Have you been tired of personal blogs with a long life span, problems with maintenance, updates and upgrades? Today, TipsMake.com will introduce to you blog creation tool - Tumblr completely free .

Whether you are an individual, organization, or business that needs to promote, share your latest products widely to the entire user community and the world, advice for you in time. This is to create your own website or personal blog. In particular, creating blogs is simpler and easier, but depending on the blogging system you choose to use, it is 'cumbersome' respectively, not flexible in some respects. And Tumblr was born with a new and different purpose. Tumblr focuses primarily on what is most important, outstanding of users, very simple control and management mechanisms, such as post photos, comments, captions . Let's shake hands with too Blog creation with Tumblr for free.

Begin

Path: <http://www.tumblr.com/>

The account registration process is very simple, just provide the username, password and desired URL for the blog, and your blog address will be in *your_blogname.tumblr.com* format. This address can be changed later, click **Sign up and Start Posting** when done:

See 30 reasons why you'll love Tumblr →

Email address

Password

URL (you can change this at any time)

[Sign up and start posting!](#)

The system will then display a confirmation information table, asking the user to enter the Capatcha character string to make sure it is not a bot. Enter the correct text string and press the button **I'm human!**

 stop spam.
read books.

[I'm human!](#)

So it's done, very simple, with just 2 clicks you have the basic framework of a blog that needs to have:

Select each corresponding icon in the menu bar including: photo, quote, link, chat, audio, video .:

A set of editing and editing tools is very simple and easy to use. Let's start by posting with **Create Post** :

Add a Text Post

Title *(optional)*

My first Tumblr Post

Post + Upload photo

B *I* ABC | HTML

Just trying to learn my way around Tumblr...

Uploading images is similar, click the **Choose File** button then point to the image to be downloaded, add a title if necessary, or instead of a direct path of the image, or even take photos from the device User's webcam:

Upload a Photo

2945610492...47a8_o.jpg JPEG, GIF, PNG or BMP. Max size: 10 MB

[Use a URL instead](#)

Caption *(optional)*

B *I* ABC | HTML

Awesome picture of an ant carrying a leaf

[Set a click-through link](#)

Especially one of Tumblr's most convenient functions is **Post Link** , which helps users to share titles, good articles on the Internet as quickly and easily as possible:

