Betternet features

Unlimited VPN with clean interface

Betternet is a great choice for Microsoft Windows computers. Also available for Mac devices, this program allows you to access multiple servers in different geographic locations. While free VPN and Hotspot Shield require you to sign up, Betternet does not. You don't even have to worry about your IP or web activity being tracked.

Betternet VPN doesn't have any data limits. This means you get access to an unlimited VPN without paying a penny. However, the premium version of this tool has more features and no ads.

How is the interface?

Betternet is a fairly simple application with lots of features. The user-friendly interface does not require any technical knowledge. If you are just looking for a proxy server to establish an anonymous connection, you should be able to complete the task within seconds. Just download the application, install the program and click **Connect** in the main interface.

After you establish the connection, this VPN service even gives you detailed information about the connection status. You will be able to check your geography, speed and other details. The Windows version of this tool comes with a free trial, so you can test out different features on your computer.

How fast is Betternet?

Among the free VPN downloads, Betternet is considered to be one of the fastest. It features '**Optimal Location**', which automatically connects IP to the nearest and fastest server. In the premium version, you can even manually select a specific server in the desired geographic location.

Betternet has high-speed servers in many locations around the world. Unfortunately, free users can only use US-based servers. Most of them, though, can provide you with a fast and stable connection.

Can you use Betternet with torrent?

Users can choose Betternet because it supports streaming and torrent sites. The program does not restrict P2P connection and allows you to download a wide variety of content from the Internet. Whether you are using the free or paid version of the software, you can conveniently download movies, music, pictures, etc. .

The free version will have a 500MB download limit for torrent, while the premium version will offer unlimited bandwidth, even on torrent sites.

How secure is Betternet?

Betternet comes with premium 256-bit encryption to keep user data secure and secure. The development team uses a secure '**Catapult Hydra Protocol**' to keep your device protected. This protocol has become quite popular among developers over the past few years, offering faster speeds and better performance.

Betternet also uses **Forward Secrecy** to ensure another layer of security. And if in doubt, the program even occasionally changes the encryption keys to anticipate security concerns.

Also, when using Betternet to connect to multiple servers, you don't have to worry about DNS leaks. A premium subscription adds protection to keep some of your data safe even if your encryption keys are compromised.

Customer support

When compared to IPVanish and NordVPN, Betternet provides fast, helpful, reliable customer support. Regardless of the subscription, you can easily request assistance on the program's official website. Plus, if you're a premium user, you have 24/7 access to the email support team. So far, the company doesn't offer live chat or call support.

The official website also offers a variety of resources and information, including a help center and blog.

Where can you use Betternet?

Betternet is available for multiple operating systems and platforms, including Windows, Mac, Android, and iOS.

Each version of the tool comes with many features. User-friendly interface ensures a hassle-free experience.

Betternet is also available as an extension for Google Chrome. If you want to use VPN for multiple devices at the same time, then you will probably get a premium version of Betternet, which supports connections for up to 6 devices.

Safe and anonymous Internet browsing

Compared to other options, Betternet provides a simpler and cleaner interface. This tool effectively hides your IP address and allows you to surf the web with complete privacy. Since it uses premium encryption, the anonymity isn't compromised, and you can access all types of content with ease.

If you are new to the world of VPN apps, downloading Betternet VPN will be a great choice. It's easy to use, free and allows you to stay connected for an unlimited amount of time. While the free version has fewer features, it's enough for the average user who wants to browse the Internet anonymously.
