

Bill Gates is building his own city

Belmont will create a visionary community with infrastructure and communication structures using the latest technology.

Bill Gates is planning to build a 'smart city' with a population of about 200,000 people.

Belmont Partners, an investment company run by Microsoft co-founder, has invested \$ 80 million in this project, which is said to be 'visionary' and using 'modern' technology. The company purchased 24,800 hectares of land for construction of schools, offices and shopping areas.

Gates' future city was built in southwest Arizona and is called Belmont, with about 80,000 households and a population of about 182,000.

Bill Gates started hacking and founding Microsoft, how did he become the richest person in the world?

'Belmont will create a visionary community with infrastructure and communication structures using the latest technology, designed with high-speed digital networks, data centers, and manufacturing technologies. Belmont Partners, distribution, auto vehicles and automated logistic community, 'Belmont Partners said.

Smart city applies modern technology

'With an area and population close to Tempe, Arizona, Belmont will turn a pristine place into a modern city with flexible infrastructure'. It is unknown when this project will start, but Bill Gates' vision makes us remember Google's intention to create Quayside, a high-tech community in Toronto.

15 Bill Gates predictions since 1999 have come true

Quayside will also have flexible buildings that can be completely and quickly revised, Google even tries to "cool down" the weather so people spend more time outside.

The city is described as 'the world's first community built from the Internet' and Google hopes to turn it into a 'landmark for the 21st century'.