Add a Link

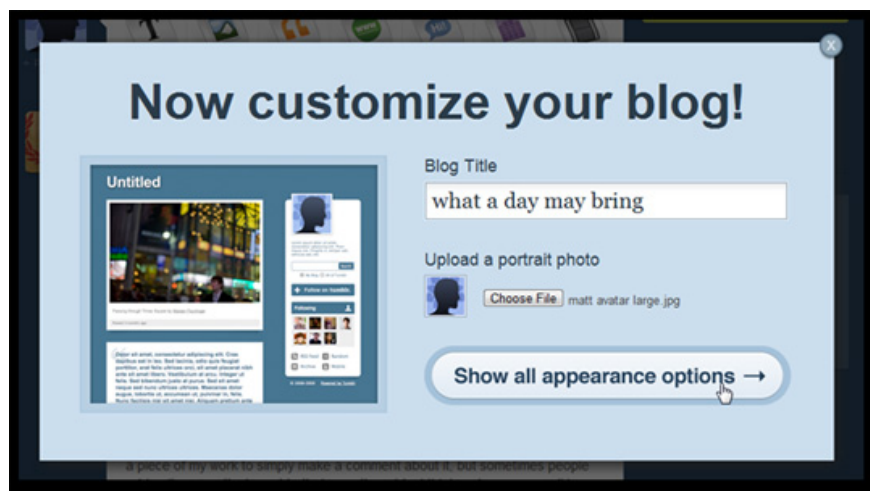

Title *(optional)*

URL

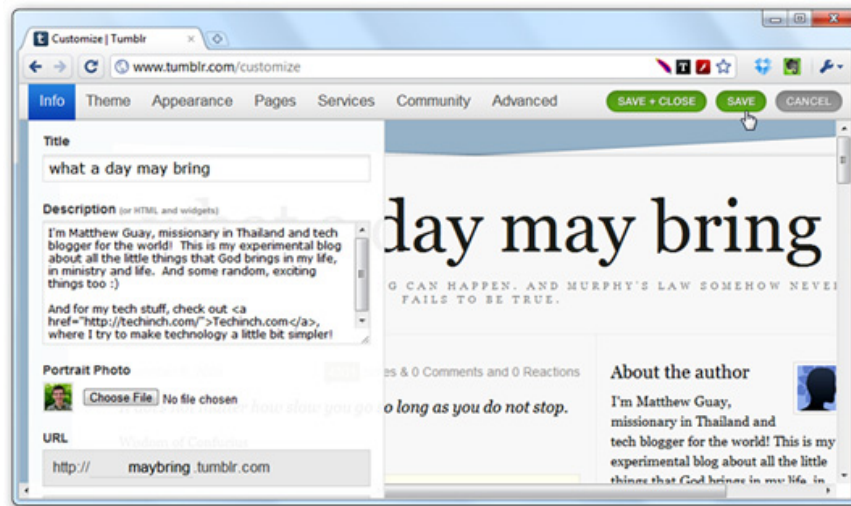

Add a description

Manage and customize blogs quickly

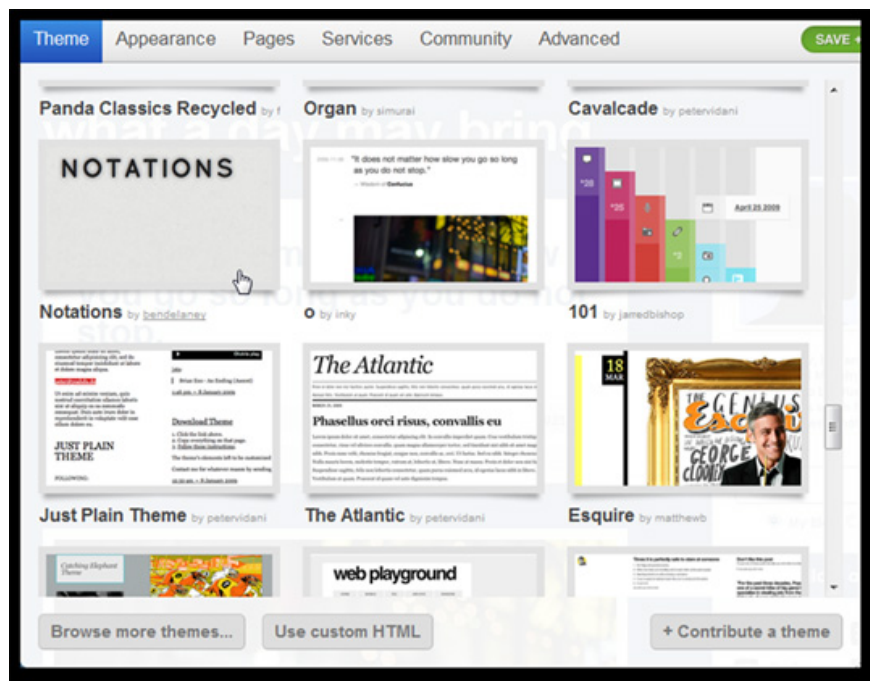

Once you have created a post, Tumblr will prompt you to adjust the interface. Create title, avatar, artwork . Click **Show all appearance options** to display all the remaining options:

Here, you can change the title of the article, brief description, theme and many other components. After changing, click **Save** (in the upper right corner) to save changes:

Tumblr offers many themes that are very nice and beautiful, suitable for the personality and style of users, including free and premium versions. Select any theme mode and can preview right at the blog:

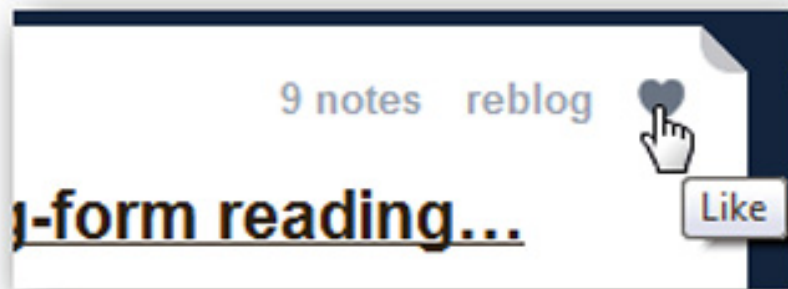

Some other features of Tumblr

On Tumblr's main control panel, you can see some other features under normal working buttons. By default, you will see the first post of Tumblr team:

