

Beautiful wooden living room partitions help the house more spacious and luxurious

Partition is a convenient solution for families who want spacious space but still separate areas. Wooden partitions are both beautiful and luxurious as the first choice of many homeowners to decorate the living room space of the family.

Partition is a convenient solution for families who want spacious space but still separate areas. Wooden partitions are both beautiful and luxurious as the first choice of many homeowners to decorate the living room space of the family.

Types of wooden partitions

Natural wooden partition

The type of wood commonly used to make partitions in the house is peach wood, oak, kh? mu . because of its long life, beautiful natural grain. Wooden shelf is an ideal place for you to place items such as memorabilia, pottery, small vases, wine bottles . to decorate the living room space.

Note: Natural wooden walls are often prone to warping, so it is important to choose wood that is thoroughly dried.

Industrial wooden bulkhead

Industrial wood partitions with diverse patterns, thin but tough wood panels and are cheaper than natural wooden partitions.

Industrial wooden partitions with beautiful patterns also serve as decorations, creating accents for the house.

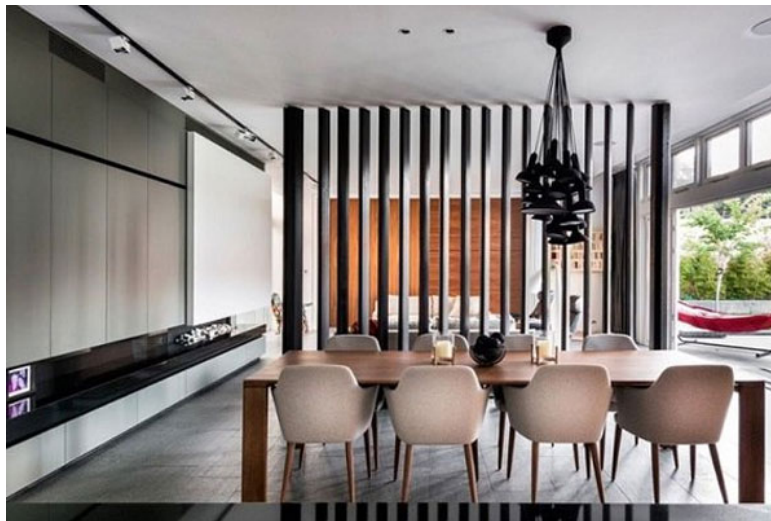

CNC wooden bulkhead

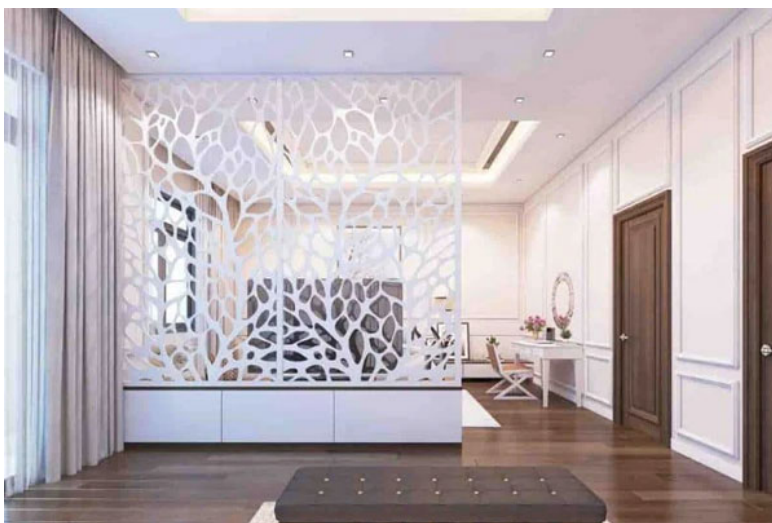

CNC wooden partition is machined by CNC machine for durable color over time, very durable without worrying about mold and moisture.
