

Best Buy sells a MacBook Pro laptop labeled Core i7 chip

Best Buy is introducing a MacBook Pro laptop selling site with Intel's Core i7 chip logo. Is Best Buy trying to tell us something?

Best Buy is introducing a MacBook Pro laptop selling site with Intel's Core i7 chip logo. Is Best Buy trying to tell us something?

Although this is clearly unofficial information, Best Buy may want to foretell Apple upcoming products. By 18h30 on March 7, 2010 (local time), this website still exists.

Product enthusiasts Apple is patiently waiting for the company to update its MacBook Pro notebook line with Intel's fastest, largest Core i processor processors (including Core i5 and Core i7 chips, released last month). 1/2010 at CES 2010).

The Core i5 and Core i7 mobile chips are manufactured using Intel's advanced 32nm process, which outperforms the older Core 2 Duo processors still being used by Apple in their notebooks of the MacBook and MacBook Pro.

Some rivals such as Hewlett-Packard and Dell are offering a lot of laptops based on Core i5 and i7 processors.
