3. Phone does not charge or charge slowly, this is how to handle it

## 1. Basic physical buttons and their uses:

Below is the external structure of the iPhone 6, iPhone 6 Plus.

### Power button

Compared to the previous generation of iPhones, the power button of these two new iPhone series is on the right side of the camera edge, not on the top. The power button has the function to turn on, turn off or lock the screen when you have no need to use it. Especially save battery or avoid unintended control effects. Because when the phone screen is locked, the user cannot access the application to manipulate, except listening to music and adjusting the volume.

1. To lock the screen: press the power button next to it.
2. To unlock the screen: press the power button or the Home button, then drag the slider from left to right.
3. To turn off the device: hold down the power button until a slider appears, then drag the slider as directed.
4. To turn on the phone: Hold down the power button until the Apple logo appears.

## Home button

The Home button is used to return to the Home Screen home screen and has some effect:

1. Browse open applications by double-clicking the Home button, then swipe left or right.
2. Call Siri virtual assistant, or turn on Voice Control by pressing and holding the Home button.
3. Use fingerprint sensor instead of traditional password entry with Touch ID.

## Turn on / off the bell

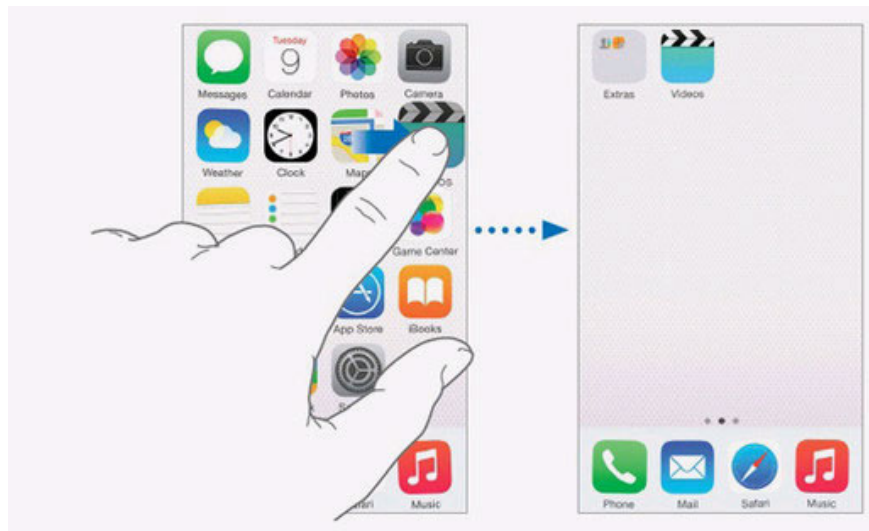

Located at the top left of the camera body, this button works to turn off or turn on the sound. When turned off, the phone does not ring or emit status and other sound effects, although the alarm clock is still ringing.

## 2. Basic operation on iPhone 6, iPhone 6 Plus

The basic operation of iPhone 6 or iPhone 6 Plus is still press, swipe, swipe, zoom. In addition, there are some other actions such as:

### Arrange the main screen

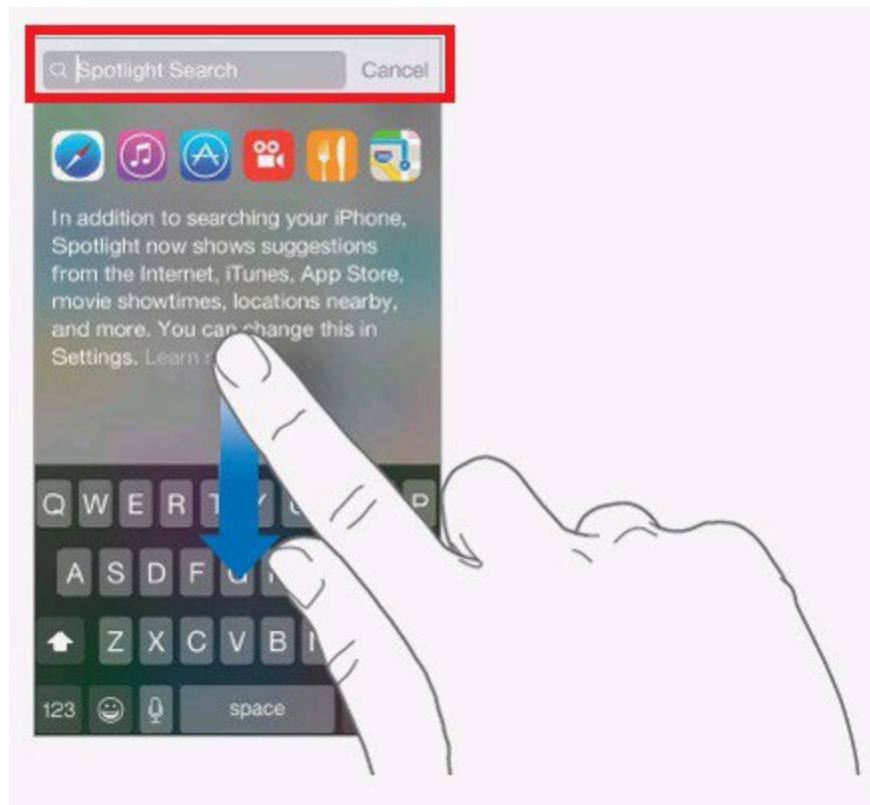

At the Home Screen home screen containing applications, you move an application to another page by holding down the icon when it vibrates, then dragging it to the side of the screen in the direction of the page you want to apply. Press the Home button to save the new arrangement.

