

# Basic Markdown syntax

There are many reasons to use Markdown, but the biggest reason is due to the convenience of using custom designed syntax to help you save time.

**Markdown** is the markup language created by John Gruber in 2004. Markdown uses a simple and easy-to-understand syntax to mark text, facilitating the conversion from plain text to HTML. Instead of relying on HTML or WYSIWYG editors, Markdown allows you to format text without leaving your hands off the keyboard, which is much more intuitive than HTML.

In addition, Markdown is much shorter and easier to understand, you don't need to know HTML and can use Markdown simply. So why not hesitate to follow the summary of basic syntax to be proficient at using Markdown right now?

1. What is Markdown and why should you learn it today?

## 1. Title - Heading

To create the heading h1, h2, h3 until h6, add the number of # corresponding characters to the beginning of the line. The number # you use corresponds to the title level, a # character is equivalent to h1, 2 characters are equivalent to h2 . For example: to create a level three heading (

), use three # symbols (eg: ### TipsMake.com).

MarkdownHTMLOutput # Heading level 1

# Heading level 1

# Heading level 1

## Heading level 2

## Heading level 2

## Heading level 2

### Heading level 3

### Heading level 3

### Heading level 3

#### Heading level 4

#### Heading level 4

#### Heading level 4

##### Heading level 5

##### Heading level 5

##### Heading level 5

##### Heading level 6

###### Heading level 6

###### Heading level 6

## 2. Paragraph - Paragraph

To create paragraphs, use a blank line to separate the lines of text. You should not indent paragraphs with spaces or tabs.

MarkdownHTMLOutputWebsite TipsMake.com.

Website TipsMake.com.

Learn basic Markdown syntax

### 3. Bold print - Bold

To bold text, add two asterisks or underscores before and after a word or phrase. To bold letters between a word to emphasize, add two asterisks before and after the letters (do not use space).

**Markdown**

**HTML**

**output**

Website **\*\* QTM \*\***. Website **QTM** . Website **QTM** Website **\_\_QTM\_\_**. Website **QTM** . Website **QTM \*\***  
quantrimang **\*\***. Com **quantrimang** .com **quantrimang** .com

### 4. Italic - Italic

To print italic, add an asterisk or an underscore before and after a word or phrase. To print it in the middle of a word to emphasize, add an asterisk before and after the letters (do not use space).

**Markdown**

**HTML**

**output**

Italicized text is the *\* cat's meow \**. Italicized text is the *cat's meow* . Italicized text is the *cat's meow* . Italicized text is the *\_cat's meow\_*. Italicized text is the *cat's meow* . Italicized text is the *cat's meow* . A *\* cat \** meow A *cat* meow A *cat* meow

### 5. Bold and italics

To emphasize text in bold and italics at the same time, add three asterisks or three underscores before and after a word or phrase.

**Markdown**

**HTML**

**output**

?ây text là **\*\*\*** really quan tr?ng **\*\*\***. ?ây text này không **?úng** . ?ây text này không **?úng** . This text is **\_\_\_**really important**\_\_\_**. ?ây text này không **?úng** . ?ây text này không **?úng** . This text is **\_\_** \* really important **\*** **\_\_**. ?ây text này không **?úng** . ?ây text này không **?úng** . This text is **\*\*** **\_** really important **\_** **\*\***. ?ây text này không **?úng** . ?ây text này không **?úng** .

### 6. Quote - Blockquote

To create a blockquote, add a > sign before the paragraph.

```
> TipsMake.com is a social network of science and technology, with open content
wide range of fields such as mobile phones, smart devices, electronics,
computer security .
```

Output is displayed like this:

```
TipsMake.com is a social network of science and technology, with content extending in many areas
such as phones, smart devices, electronics, computer security .
```

## 6.1 Blockquote has many segments

Blockquote can contain multiple segments. Add > to blank lines between paragraphs.

```
> TipsMake.com is a social network of science and technology, with open content
wide range of fields such as mobile phones, smart devices, electronics,
computer security .
>
> To become part of TipsMake.com, please submit articles, cover
Technology experience for the management team.
```

Output is displayed like this:

```
TipsMake.com is a social network of science and technology, with content extending in many areas
such as phones, smart devices, electronics, computer security .
```

```
To become a part of TipsMake.com, please submit your article, experience your technology to the
management team.
```

## 6.2 Nested Blockquote

Blockquote can be caged in another Blockquote. Add a >> in front of the segment you want to nest.

```
> TipsMake.com is a social network for tech followers.
>
>> You can share your posts on the page if you have an account, you
You can view posted articles, view other members' posts and
Search for posts you care about on the page.
```

Output is displayed like this:

```
TipsMake.com is a social network for technology followers.
```

```
You can share your article on the page if you have an account, you can view the posted
article, view other members' posts and search for posts you care about on the page.
```

## 6.3 Blockquote includes other factors

Blockquote may contain other Markdown formatting elements. However, not all elements are usable, so you need to experiment to see which format will work.

```
> ##### Search for articles on TipsMake.com
>
> - Enter ** keyword ** or ** article name ** in the search box above
* TipsMake.com * as usual and press *** Enter ***.
> - To search for specific keywords, you can give it
Go to the '', for example 'create boot usb', 'install Windows 7'.
> - If you want to search on Google, you can search by: keyword +
site: TipsMake.com. For example: * clicking the network site: quantrimang.com
>
> Have a fun and rewarding moment on ** TipsMake.com **!
```

Output is displayed like this:

### **Search for articles on TipsMake.com**

1. Enter a **keyword** or **article name** in the search box on *TipsMake.com* as usual and press ***Enter***.
2. To search for specific keywords, you can include them in "", for example 'create boot usb', 'install Windows 7'.
3. If you want to search on Google, you can search by: keyword + site: TipsMake.com. For example, *how to click the network site: quantrimang.com*

Wish you have fun and rewarding moments on **TipsMake.com** !

