

Black Shark Helo - the world's first smartphone with 10GB of RAM, playing AMOLED games, priced at only 14 million

Xiaomi has officially launched the BlackShark Helo smartphone, an upgrade of the Black Shark smartphone, with OLED screen, 10GB RAM.

Xiaomi has officially launched the Black Shark Helo smartphone, an upgrade of smartphone Black Shark, with OLED screen, 10GB RAM.

Black Shark Helo is equipped with OLED display to increase display quality and help save power. Black Shark Helo screen size is 6.01 inches, full HD resolution and no rabbit ears.

Black Shark Helo is still equipped with Iris image processor from Pixelworks to improve image quality. In addition, it is added the ability to improve the image quality from SDR to HDR.

Xiaomi's new product still uses Snapdragon 845 processor, optional RAM from 6GB to up to 10GB, 128GB to 256GB internal memory, front speakers and hard keys to enable performance priority mode (performance mode). Battery of 4000mAh capacity machine. On the edge of the Black Shark there is an additional LED strip. Black Shark Helo is the first phone in the world with 10GB RAM capacity.

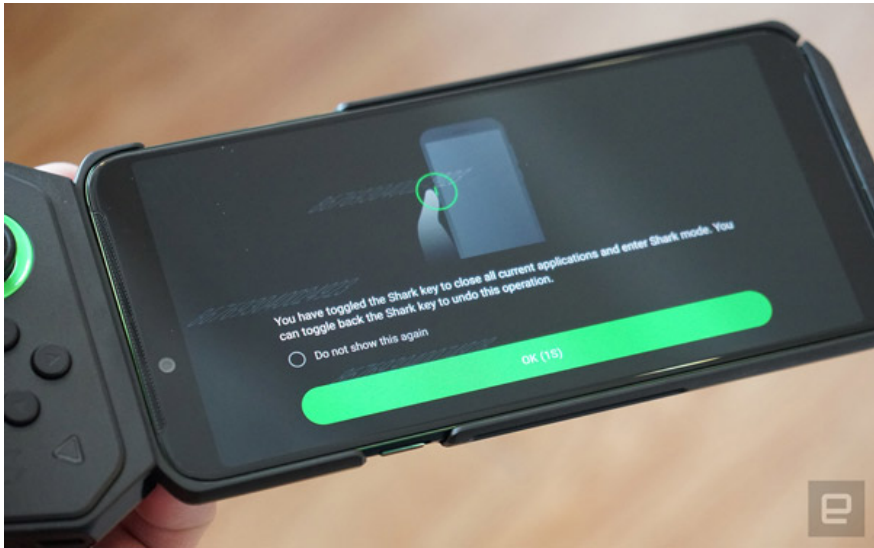

In particular, Black Shark Helo also has a new and exciting feature called Gamer Studio, which allows users to fine tune the processor, screen, touch, network and parameters for each game.

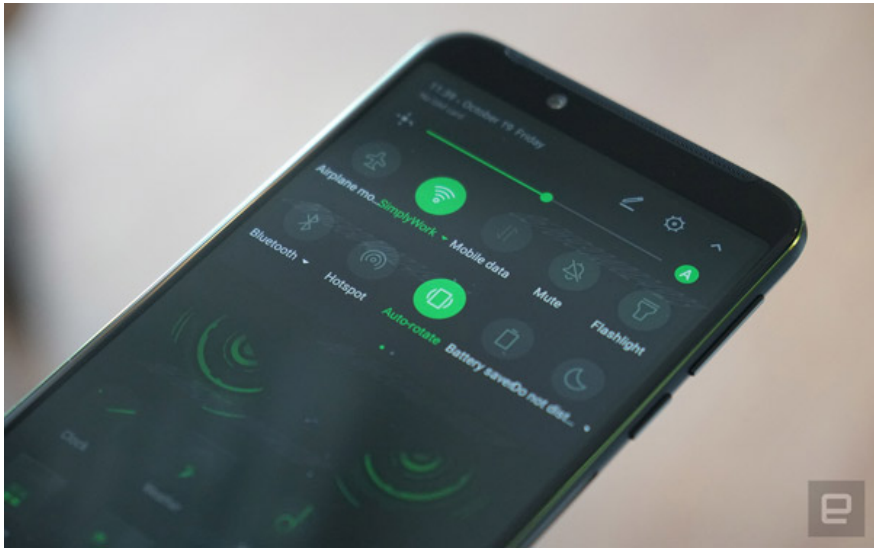

BlackShark Helo's price has been enhanced with many new features and improvements, but is still just the same as its predecessor. Specifically:

