

Backup and restore passwords on Coc Coc

How to backup and restore passwords saved on Coc Coc browser. Please follow along with the following tutorial of TipsMake.com

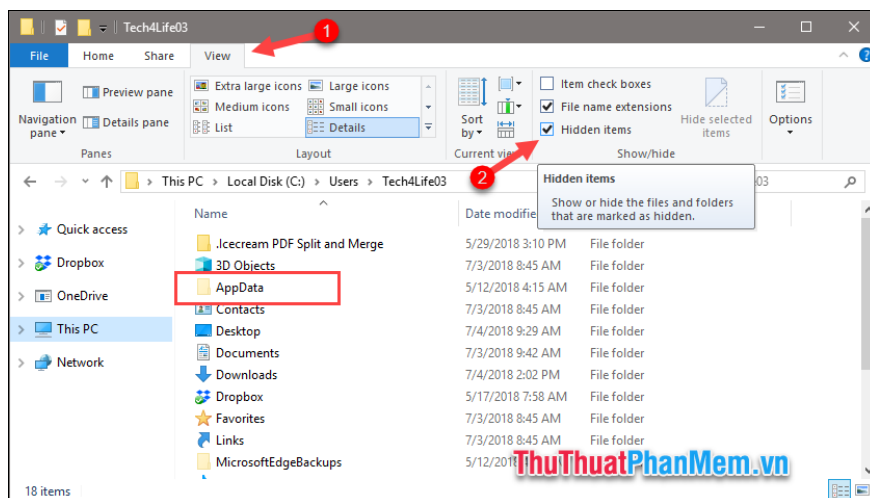

How to backup and restore passwords saved on Coc Coc browser. Please follow along with the following tutorial of TipsMake.com

Step 1: The account and password you save in the browser will be stored in a file called **Login Data**, so to backup the password we need to find this file .

To find the Login Data file, browse for the following:

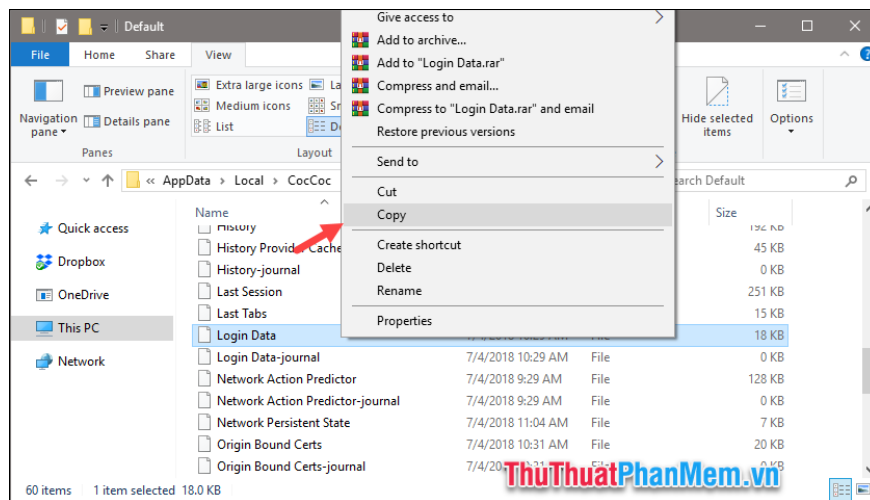

C: Users [User Name] AppDataLocalCocCocBrowserUser DataDefault

Note : In case you cannot find the **AppData** folder, this folder has been hidden. You need to unhide it by selecting the **View** tab then selecting the **Hidden items** item , now you will see the AppData folder appears and is dimmer than other folders.

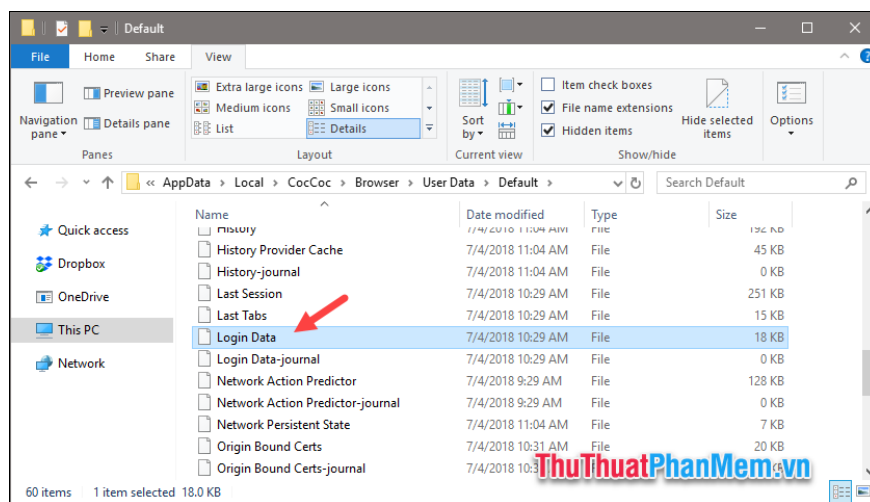

Step 2 : After showing the hidden file, continue browsing the path above and navigate to the **Login Data** file .

