

# Better Download Manager in Chrome with Downloadr

When you click on a file download link in Google Chrome, the download progress bar will be displayed just below the browser interface. It displays information about the download process including the remaining time, speed, .. and you can hide it manually. In general, this progress bar is quite cumbersome and overwhelms a bit of the display space of the browser.

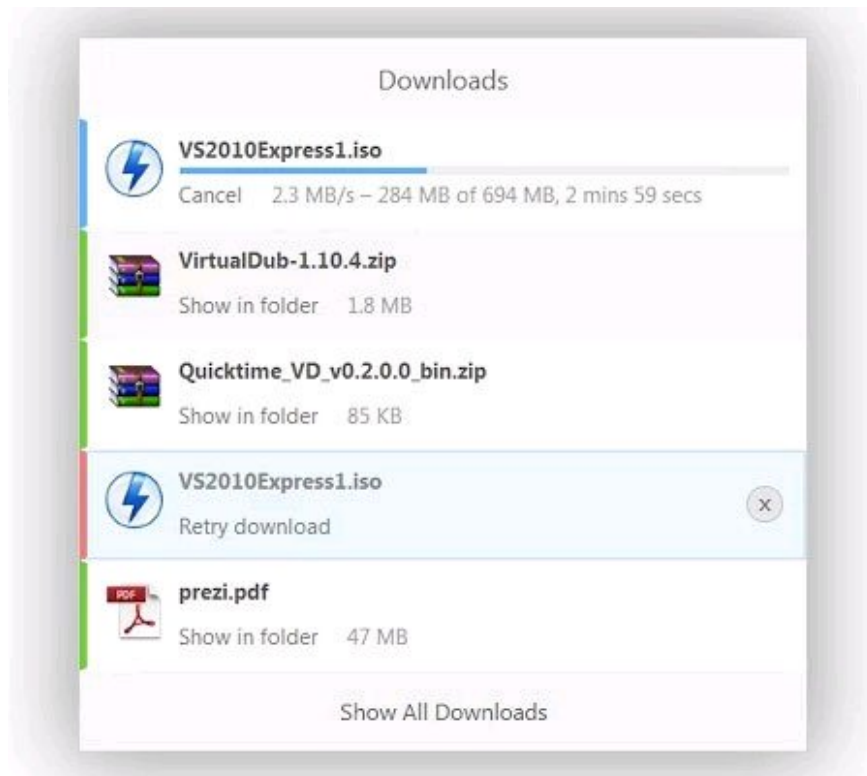

**When you click on a file download link in Google Chrome, the download progress bar will be displayed just below the browser interface. It displays information about the download process including the remaining time, speed, . and you can hide it manually. In general, this progress bar is quite cumbersome and overwhelms a bit of the display space of the browser.**

**Downloadr** is an extension for **Chrome** . After installation, it will display the icon next to Chrome's URL bar. In terms of functionality, it completely replaces Chrome's default download bar, and narrows it into a window in more neat and professional.

When clicking on the Downloadr icon, a download manager window will appear below in quite nice. And you can easily browse, download and pause downloads, similar to the default download manager page.

It can be said Downloadr is a convenient utility and should be a feature that Google needs to bring into Chrome if possible. Readers can download Downloadr and install for Google Chrome **here**.
