

Best web browser to replace Safari for iPhone

Although Safari is the default browser on iOS and so far it has been perfected no less than Chrome or Firefox when handling web tasks. However, not all users like Safari.

If you are looking for browsers with functionality other than Safari then these are the top alternatives.

1. Ghostery

If you're more important to security than design or speed when using the browser, Ghostery is the perfect choice. This app provides fast, private, anti-ad, and tracking browsing experience. Integrated with many features to increase your anonymity and privacy.

Like Chrome, it also delivers curated news and the most visited websites from reputable media. It also comes with its own search engine powered by DuckDuckGo along with a password manager.

You can know if you are being tracked when you visit a website. The built-in ad blocker will quickly remove any cluttered ads for a more pleasant fast browsing experience.

Other features include Ghost mode for private browsing, without saving history. Plus it protects you from phishing websites, stolen information and passwords.

Advantages:

1. Powerful anonymous browsing
2. Allows you to protect your WI-FI connection from advertisers
3. Ad blocking, tracking
4. Private password manager
5. Own search engine

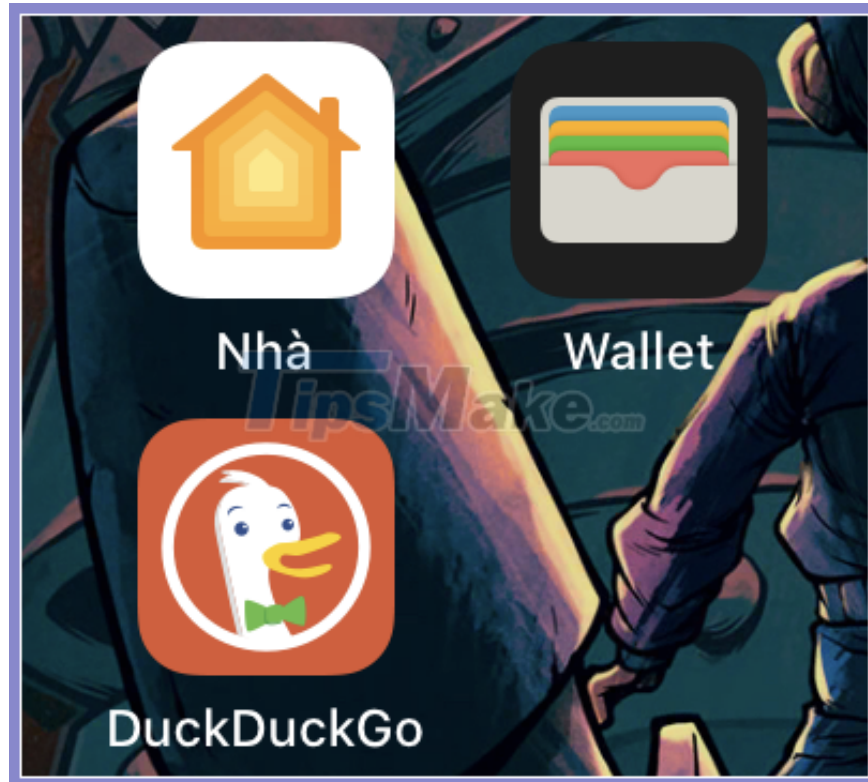

Defect:

1. The design is not really perfect
2. Not as fast as other browsers
3. Takes up a lot of memory space

2. DuckDuckGo

DuckDuckGo became popular because it was a search engine with the potential to compete with Google. Currently DuckDuckGo has transformed into a browser for mobile devices Android and iOS. So, when using this browser, you will be protected while surfing the web and still know what content has been blocked.

Every page you visit in your browser is categorized based on the extent of the exploitation of personal data. This feature makes DuckDuckGo a great Safari alternative when you are always protected, doing nothing.

DuckDuckGo blocks cookies that track your identity. It enforces encrypted HTTPS connections and scans websites to rate their security capabilities.

When using a search engine, you will not have to switch to 1, 2, 3, . like Google listings to see more search results. DuckDuckGo provides search results with an infinite scrolling page, just keep scrolling and new results will continue to appear.

When you complete a browsing session, DuckDuckGo allows you to delete your tabs and data automatically or manually with just one tap. Alternatively, if you are inactive in the browser, you can set a timer to automatically clear history.

Advantages:

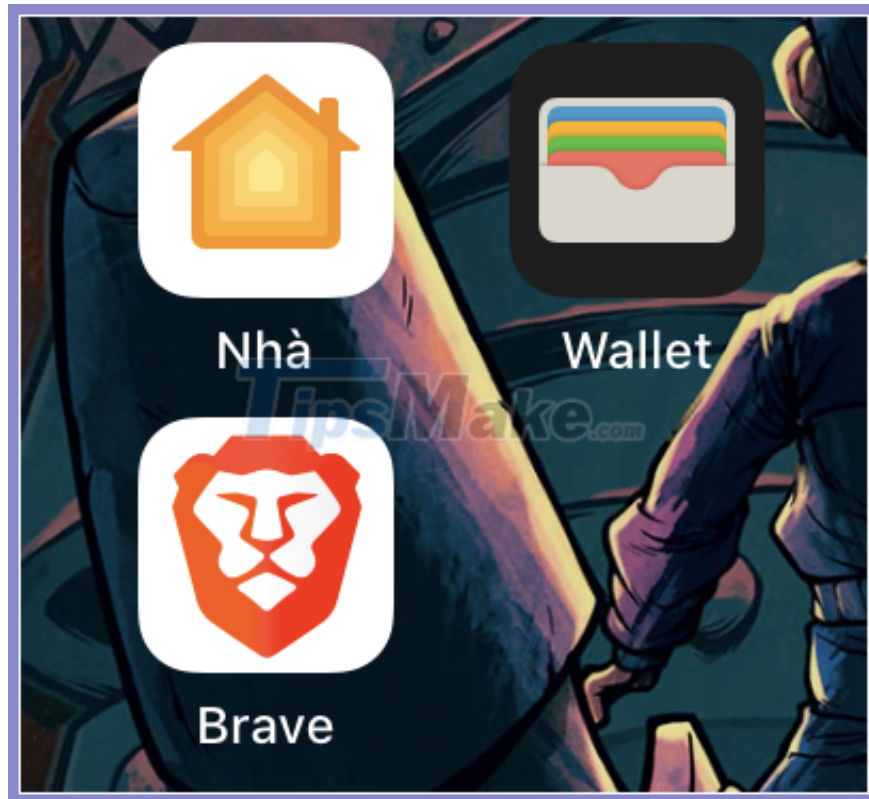

1. Easy to use
2. User privacy protection
3. Rate your site's crawlability
4. The site's privacy policy rating
5. Block tracking cookies
6. The search results page lasted infinitely

Defect:

1. Do not save search history
2. Search results are sometimes irrelevant

3. Brave Browser

This is another safe Safari alternative to iOS that offers extreme privacy and lightning-fast browsing speeds. It blocks all pop-ups and tracking programs, including ads, helping you browse the web much faster.

Brave Browser is easy and quick to navigate including: 'create new tab' button, pop-up blocker, third-party ad blocker, script blocker, incognito tabs, cookie blocker and scrollbar at top.

The browser also allows you to securely sync your bookmarks and will force HTTPS encryption. Reducing page load times improves performance and optimization, and reduces battery and data consumption.

Advantages:

1. Simple and powerful
2. Block malicious websites
3. Protect your privacy

Defect:

1. No site reviews
2. Ad blocking sometimes causes loss of page content.
