

Beautiful photography tips on Samsung Galaxy A8

With some photography tips on the Samsung Galaxy A8, we'll have unique artistic selfie shots.

Samsung Galaxy A8 is also Samsung's high-end product line and is equipped with dual cameras, increasing the quality of photography compared to the previous product line. The device has a 16 megapixel and 8 megapixel camera in the front, providing sharp pictures, self-portrait photos of professional fonts. And to increase the art of each picture, readers can apply some photography tips on Galaxy A8 in the article below.

1. How to take a snapshot on Samsung Galaxy J7 Pro
2. How to take photos of Samsung Galaxy Note 7 screen?
3. How to take a photo in Portrait and Portrait Lighting mode on iPhone 7 Plus and 8 Plus

Guide to taking beautiful photos on Galaxy A8

1. Customize the level of font deletion

1. How to delete photo wallpaper with Patch: Smart Portrait Editor iPhone
2. 5 notes to help capture beautiful and virtual fonts

The Galaxy A8's front dual camera can take photos of 'take a selfie' professionally erase fonts, similar to Galaxy Note 8. Users can adjust the level of font deletion after taking photos.

You access **the Collection** , select the image you want to remove the font and then click **Adjust the background blur** and **drag the slider** below, choose the level of the background to delete the background.

2. Touch the screen to take a picture

Most phones now feature phone photography via the volume up button. But it is not always possible to use this feature, or the hard-to-press camera button. Instead we can activate the touch mode on the screen to take a picture.

First, go to Settings, select Shooting method, then activate Touch screen mode or Hold palm. So when taking a photo, just press the screen to take a picture and it's done.

3. Convert the camera with gestures

To quickly switch between shooting modes on Galaxy A8, users can swipe up and down to switch between front or rear cameras, swipe right to open shooting modes, swipe left to activate the effect photographic response.

4. Take wide-angle selfie photos

1. How to capture and post Panorama 360-degree photos on Facebook

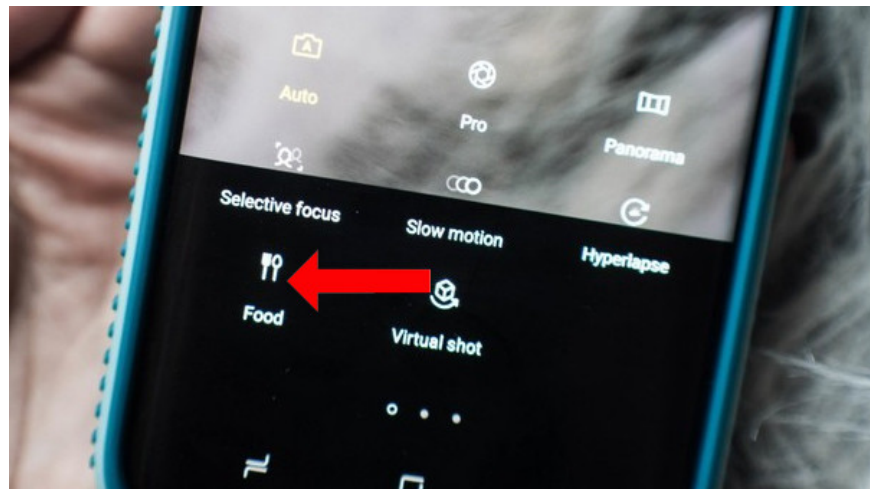

This feature will apply in case of taking a front camera with a large group. If you use a normal selfie mode, it is difficult to get the whole scene. Just **turn on Wide selfie mode** and you're done. This mode will capture 3

photos together. That means you turn the phone to one side and turn it back to the other to get the picture. Shooting is quite similar to Panorama shooting.

5. Take photos with food mode

This diet will create a much more artistic and sparkling picture. If so, we can also capture other objects to increase the color of the photo, taking more complete details in the image. Swipe your right hand to select the food mode and adjust the focus area.

