

# Backup and restore Bookmark in Firefox

Show you how to back up and restore Bookmarks in Firefox without installing any software.

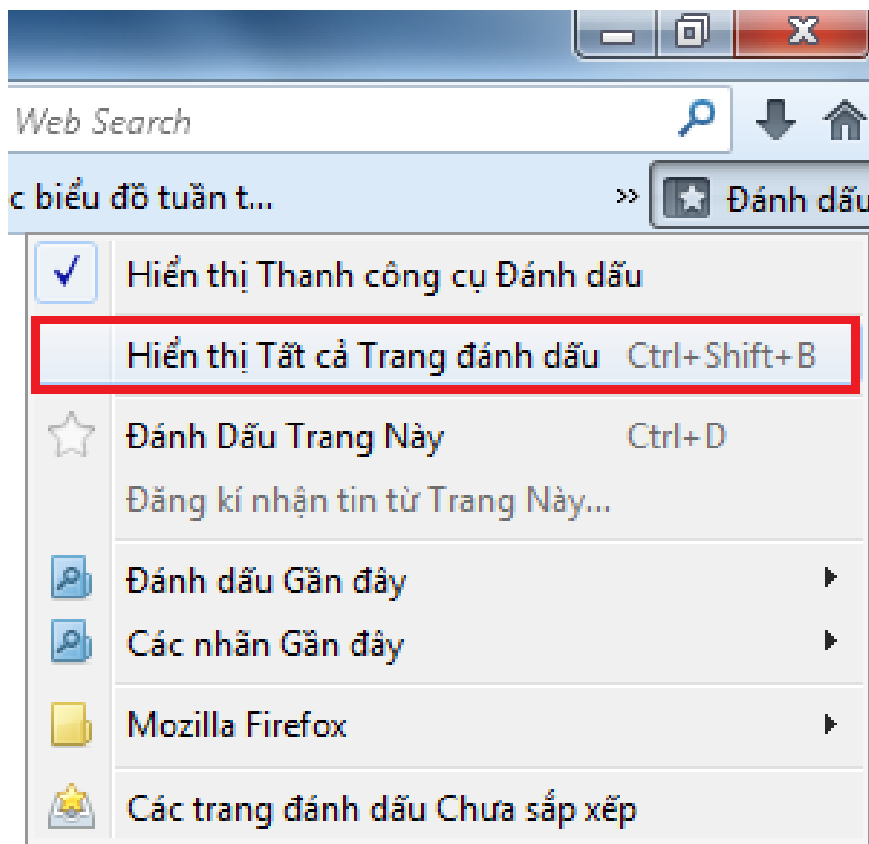

Mozilla Firefox is a web browser with many advanced features in speeding up the surfing process. So Mozilla Firefox is still a lot of people choose to use as the default web browser for computers. In addition to the outstanding features, the Bookmark feature is also a feature used by many people.

In the process of studying and working, you may have to reinstall Win or Ghost on your computer or you can change computers. Backing up and restoring bookmarked sites is essential.