If you drag the app icon to the right side of the Home Screen page to the right, the phone will automatically create a new Home Screen page.

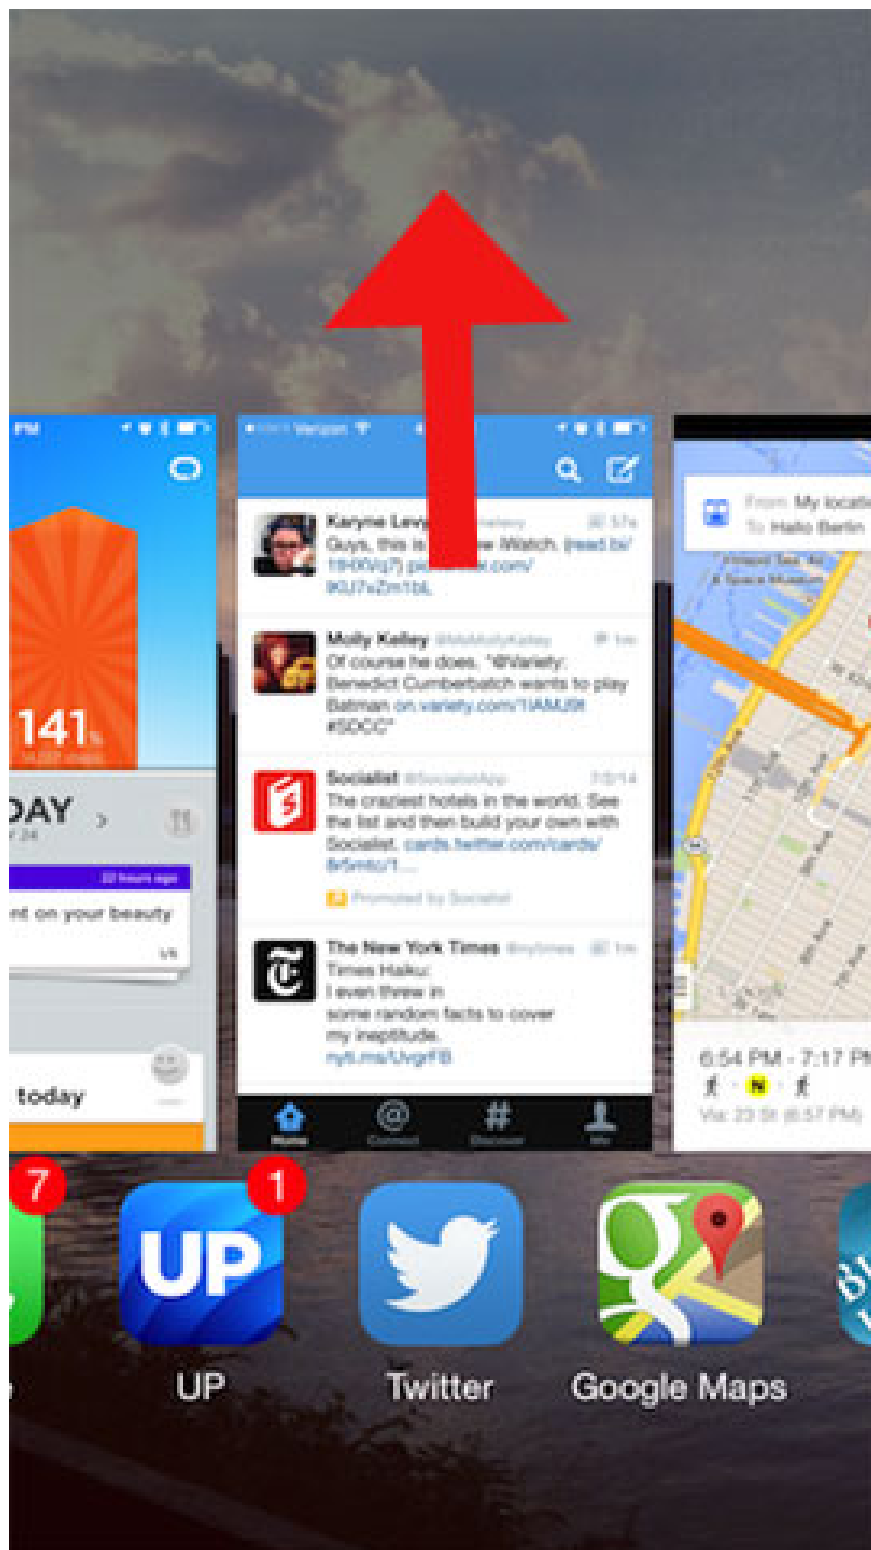

## Search in iPhone with Spotlight

When pressed between the Home Screen main screen, the search bar will appear (red frame) of applications in the computer, or information on the Web and application stores.

## Multi-task management

iPhone 6, iPhone 6 Plus allow multiple applications to run at the same time, so you must also manage multiple tasks. To see a list of all applications running in the background, press the Home button twice, swipe up to turn off the application.

