

Avoid tolls and save money with the Google Maps GPS feature

There must be road taxes, gasoline and insurance that will consume a lot of your monthly budget. Therefore, Google Maps offers a feature that helps you cut a portion of that cost by guiding you to avoid toll roads with Google Maps GPS.

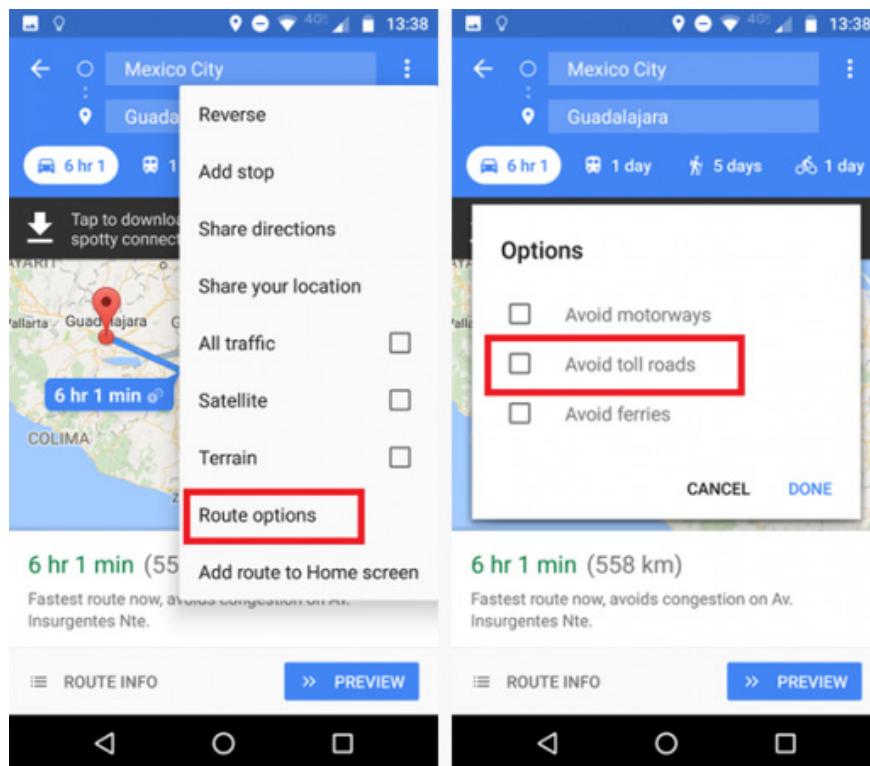

There must be road taxes, gasoline and insurance that will "consume" quite a bit of your monthly budget. Therefore, Google Maps offers a feature that helps you cut a portion of that cost by guiding you to avoid toll roads with Google Maps GPS.

Google Maps GPS

Although there are many excellent GPS applications on the market, for many users, just having Google Maps is enough. If you are using Google Maps as your primary navigation tool, immediately make a small customization below to not waste money.

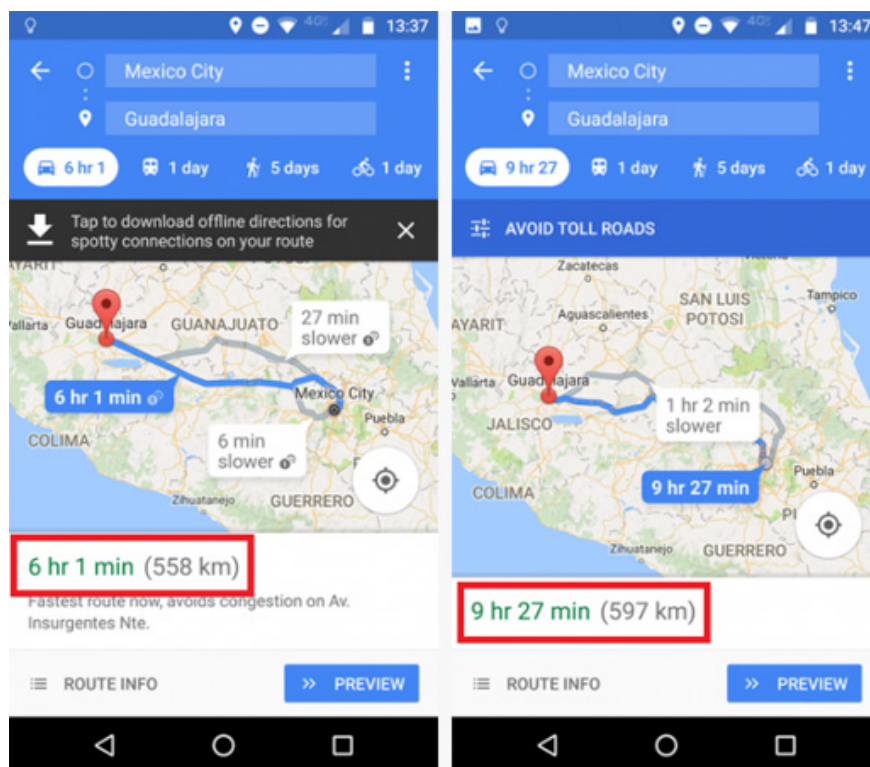

1. Useful features on the Google Maps app that you don't know yet
2. Google has recently revived a "dead" feature since 2009

You will need to make changes to your route on a trip. First, you need to launch the application and enter your journey details. When you have successfully saved the start and end points, click and the vertical 3 dots icon in the top right corner of the screen.

In the menu that appears, select **Route Options** . You will see 3 new options. Check the box next to **Avoid toll roads** to select a road that does not collect tolls. Finally click **Done**.

As you can see in the example below, sometimes the changes you just made can add a significant amount of distance to your trip. Therefore, to really save the budget, you need to consider which path will save more.

Hopefully this new feature of Google Maps may be useful for you.
