

# Beautiful iPhone 12 Pro concept with a square body and new LiDAR sensor

For those of you who can't wait until Apple releases a new iPhone later this year.

ConceptsiPhone website recently posted a video of the iPhone 12 Pro concept that is considered to be the most beautiful ever, and it is so realistic that when you first look at it, we think it is really the product of the marketing department itself. Apple's.

The concept video shows many of the most anticipated features on the iPhone 2020 lineup, including the iPhone 4-inspired body, two new colors, and the LiDAR sensor that Apple recently equipped for the new iPad Pro. eyes last week.

Apple is expected to announce the iPhone 12 and iPhone 12 Pro at the fall event, which usually takes place in September each year. Recent rumors have confirmed the launch date of the new product line could be pushed back several months due to supply chain and economic issues caused by the COVID-19 pandemic.

## iPhone 12 concept

The new features on the iPhone 12 Pro are likely to be a notch-free display, A14 processor, LiDAR sensor on the back, support for 5G mobile network, and possibly two-way charging, a feature that has been removed at the last minute on iPhone 11 Pro.

ConceptsiPhone has added some features that fans hope to see, such as 25W super fast charging, USB-C port, and 1TB internal memory option. Apple may launch 4 new iPhone models this year. Two of them will be good devices, not all the features as high-end models; the two successors of the iPhone 11 Pro and iPhone 11 Pro Max will be equipped with all the new technologies that Apple is expected to introduce.