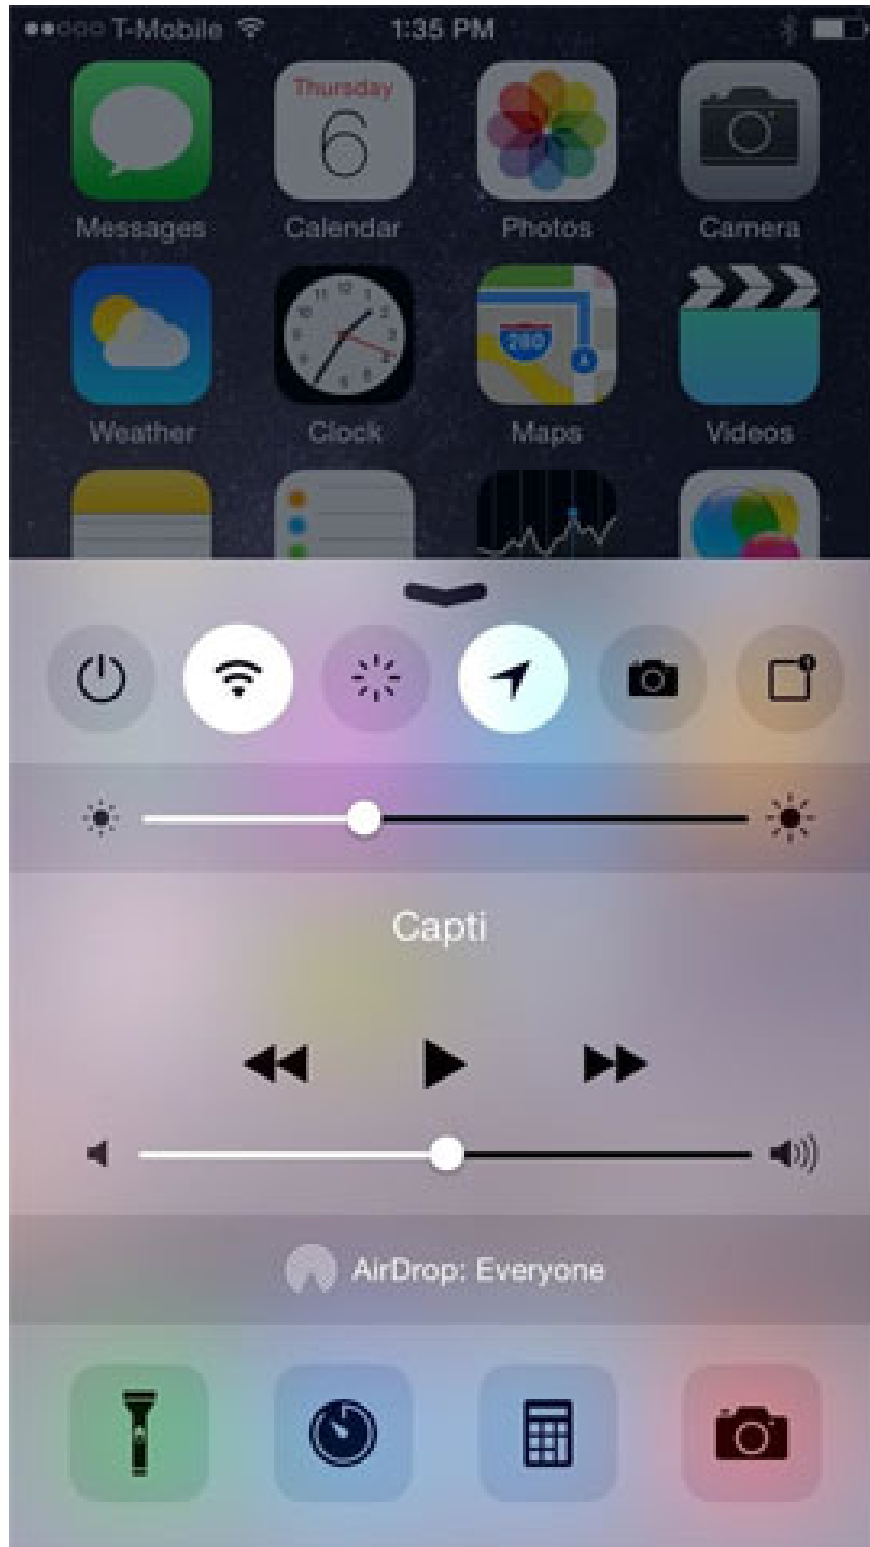

## Open the Control Center control cluster

Control Center is a place to access many utilities including camera, AirDrop (wireless data sharing application), AirPlay (screen sharing application), music player software, WiFi, Bluetooth, on and off bright screen, .

