

# Automatically delete data when closing Chrome, Firefox, Coc Coc ...

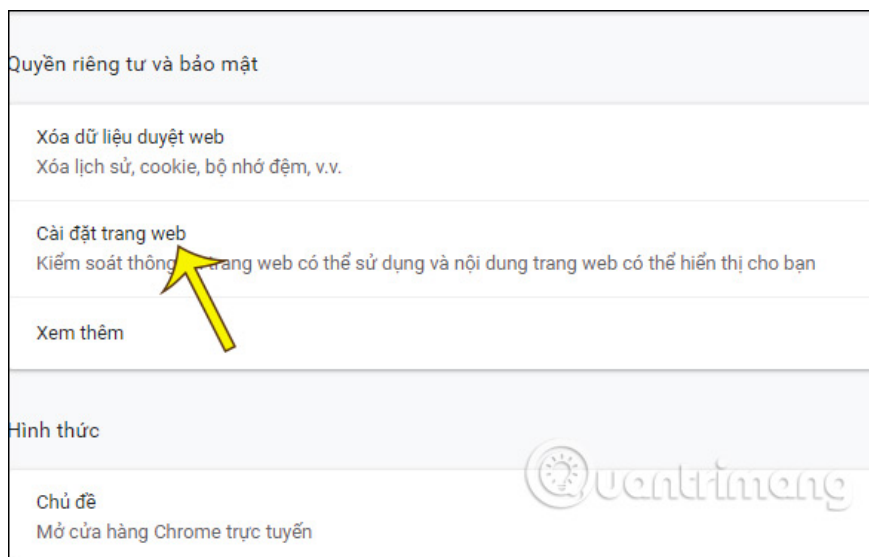

Current web browsers allow automatic deletion of data when closing the web browser, without the need to delete browser data manually.

Current web browsers allow automatic deletion of data when closing the web browser, without the need to delete browser data manually.

All web browsers store data when users surf the web like access history, cookies, search history, account passwords, etc. Normally, to keep personal information safe when using the browser, in addition to opening an incognito tab on the browser, you can delete data automatically automatically when closing the browser without deleting manually. The following article will guide you how to automatically delete data on your browser automatically.

## 1. Clear Chrome data when the browser is closed

We click on **the icon 3 vertical dots** and then select **Settings** and then select **Privacy and security** . Look to the right and select **Website settings** .

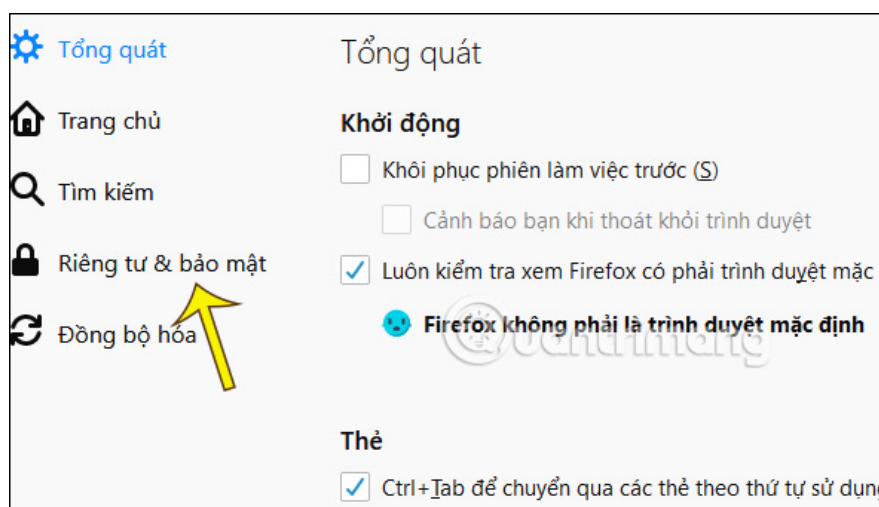

Next, click on **Cookies and website data** . Then just **activate Delete cookies and site data when you exit Chrome** and you're done.

## 2. Automatically delete Firefox data

At the interface in Firefox, click on **the 3 dashes icon** and select **Options** .

Switch to the new interface, click on **Privacy & security** .