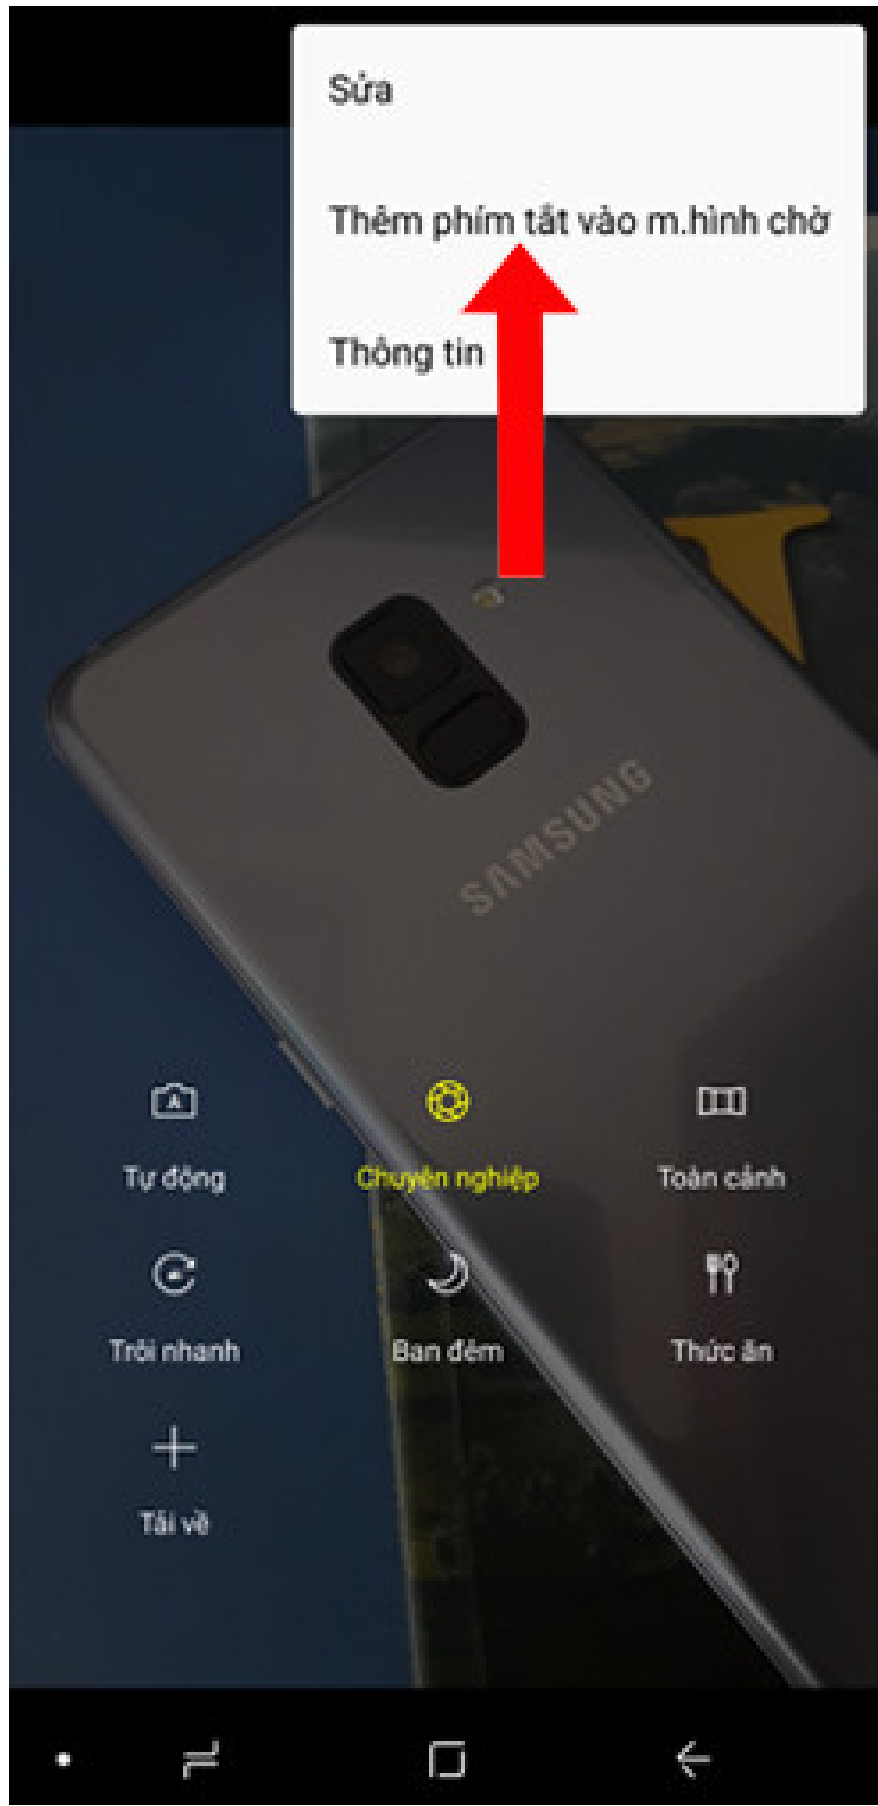

6. Select favorite mode from the screen

This feature helps you access your favorite shooting modes right from the screen, via shortcuts. Swipe left to open the modes and then click **the 3 dots icon** in the top right corner. Click **Add shortcut to standby screen** then select the mode you want to use.
