

Beautify the Log on screen for Windows 7 and XP

Software to change the Log on login screen of Windows 7 and Windows XP, to bring a new atmosphere to your familiar computer.

When exposed and used a lot with computers, we may get bored with what is so familiar, so in this article, I will show you some software to **change the login screen. Log on Windows 7 and Windows XP** , to bring a new atmosphere to your familiar computer.

WINDOWS 7 LOGON BACKGROUND CHANGER

As the name implies, this software allows you to **change the wallpaper on the Log on screen** , but **only works on Windows 7** .

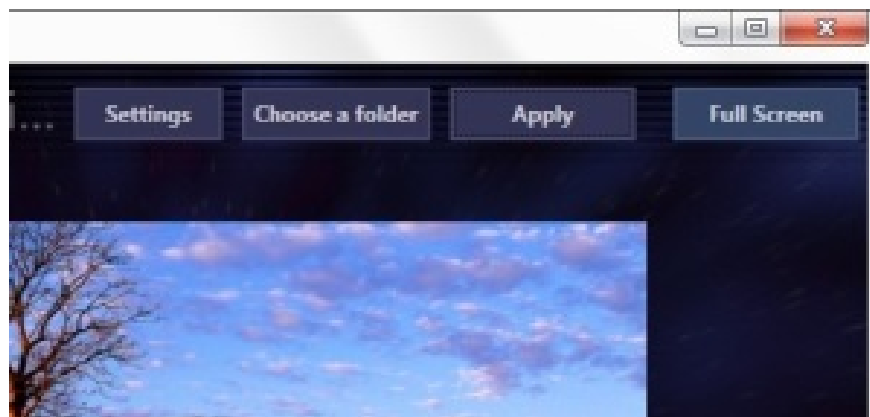

First, Link download HERE :

http://www.mediafire.com/download/zeb3q3h22nre1kj/Win7LogonBackgroundChanger_1_5_2.zip

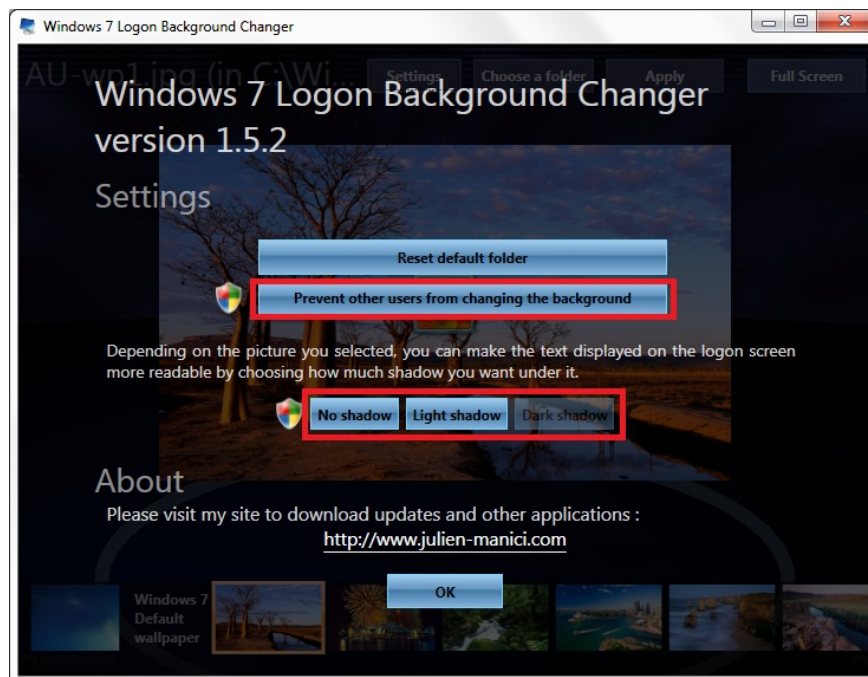

This is a portable software, you do not need to install, after downloading, just extract and run the file **Win7LogonBackgroundChanger.exe** or if you want to install on your computer, run the file **Win7LogonBackgroundChangerSetup.msi**

To change the wallpaper, select the images below, the first picture is the default login screen of Windows 7, in case you have changed another wallpaper but want to return to the default, you will select the image this. The middle of the screen is where you will preview the wallpaper you have just selected.

You also have some options in the **Settings** section at the top of the screen.

Prevent other users from changing the background : this feature is for computers with multiple user accounts, it will not allow other accounts to change your wallpaper.

Below are 3 other options: **No Shadow** , **Light shadow** and **Dark shadow** , it allows creating shadow effects under text on logon screen. **No shadow** means there will be no shadows, **Light shadows** are white shadows, and **Dark shadows** are black shadows, so you should choose an effect that is suitable for the background to make the text more visible and easier to see. Click **OK** to accept.

In addition to the backgrounds available in the software, you can manually put the images you want to enter by clicking **Choose a folder** , browse to the folder containing images, the software will list the images contained there for you.

Once completed, click **Apply**, wait for the software to perform. Once completed, you can log out to see the results.

Note: If in the process of using the software, you get the **Unable to write to folder C: windowssystem32oobeinfobackgrounds** error, simply go to **C: windows / system32 / oobeinfo** and rename the **backgrounds** folder to **backgrounds2**.