1. To open the Control Center: swipe the screen up.

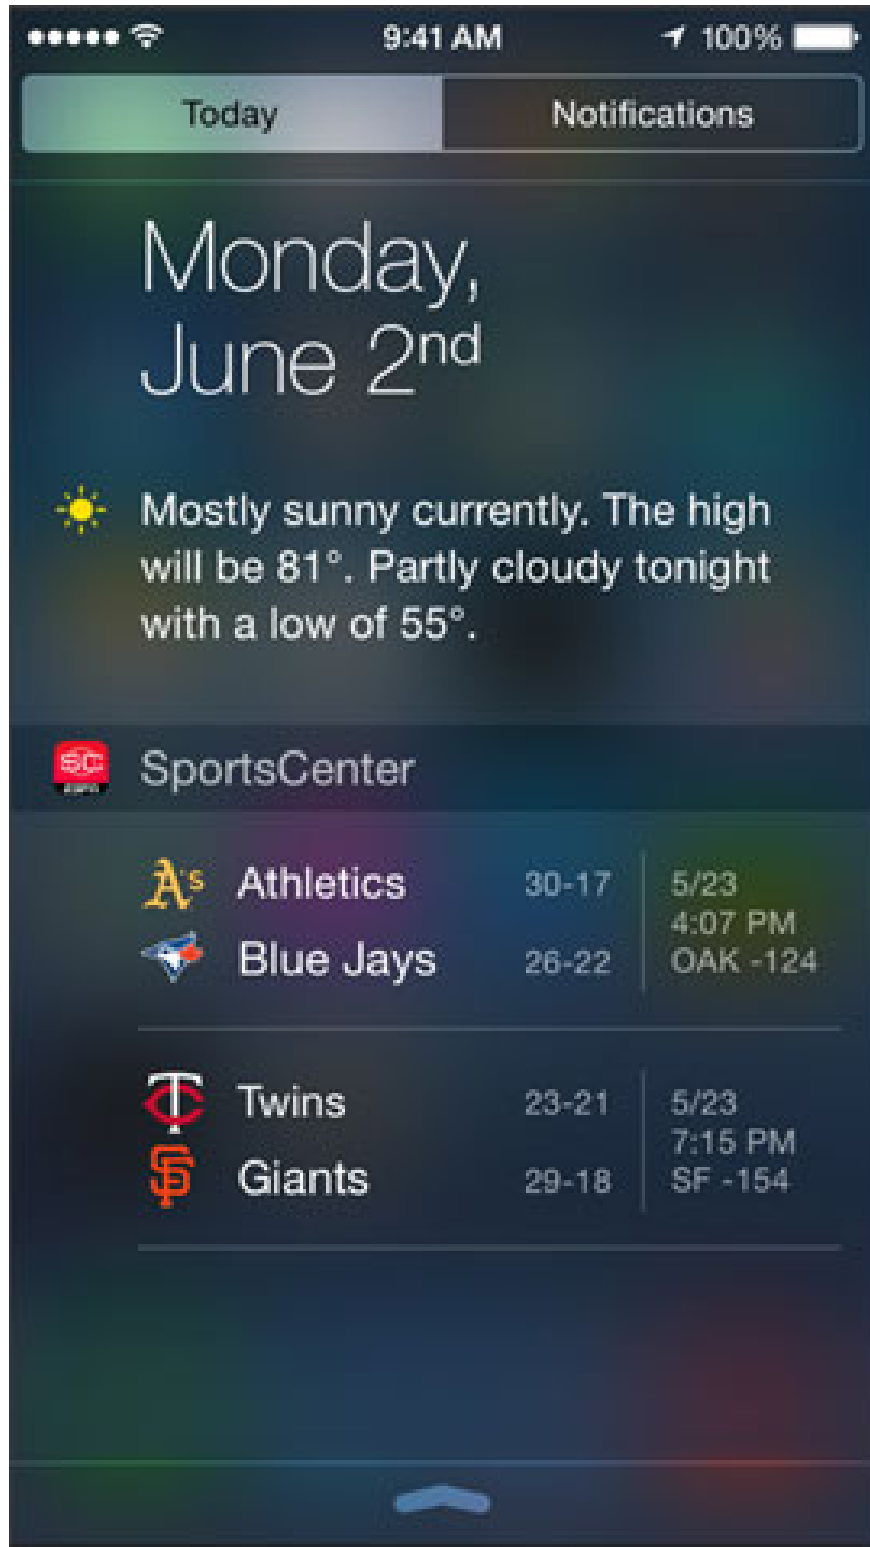

2. To close the Control Center: swipe down, or tap the upper part of the screen, or press the Home button.

