

Beams of photos about the natural habitat of foods around us

Take a look at the photos of the natural habitats of the foods around us below!

Surely very few of us understand how farmers harvest apples and potatoes? However, in fact there are many different fruits and vegetables than what we imagine about them. It seems, some of us do not understand how diverse foods are available at supermarket stalls developed in the natural environment? On the **Bright Side** page, some images have been collected to help you learn more about how they grow. Take a look at the photos of **the natural habitats of the foods around us** below!