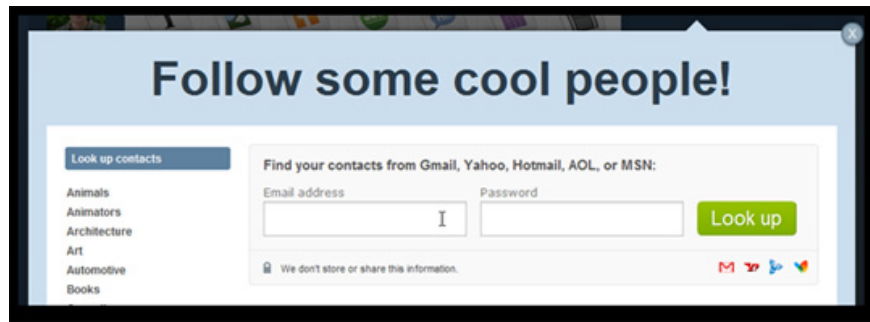

Select the heart icon to list your favorite posts, or notes to see if someone likes this article:

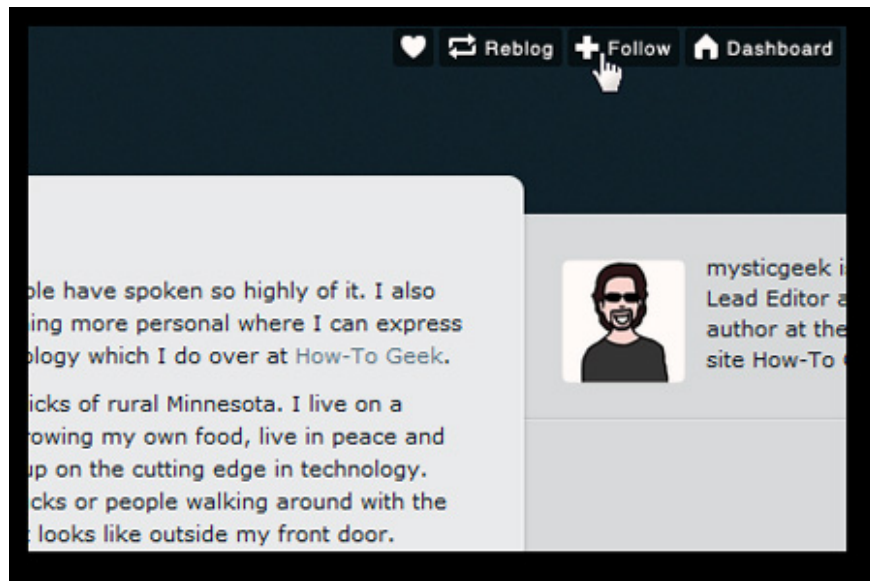

If you want to review old posts, just scroll down, Tumblr will automatically download:

After the basic steps to complete a complete article, Tumblr will ask users to expand the scope of introducing and promoting these articles to friends and partners on other social services or networks:

Every time you or someone reads an article from Tumblr, pay attention to the buttons on the top right. Click **Follow** to see the most recent posts on Tumblr:

Or if you really like the article, click on the Reblog link, then there will be a window where you can point to the path on the Tumblr blog, add a comment or illustration to the **Description** field if you want:

Reblog Link as ...

Title *(optional)*

URL

Description *(optional)*

B *I* ABC | ☰ ☷ ☹ | 🌐 🔗 🔄 | 📄 HTML

Great article on software development, but what struck me as I read it was how applicable it is to everything we do. So often, the |

If one of your Tumblr blogs has just added an article when you are in the main control panel, you will immediately see an update next to the Tumblr logo. Refresh again to see the post just posted:
