This antivirus application is very user friendly, you can note this through its functions. For example, the do not disturb function blocks pop-up messages to help avoid distractions. Most important processes run in the background, not bothering the user while keeping their device safe.

## Features and protection

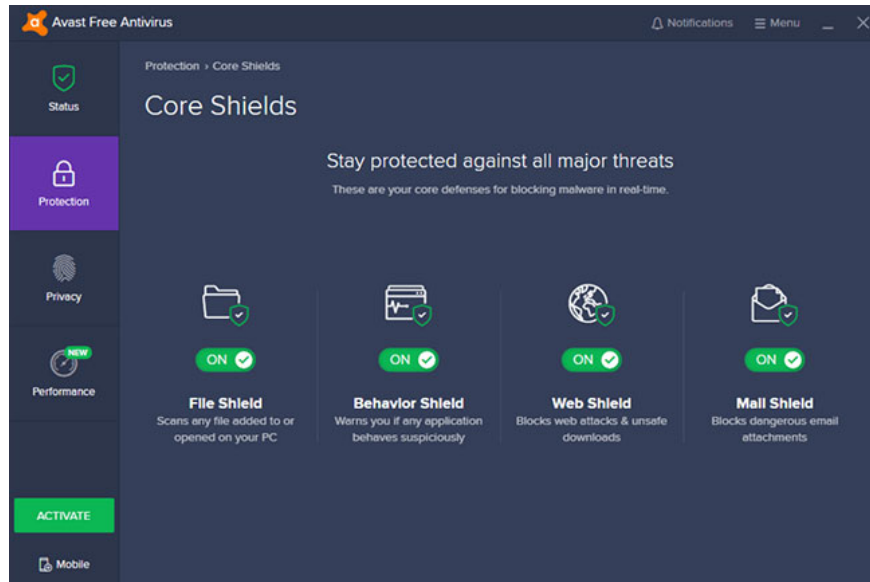

Avast offers a large number of features, which is a great added benefit considering the importance of most of them. Smart Scan takes just a minute and checks your PC for most possible problems. If you are concerned about a particular directory, go to the **Virus Scans** section . You can select areas to exclude and scan.

The capabilities in the web filtering aspect are available when you enable the Chrome add-on. It will show you what dangerous links are in the search results. Furthermore, a WiFi checker will also scan your connection.

**Software Updater** is a module that will scan your software for missing updates, then download and install them for you.

Finally, if you are concerned about any of your anti-virus activities, you can head over to **Settings** and make the system work the way you want.

Most of the lab reports included Avast in their study. The latest studies show that the program blocks 100% of threats, including Trojans and keyloggers, giving only a single inaccurate warning in 1.5 million samples.

## Error and alternatives

While Avast renders little to no error in most cases, nothing is perfect.

Some relatively common complaints include a weak password manager compared to specialized programs. Also, web saver will not detect all links in all browsers, other than Chrome and Firefox.

When it comes to alternative programs you can use, Kaspersky is a favorite of many, even though Avast has a more modern interface. Panda and McAfee are also good alternatives.

## The best free antivirus software

With excellent results on various tests from multiple labs, free registration without registration and lots of extra features, Avast offers more than its competitors in every aspect of kill protection. virus. It is a great alternative to several distinct products.

Especially if you buy paid extras for your plan, such as a data shredder, Avast Free Antivirus will be the best option on the market. However, even the free version offers quite a few features.

With the free antivirus protection that Avast offers, you'll get the highest performance that even some paid services can't deliver. In general, this is a recommended option.