## **7. List**

You can use Markdown to format the items into lists in order or not.

### **7.1 Ordered list**

To create an ordered list, you only need to add the numbers followed by a period before the content you want to create. Numbers do not necessarily have to be 1 2 3 4 times in turn, but you should start with a number.

#### **Markdown**

#### **HTML**

#### **output**

1. First item
2. Second item
3. Third item
4. Fourth item

## 7.2 Unordered list

To format a list with bullet points in Markdown, you use the dash character `-`, asterisk `*` or plus sign `+` and a space before the content you want to create, use two extra spaces ahead if you want back into a level.

### Markdown

4. Fourth item

### 7.3 Lists include other factors

To add another element that still maintains the continuity of the list, we move the element inside with **four spaces** or a **tab**, for example, as follows.

#### Add paragraphs

\* Technology

\* Program

Share programming experience, programming some languages.

\* Technology Village

Output is displayed like this:

1. Technology

2. Program

Share programming experience, programming some languages.

3. Technology Village

#### Add Blockquote

\* Technology

\* Program

> Share programming experience, programming some languages.

\* Technology Village

Output displayed:

1. Technology

## 2. Program

Share programming experience, programming some languages.

## 3. Technology Village

### **Add a code**

1. Open the file.
2. Find the following code on line 21:

```
Kim TRA
```

3. Update the title that matches the name of your website.

Output displayed:

1. Open the file.
2. Find the following code on line 21:

```
Test
```

3. Update the title to match the name of your website.

## **8. Code**

To denote a word or phrase in the form of code, put it in the ``` sign.

At the command prompt, type ``nano``. At the command prompt, type

```
nano
```

. At the prompt command, type

```
nano
```

```
.
```

### **Block of code**

The code is presented by adding four spaces at the beginning of each line:

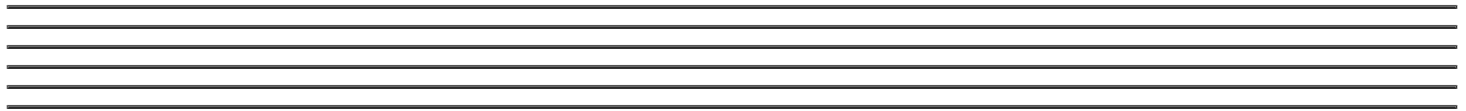

Output displayed:

## **9. Horizontal rule - Horizontal rule**

To create a horizontal line, use three `***` asterisks, hyphens `---` or underscores `___` on the same line.

```
***
* * *
---
- - -
___
- - -
```

Result:

## 10. Links - Link

A link is automatically created with a simple `,` `>` hook pair around the link like this:

`http://google.com`

Or more sophisticated by placing the link text in brackets (for example: `[TipsMake.com]`) and attaching a URL in parentheses (eg `(https://quantrimang.com)`).

`My favorite website is [TipsMake.com] (https://quantrimang.com).`

Result:

My favorite website is [TipsMake.com](https://quantrimang.com).

### 10.1 Add a title to the link

In addition, you can add a title for the link that appears as a tooltip when the user hovers over the link. To add a title, place it in parentheses after the URL.

`My favorite website is [TipsMake.com] (https://quantrimang.com "Website Leading technology ").`

My favorite website is [TipsMake.com](https://quantrimang.com "Website Leading technology").

### 10.2 URLs and email addresses

To quickly turn the URL or email address into a link, place it in curly braces.

Result:

https://quantrimang.com  
info@meta.vn

## 10.3 Formatting links

To emphasize links, add a star before and after the link format cluster.

```
My favorite website is ** [TipsMake.com] (https://quantrimang.com "Website  
Leading technology "). **
```

```
The categories you usually follow are * [Technology Village] (https://quantrimang.com  
"Technology Village Category"). *
```

Result:

My favorite website is **TipsMake.com** .

The category that is often tracked is *the Technology Village* .

## 11. Photos

To add images in markdown, you add characters ! first, then write alt text in square brackets [ ] and image URL in parentheses ( ) .

```
! [The best thing to hold onto in life is each other.!] (/ Photos / image /  
2019/05 / wedding-1.jpg "Wedding - Save the date")
```

Result:

### Insert link into image

After having the image above, you want to add a link when clicking on the image

To add a link to the image in Markdown, you place the entire image declaration as the step above in square brackets [ ] and add the link you need in parentheses ( ) next.

```
[! [The best thing to hold onto in life is each other.!] (/ Photos / image / 2019/05 / wedding-1.jpg "Wedding - Save the date")] (https://quantamang.com/)
```

There are many reasons to use Markdown, but the biggest reason is due to the convenience of using custom designed syntax to help you save time, so remembering the Markdown syntax will be extremely That's good.

Hope this article is useful to you!

You finished reading the article "**Basic Markdown syntax**" edited by the [TipsMake](#) team. We hope this article has provided you with many useful tech tips and tricks. You can search for similar articles on tips and guides. Thank you for reading and for following us regularly.