After finding the Login Data file, copy this file to another safe directory (not recommended in C drive). So we have finished backing up the password.

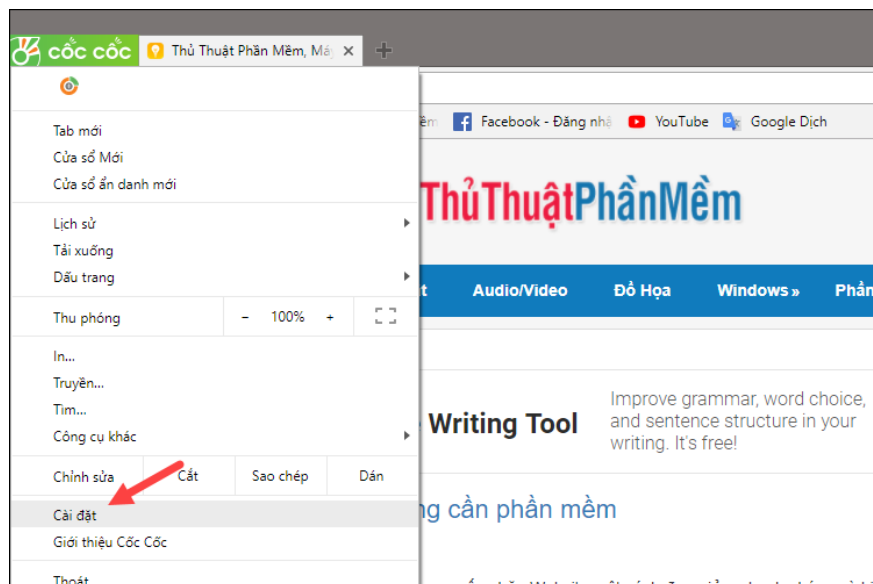

In the future, if you want to recover the lost password, just **copy the Login Data** file and **Paste** it into this folder again.

In addition to backing up using a Login Data file, we also have another way to backup passwords more conveniently using a Google account.

All you need to do is log in your Google account to C?c C?c browser, all your browsing data, including your password account, will be backed up to that Google account. In the future, if you reinstall Windows or your browser, simply log back into your previous Google account and all your browsing data will be restored.

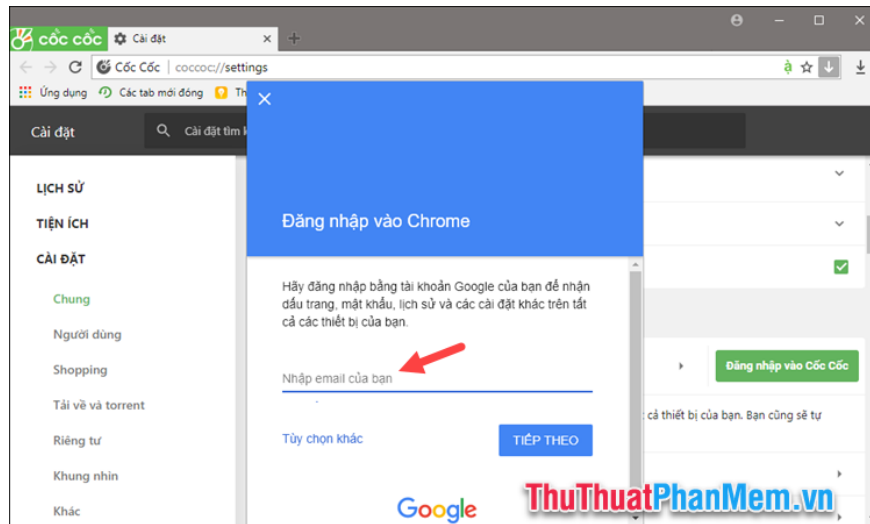

To log into your Google account into Coc Coc browser, go to **Settings**

In the Settings window, scroll down to the People section and click **Log in to Coc Coc**

A new window appears, log in your Google account to finish:

Above is an article on how to backup and recover passwords on Coc Coc, hope you will find the article useful. Good luck!