**See Notification Center notice board**

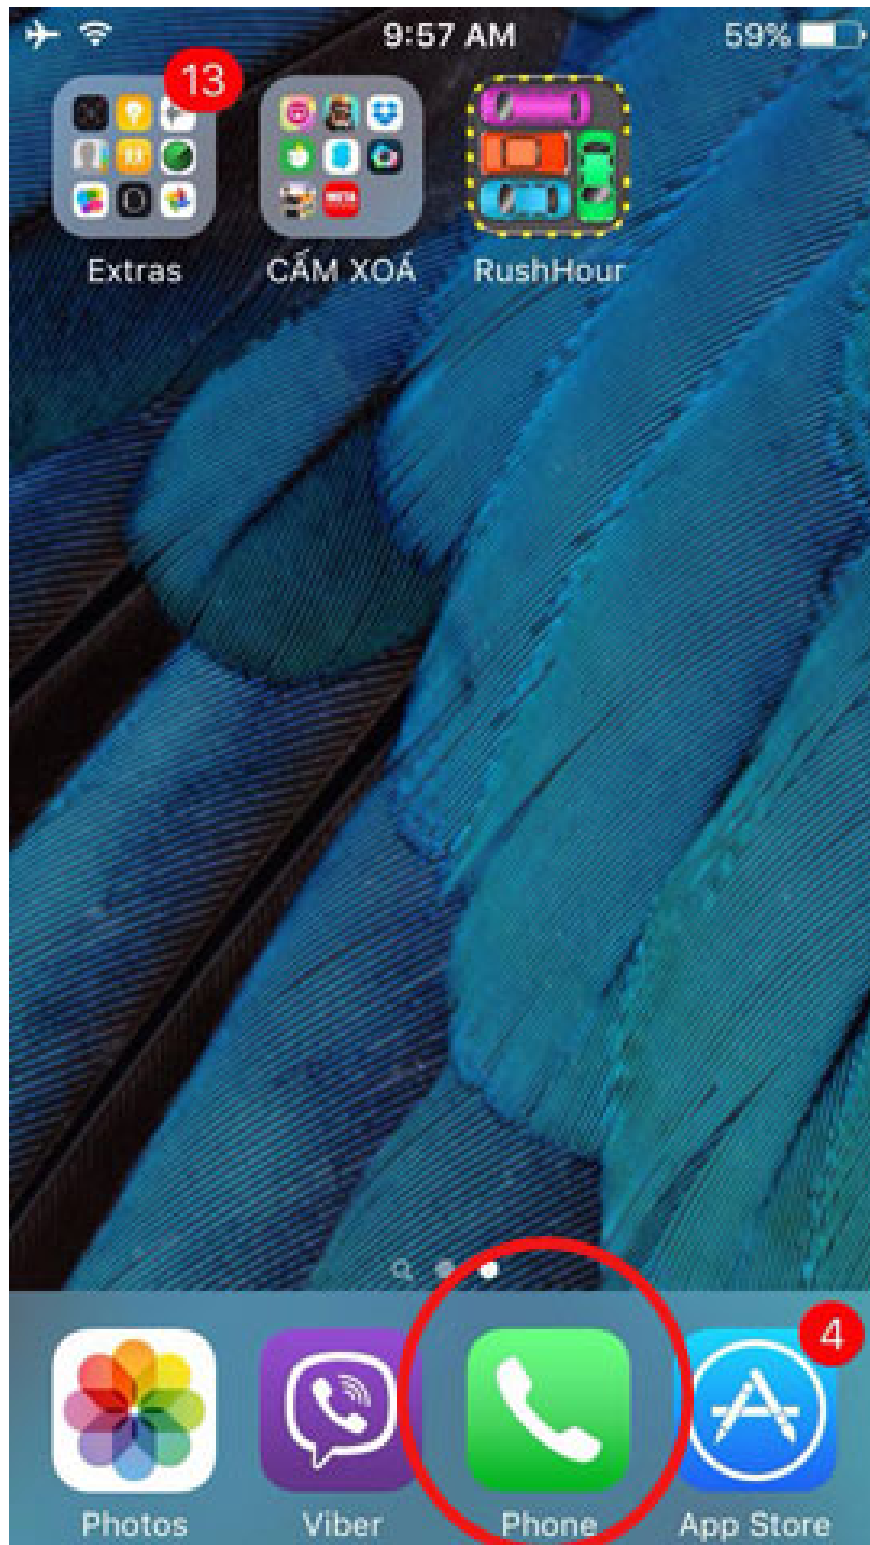

At Notification Center, users can view all new notifications. To update the notification, swipe the screen from the top down.