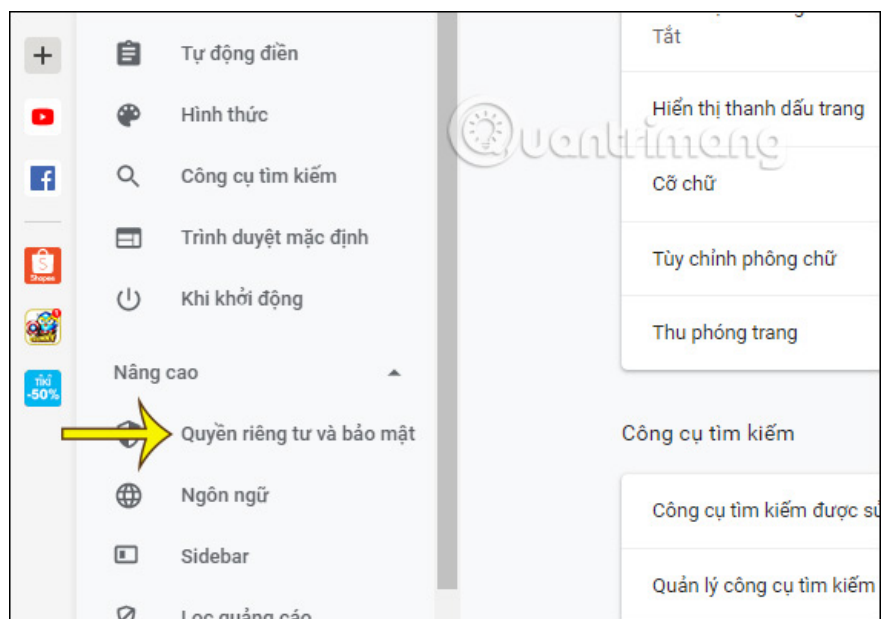

Next, look to the side to find the **Cookie and site data management section** , then check the **Clear cookies and site data when Firefox is closed** .

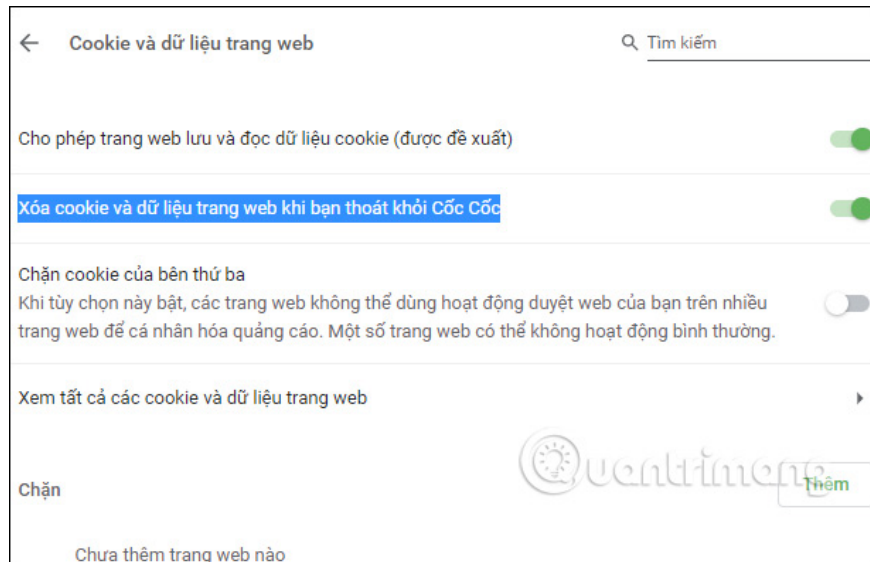

### 3. How to delete data automatically Coc Coc

We also click the **word Coc Coc** in the top left corner and select **Settings** . Switch to the new interface, click **Advanced** , select **Privacy and security** .

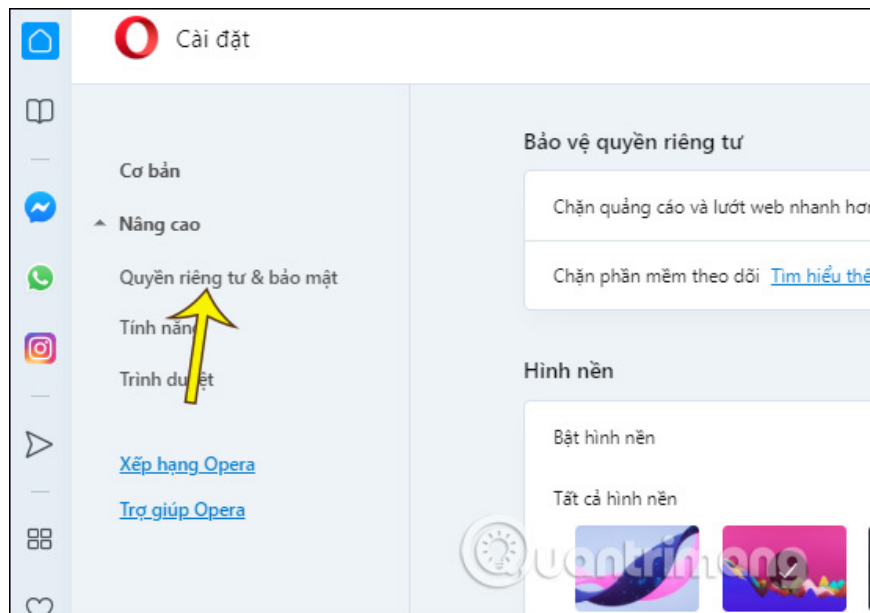

Look to the right also click **Website settings** , select **Cookies and site data** . Then also **turn on Delete cookies and website data when you exit Coc Coc** .

## 4. Clear Opera data when leaving the browser

In Opera browser interface, users click on **Opera icon** in the top left corner and select **Settings** in the displayed list. In the next interface click **Advanced** and then select **Privacy & security**.

Next, click **Website settings**> **Cookies and site data**. Finally **enable the option Delete cookies and site data when you exit Opera**.

## 5. Automatically erase data on Edge Chromium

When deleting data automatically, Microsoft Edge Chromium can also select the type of data you want to delete. To see how to make details, read the article [How to automatically delete web data on Edge Chromium](#).