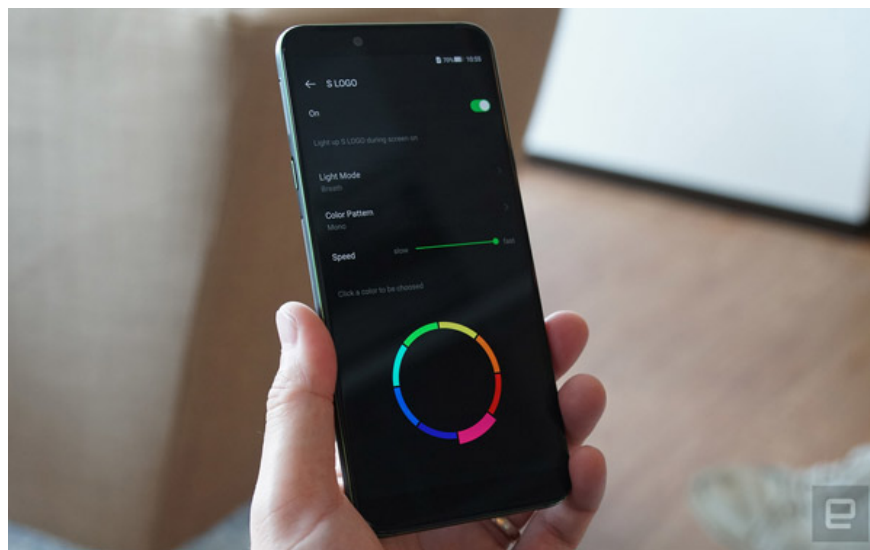

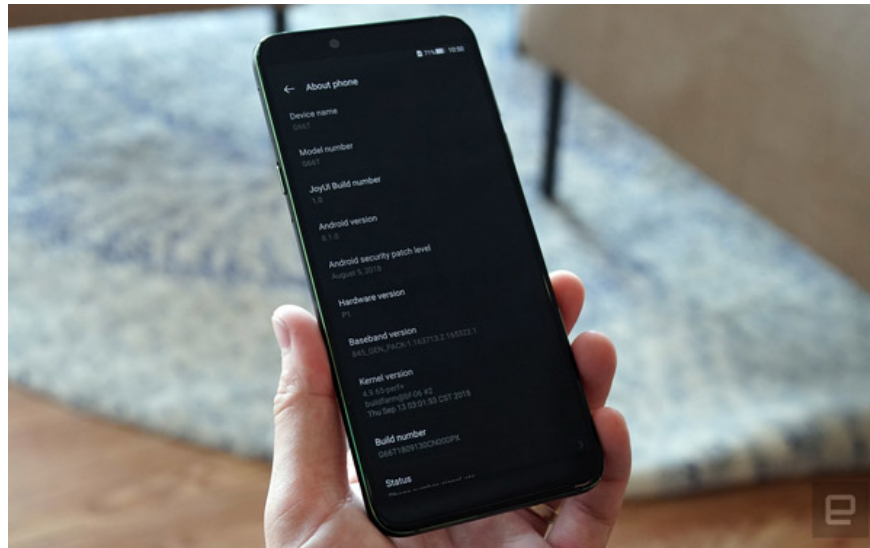

1. Version 6GB RAM with 128GB capacity: 3,199 Yuan (nearly 11 million).
2. The version has 8GB of RAM with 128GB capacity: 3,499 Yuan of nearly 12 million VND.
3. 10GB version of RAM with 256GB capacity: 4,199 Yuan (over 14 million VND).
