

# Black web users suspect that Dream Market is controlled by police

So far you probably know that two of the biggest black websites, AlphaBay and Hansa, have been attacked in the largest international campaign against the black web market of the FBI, DEA (Drug Control Department) and Landscape. Netherlands. But that is not all.

What is interesting about this attack is that the authorities only knocked out AlphaBay, but with Hansa, they held control and continued to let it work for at least a month, while tracking the behavior of the visitors. Visit this website. These people include a lot of people from AlphaBay AlphaBay knocked down and they have to move to Hansa to carry out their illegal transactions.

However, not only Hansa, after the collapse of AlphaBay, many users of this site also moved to another website, Dream Market, which is said to be the second largest black web market, right in front of Hansa.

*When the big markets collapsed, Dream Market was a popular alternative*

When both AlphaBay and Hansa collapsed, Dream Market became the market leader. But now, some Reddit users on the thread [r / Deam\\_Market](#) have expressed concern about this website since 2013.

A Reddit user said that the Dream Market was manipulated in the same way as Hansa, and is now under police control.

## Real IP Highway on Dream Market

Another Reddit user said he had discovered an unencrypted IP address on the source code of the Dream Market, that police could take control of the market and are now monitoring visitors.

'I found a clean IP address on JavaScript source code. The police must know for a long time, get out of there now, 'the man wrote.

The screenshot shows a Reddit post with the title "[DreamMarket] IMPORTANT OPSEC ISSUE ! LEAVE MARKET RIGHT NOW !!". The post content includes a warning and a JavaScript code snippet. A red box highlights the following lines of code:

```
function updateBuddyList() {  
  var debugUrl = "http://**194.94.82**/ajax?t=chat&-buddies";  
  var usedUrl = useDebug ? debugUrl : "/ajax?t=chat&-buddies";  
  $.ajax({ url: usedUrl })  
  .done(function( data ) {  
    var d = JSON.parse(data);  
    if (d.length > 0) {  
      var htm = "";  
      for (var i in d) {  
        statX[d[i].userName] = d[i].status;  
        htm += "<div class='buddy dontwrap' id='buddyAround_' + d[i].userName  
          + "' onlick='talkTo(' + d[i].userName + '\')>' + d[i].status + d[i].userName + 'c  
      }  
      $('#chatListBuddies').html(htm);  
      $('#chatListContainer').css('display', 'block');  
    } else {  
      $('#chatListContainer').css('display', 'none');  
    }  
  });  
}
```

### *Detecting unencrypted IP on Dream Market*

After a bit of research, the author found the IP address 194.9.94.82 mentioned in the JavaScript file (lchudifyeqm4ldjj.onion/market.js) of Loopia AB, a Swedish hosting company. This file is not newly added or edited, it has been there for at least 9 months and does not show signs of hijack or interference.

However, one problem is that the real IP address of the server is exposed, although it must be hidden behind the Tor Onion Router, which is one of the biggest mistakes made by the Dream Market operator because it provides the opportunity for contestants. The law ambushes the hosting company and takes control of the server.

Although it is not certain that Dream Market is completely under police control, it is possible that market participants are manipulated. Many other Reddit users also encourage and call people to calm down. Thanks to the lowering of competitors, Dream Market currently has 57,000 drug lists and 4,000 drug lists.