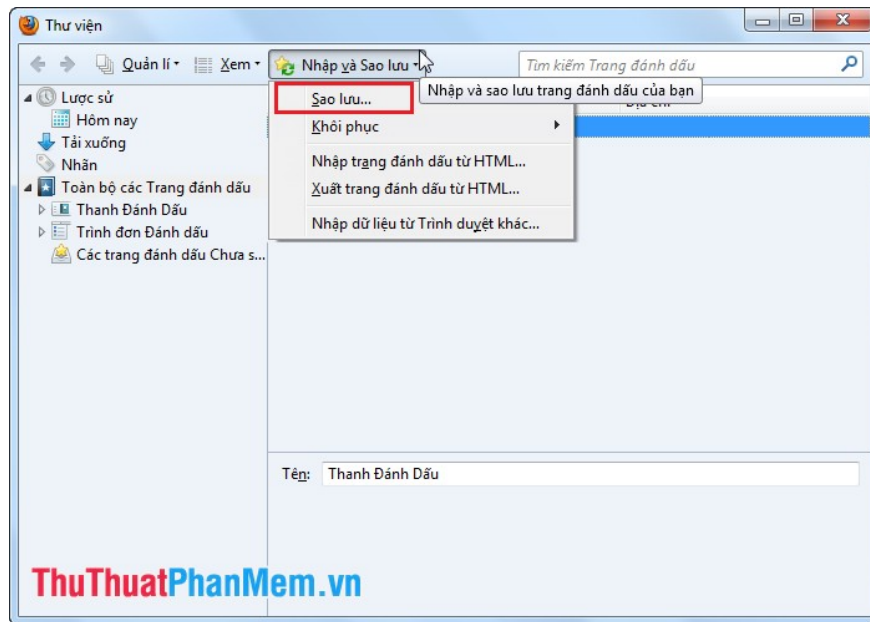

Here I would like to guide you how to backup and restore Bookmarks in Firefox without installing any software.

## 1. Back up Bookmarks.

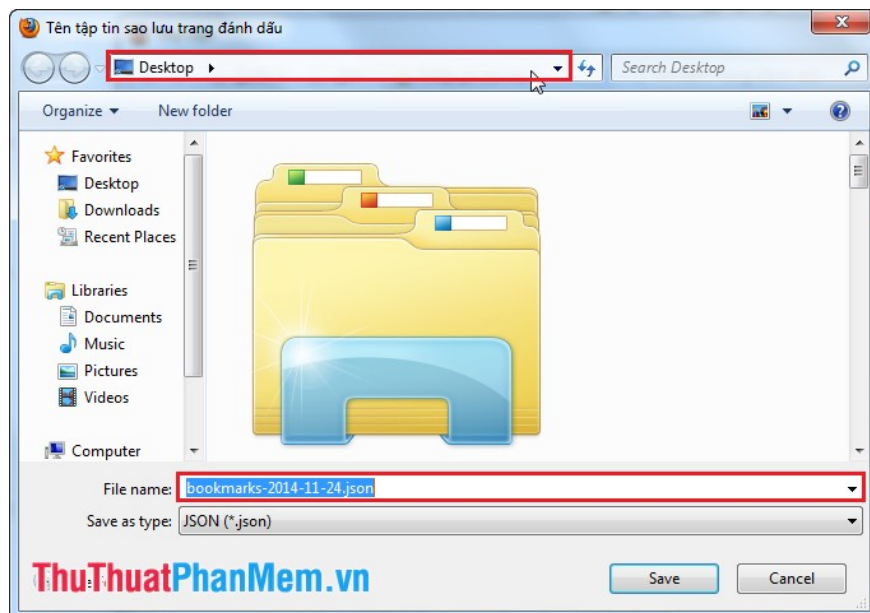

**Step 1:** You select **Bookmark** on the menu bar of Firefox and select *Show all bookmarks*. Or you can select the key combination **Ctrl + Shift + B**.