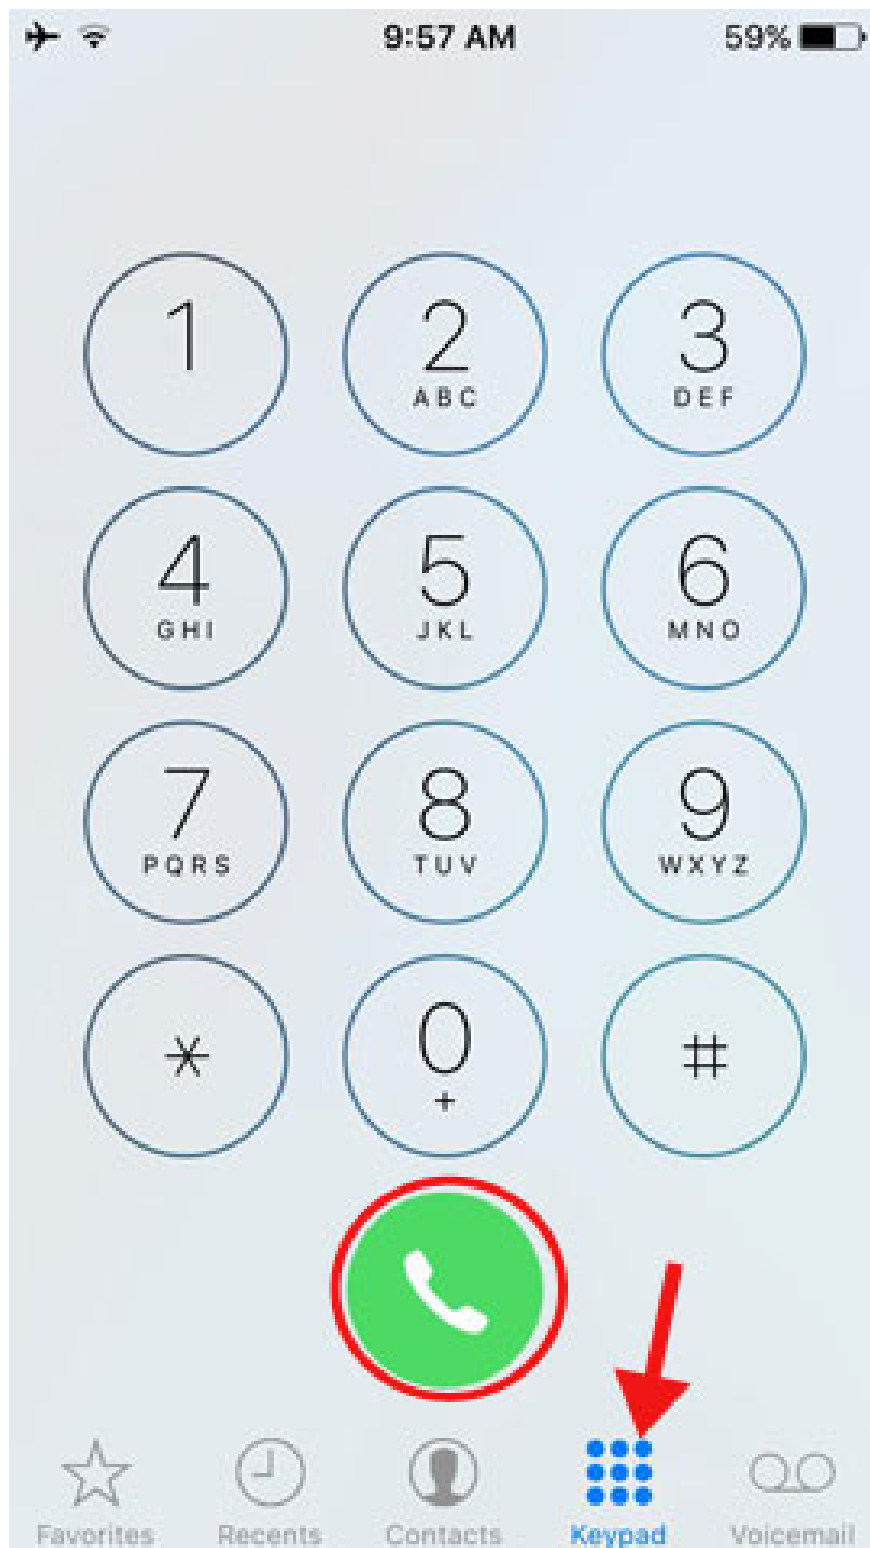

To close the Notification Center, swipe back up or press the Home button.

## Call

Click on the phone icon on the screen, go to the Keypad section to enter the number and press the phone icon to call.

