

Black Shark 3, the first phone with 16GB RAM

Black Shark 3 will be equipped with up to 16GB of RAM. If this is true, then Black Shark 3 is the smartphone with the most RAM capacity ever.

Not long ago, a smartphone with the code SHARK KLE-AO supposedly Black Shark 3 appeared on the certification website of the Ministry of Industry and Information Technology (China).

Although not disclosing information about the specifications, the certification documents show that Black Shark 3 will support 5G network connectivity.

Information about Xiaomi's Black Shark 3 model has been certified in China.

Other leaked information also revealed that Black Shark 3 will be equipped with up to 16GB of RAM, higher than many laptops today. If this is true, then Black Shark 3 is the smartphone with the most RAM capacity ever. However, 16GB of RAM is probably too much for a smartphone.

Black Shark 3 is Xiaomi's next low-cost gaming smartphone, to be launched in the near future. Black Shark 3 is expected to inherit the success of its predecessor, the Black Shark 2 Pro, launched in July 2019.

The technology hopes that Black Shark 3 will be strongly upgraded on hardware by Xiaomi including Snapdragon 865 processor, 120Hz scanning screen, larger battery capacity and rear camera system with many improvements.

Earlier, another leaked information suggested that Xiaomi's cheap Black Shark 3 gaming smartphone might be equipped with a battery capacity of up to 4700mAh.

1. Realme 5s officially launched, 5000mAh battery, 48MP rear camera, starting price of 3.2 million
2. Realme C2s launched, dual camera, 4,000mAh battery, 3GB RAM, price nearly 1 million
