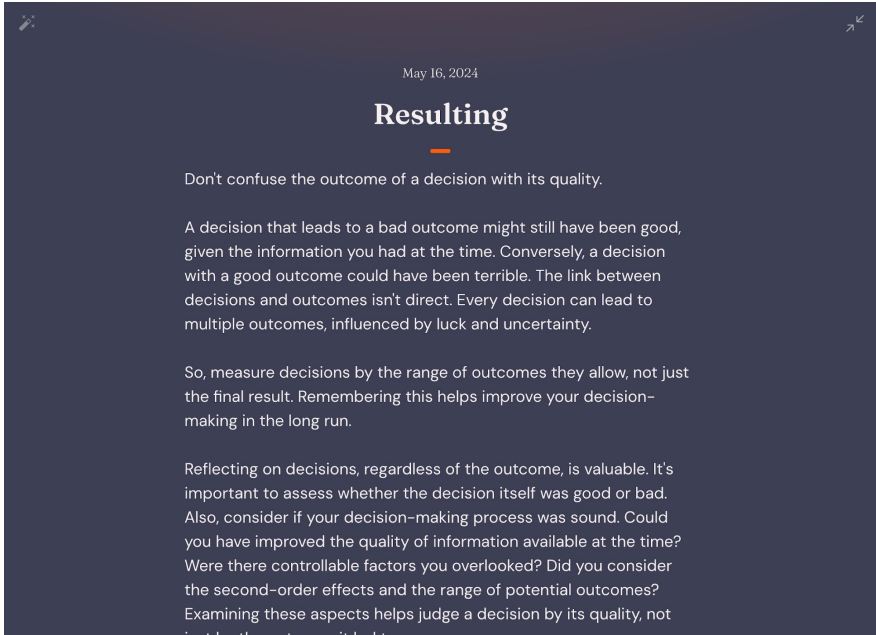

1. **Speech-to-text conversion** : Converts speech to text with high accuracy. This feature is essential for creating notes for meetings and brainstorming sessions.
2. **Multilingual support** : AudioPen is capable of understanding and converting most major languages in the world, making it a versatile tool for international users.
3. **Key Features** : For subscribers, AudioPen offers additional functionality such as uploading audio files, downloading audio from voice notes, and importing notes for summarization. **Multi-Device Access**: Users can access their AudioPen Prime account from any device, ensuring their notes are synchronized and accessible anytime, anywhere.

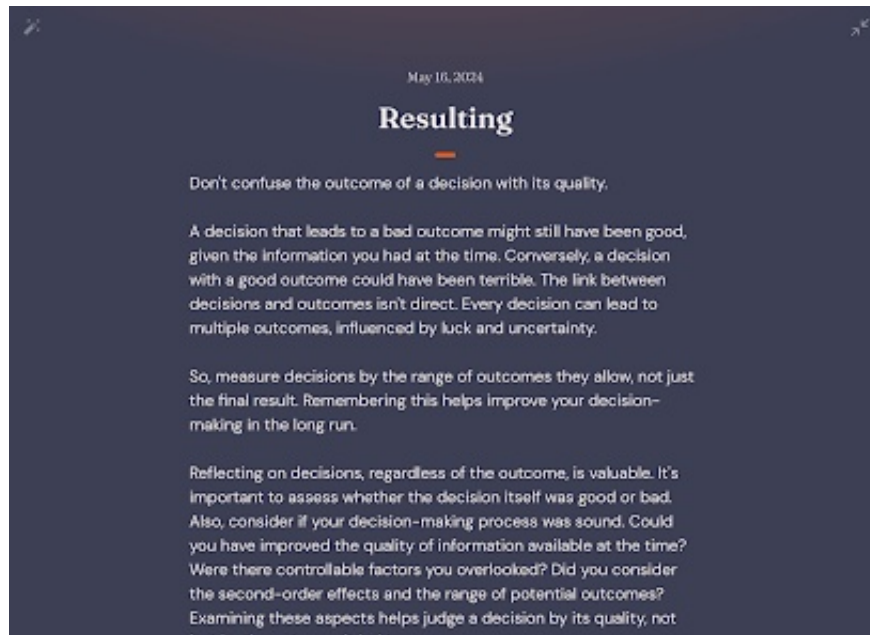

Potential use cases and applications

AudioPen serves a variety of purposes across many fields, making it a versatile tool for both personal and professional use. Here are some potential applications and use cases:

1. **Business meetings** : Record meeting conversations and convert them into minutes or summaries, ensuring no important points are missed.
2. **Creative writing** : Writers can use AudioPen to quickly record ideas and organize them into coherent text.
3. **Education** : Students and educators can transcribe lectures or personal study notes, helping them understand and remember information better.
4. **Content creation** : Bloggers and content creators can use AudioPen to compose articles or scripts by speaking, and then edit and refine them.

Who is AudioPen for?

AudioPen is designed for a diverse range of users who are looking to improve productivity through efficient transcription services. This includes:

1. **Business professionals** : Individuals who need to record meetings, create reports, or manage communication easily.
2. **Writers and creators** : Those who need a tool to record spontaneous ideas and thoughts without interrupting their creative flow.
3. **Students and educators** : Users in educational settings who need to take lecture notes or prepare learning materials.
4. **Content creators** : Bloggers, podcasters , and YouTubers need to create and organize content quickly.

Is the AudioPen free? Is there a free trial available?

AudioPen offers a free version that allows users to experience the basic functions, giving them a sense of what they'll get before subscribing to Prime. This trial period helps users determine if the tool meets their needs before purchasing.