**Step 2:** Library window appears , select **Import and Backup** and select **Backup** .

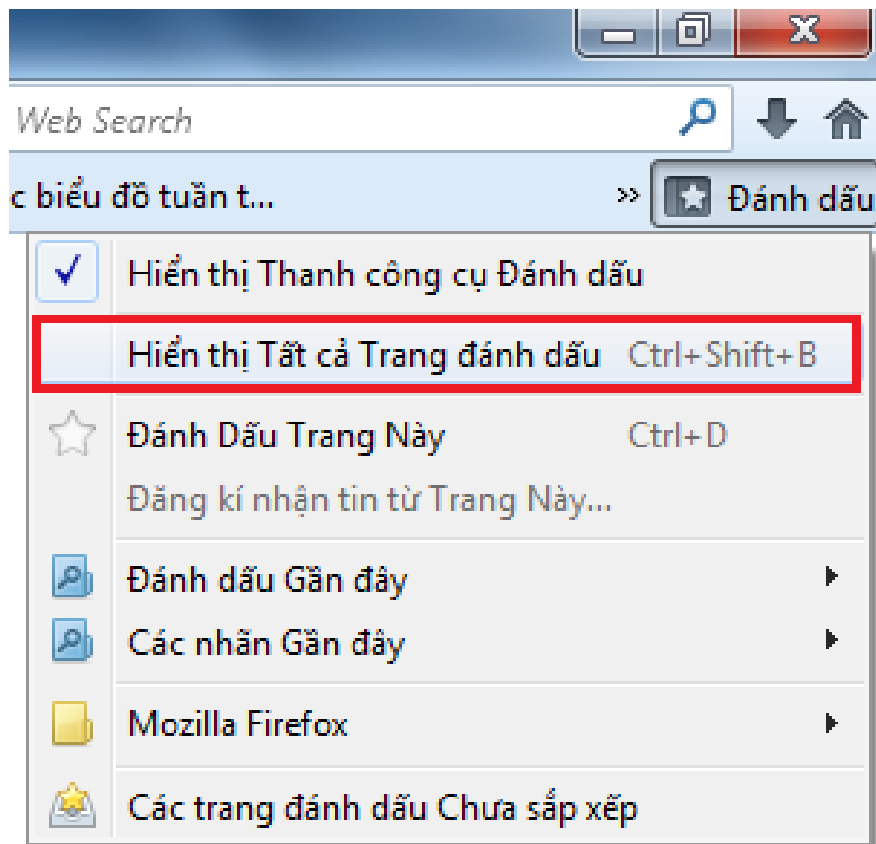

**Step 3:** Enter the name of the backup file and select the address to save the backup file. Then click **Save** .

## 2. Restore Bookmark.

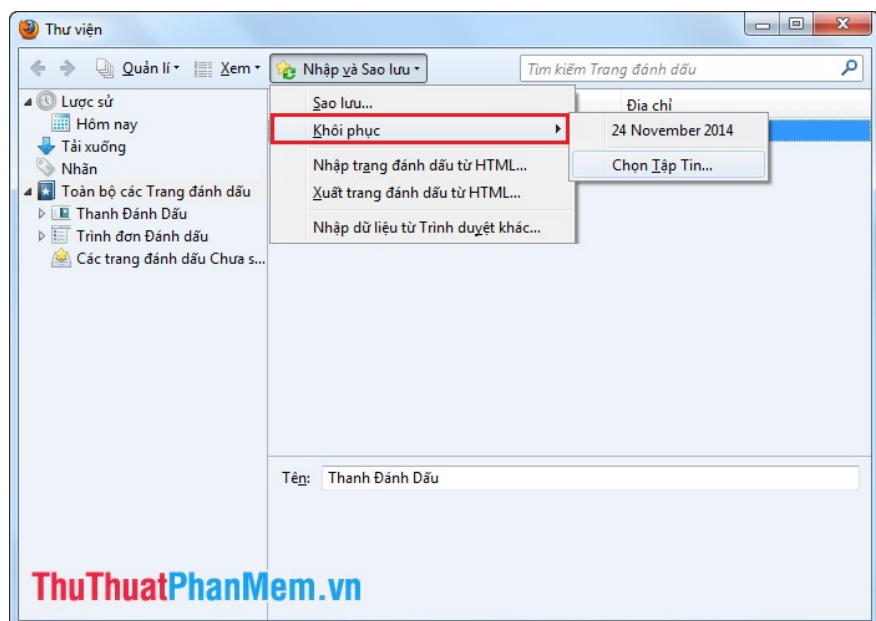

**Step 1:** You select **Bookmark** on the menu bar of Firefox and select **Show all bookmarks** . Or you can select the key combination **Ctrl + Shift + B** .

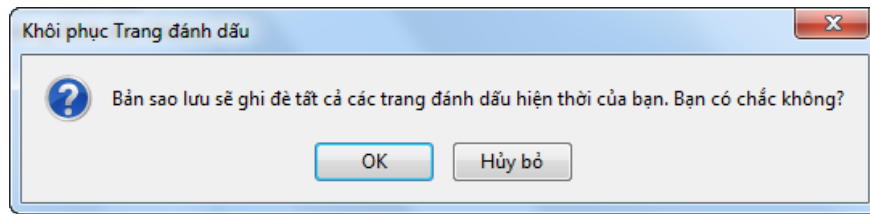

**Step 2: Library** window appears , select **Import and Backup** and select **Restore** .

You can choose a backup:

- The directories that are marked with date and time are automatic backups.
- **Choose File** allows you to recover data from a manual backup.

**Step 3:** After selecting the backup to restore, there will be a dialog box to give a notice, you click **OK** to complete.

Close the **Library** window .

Hopefully the article above can help you in the process of using Firefox.