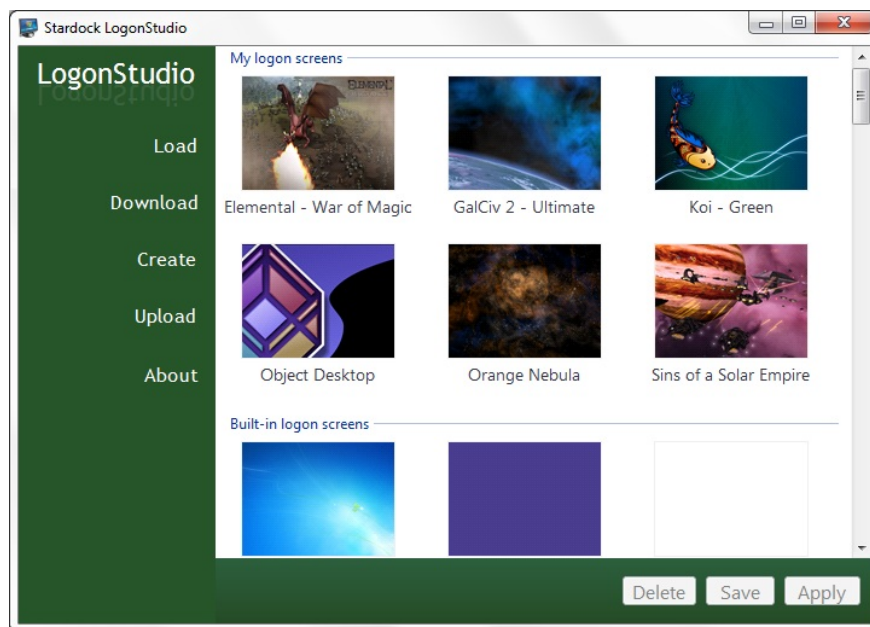

LOGON STUDIO XP

This software is similar to Windows 7 logon background changer but supports both Windows XP, Windows Vista and Windows 7.

First, download and install it **HERE**. : http://storage.stardock.com/files/LogonStudio_public.exe

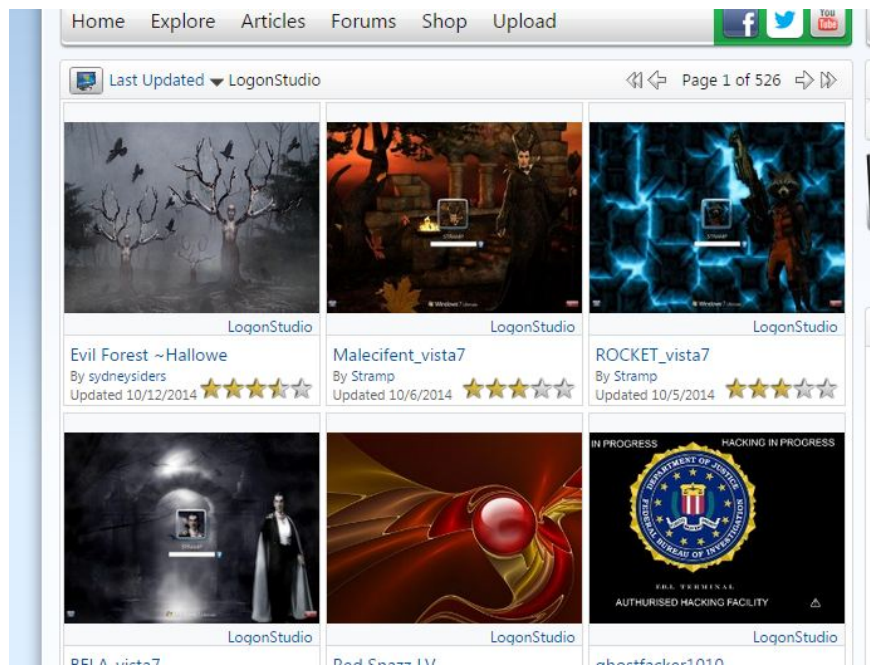

After downloading and extracting a **.logonvista** or **.logonxp** file, run the file directly to install it, or use the **Load** function on the main screen of the software to install it.

Start the software, we have the following interface:

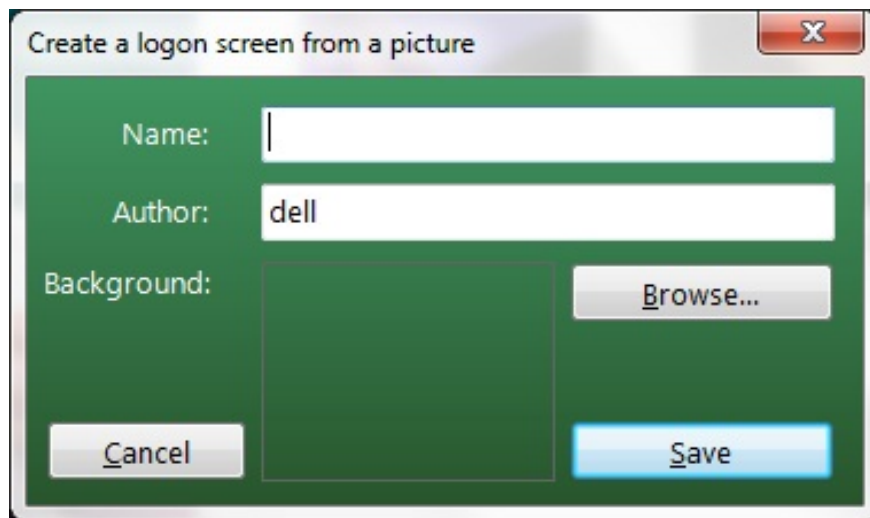

Want to choose any photo, just click on it and click **Apply** .

You can download more wallpapers from the developer's homepage by clicking **Download** , you will be directed to the homepage, select a picture like that and download to your computer.

If you want, you can still use your own image for the log on screen by clicking **Create**, enter a name and click **Browse** to select the desired image file, and then click **Save** .

Your picture will appear on the main screen, select and press **Apply** . Then the software will automatically Log out for you to see.

Good luck!
