Recently, Microsoft has introduced the latest extension into the Windows Store store - the **Bitwarden password manager**. Currently, this utility is available on most computer, mobile and web browsers.

Bitwarden makes it easy to store your login and password information conveniently and synchronize them on all your devices.

This utility is capable of storing all user logins in an encrypted vault. Because it is encrypted, only you will have access to those data. Data will be secured by AES-256 bit encryption and PBKDF2 SHA-256.