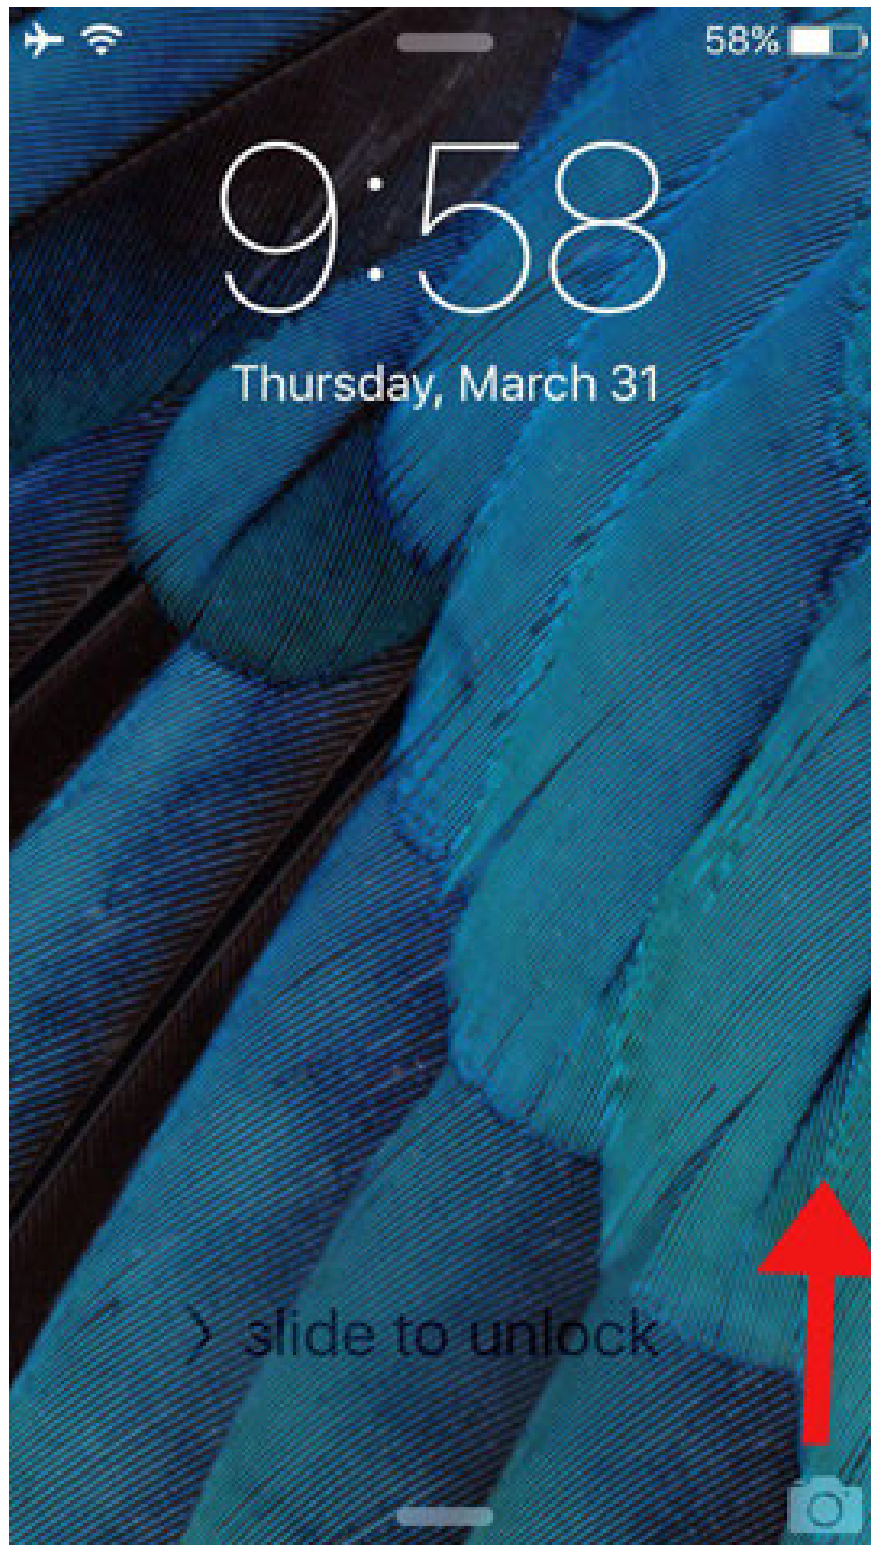

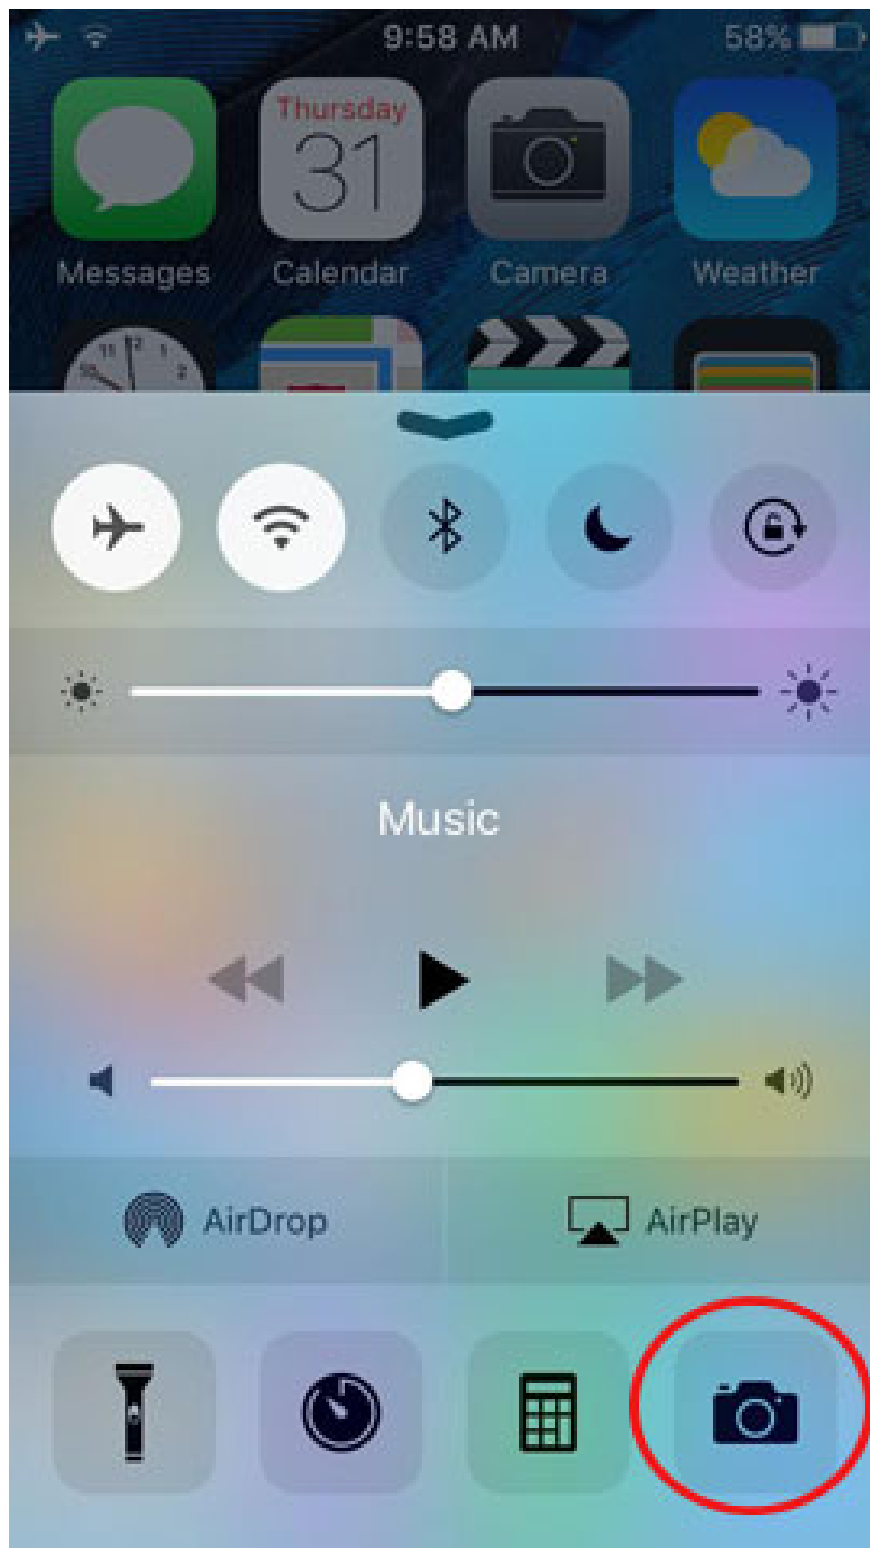

## Use Camera

Camera application of iPhone 6, iPhone 6 Plus brings some functions of iOS 8 as a self-timer. To open the camera, follow the ways:

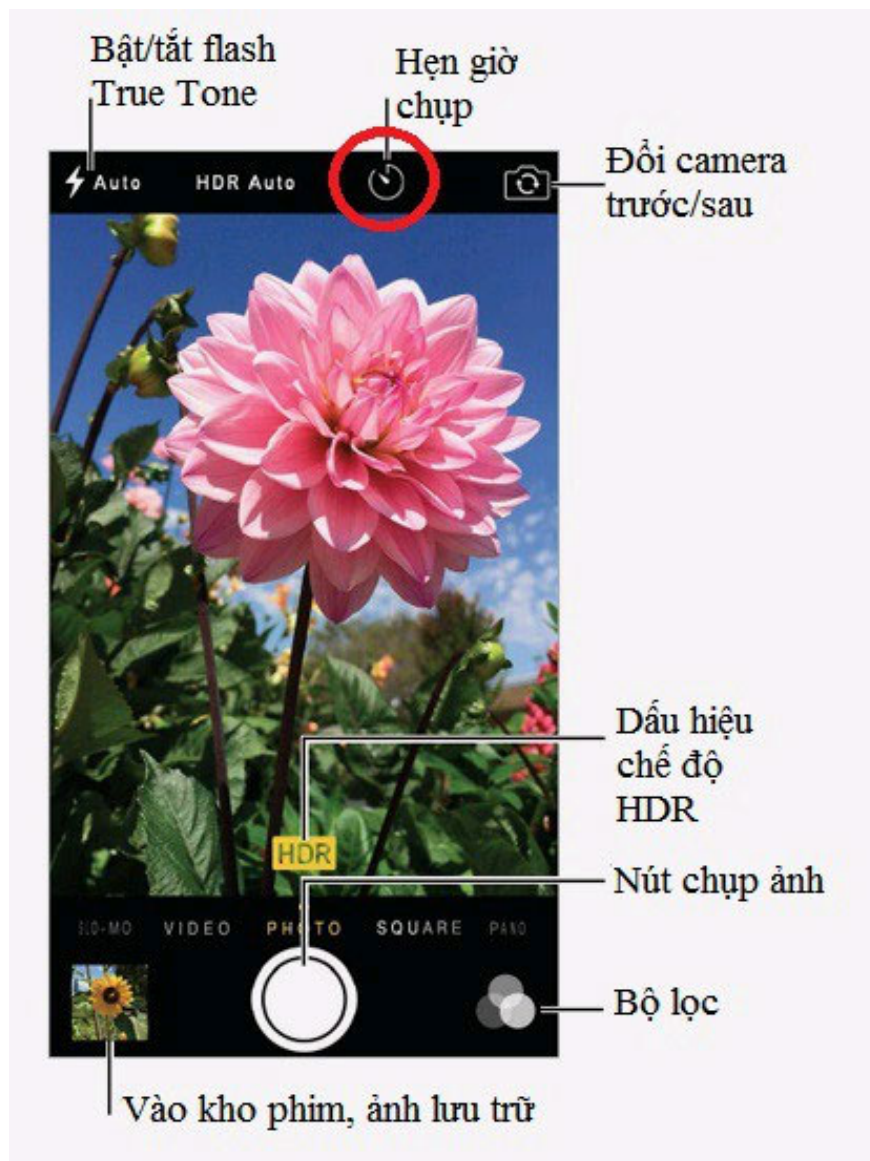

1. Click the camera application on the Home Screen home screen.

2. From Lock Screen lock screen, swipe the camera icon on top.
3. Open Control Center and press the camera icon.

The picture below is the Camera application interface of iPhone 6 and iPhone 6 Plus, including the shooting timer function (red zone) of iOS 8.

Thus, we have introduced you how to use the most basic iPhone 6 and iPhone 6 Plus.
