

Black Shark 2 Pro officially launched: Snapdragon 855+, 12GB RAM, AnTuTu 500610 points

The Black Shark 2 Pro - an upgraded version of Black Shark 2, was officially launched with many improvements in both design and performance.

The Black Shark 2 Pro - an upgraded version of Black Shark 2, was officially launched with many improvements in both design and performance. After ROG Phone II, this is the second smartphone in the world to have Snapdragon 855+ chip, Qualcomm's most powerful processor chip.

The device is equipped with 12GB RAM and uses UFS 3.0 storage standard. Black Shark 2 Pro's AnTuTu score is 500610 points, the test is done right at the launch event.

In terms of design, the back of the machine is changed slightly to help users feel more comfortable when holding for a long time. The device has integrated fingerprint sensor in the screen.

Black Shark 2 Pro is equipped with 6.39 inch AMOLED FHD + screen. The touch delay of the device is reduced to only 34.7ms and the telephoto camera is raised to 13MP.

In terms of software, Black Shark 2 Pro comes pre-installed with Android 9 Pie, and Black Space Dock 4.0 game mode.

Configuration parameters of Black Shark 2 Pro

Qualcomm Snapdragon 855 Plus processor chip 6.39-inch AMOLED at 1080 x 2340 pixel display, touch delay 34.7ms RAM 12GB 128 / 256GB storage capacity 20MP front camera f / 2.0 48MP rear camera f / 1.75 + 13MP f / 2.2 Liquid Cooling 4,000mAh Battery, 27W fast-charging

Black Shark 2 Pro has two versions with 5 colors of 12GB / 128GB, price of 2999CNY (about VND10.1 million) and 12 / 256GB of VND3999CNY (VND13.5 million), will be officially released on the 2nd 8 in China.
