

Bkav 2014 software launched soon with Anti Leak technology

Although the new Bkav 2013 package appeared in May, the next version was released soon. Network security company Bkav claims this is the only antivirus program in the world that can automatically detect eavesdropping software.

Although the new Bkav 2013 package appeared in May, the next version was released soon. Network security company Bkav claims this is the only antivirus program in the world that can automatically detect eavesdropping software.

Anti Leak technology helps users' systems to expose information to today's dangerous spyware, such as software that sneaks through the webcam, eavesdrop on microphones and software that controls computers remotely.

Compared to the old version launched half a year ago, in addition to the flat-designed interface according to the current general trend, Bkav 2014 is also equipped with 3 new technologies, Safe Payment (accessing electronic payment websites in quarantine environment, eliminating the risk of stolen bank account information, credit cards), Safe Download (helps to avoid downloading malicious code from the Internet) and Anti Fake AV (intelligent scanning and removal of software) kill fake viruses without updating the identification pattern).

Bkav's new product series was released this morning in Hanoi.

Vu Ngoc Son, Bkav's vice president of research and development, also shared that computer virus situation is becoming more and more worrisome when in the past year alone, the company's system has collected up to 273 million new viruses.

Besides Bkav 2014, users of free versions of Bkav Home and Bkav Home Plus will be upgraded to Bkav Home 2014 and Bkav Home Plus 2014. This is the first time this company has released a free version at the same time with the brand name. trade.

Meanwhile, Bkav Mobile Security 2014 for smartphones is equipped with Smart Filter smart filtering technology, which is claimed to be able to block spam messages with a 100% success rate, and Smart Scan technology can be played. Currently all viruses automatically send messages to paid numbers and viruses steal accounts. In addition, a completely new product for mobile devices is also introduced as Safe Box with the ability to gather sensitive information such as messages, contacts, call logs, photos, videos . " Safe box "to prevent disclosure of personal data.
