However, with the clothes dryer, the worry of long or dry clothes will no longer smell. So how to buy durable and good clothes dryer for rainy day? Where to buy quality clothes dryers in Hanoi, Da Nang, HCMC? Let's learn more about Quantrimang!

Experience of choosing to buy clothes dryer for rainy days and wet days

Choose the right design

In terms of design and style, the current types of clothes dryers are mainly designed in two types: rectangular ovens and circular dryers.

The rectangular oven looks just like a regular cloth wardrobe. The only difference is that the drying motor section helps to dry the clothes. This type of dryer is the most popular choice today. Although this oven can not adjust the temperature (only a temperature of 60-70 degrees when drying) but it can still turn off so it is still quite convenient. Drying equipment is about 10kg / 1 use. Drying time is quite fast, it takes about 45 - 60 minutes for hand-washing clothes, 30 - 45 minutes for machine wash clothes.

Another type of dryer is a circular cage clothes dryer designed to look like a cylindrical closed cage. This oven does not automatically adjust the temperature, but it can also be conveniently turned off. The advantage of this

type is the relatively cheap price. So if your family is small or economically tight, choose this type of oven.

Choosing cabinet capacity

Many users who have not used a clothes dryer often wonder if the clothes dryer will use electricity? The answer depends on the drying capacity of the cabinet. Typically, the current clothes dryers usually range from 1800W - 5000W with a drying time of 20 - 80 minutes depending on the number of clothes. Overall, its energy consumption will be quite large.

However, to save electricity, you can use the product with a small capacity of drying, just enough and should be used when needed, and can combine to take advantage of sunlight on dry days to dry clothes.

Suitable drying capacity

Depending on the drying needs, you should choose an oven with a suitable drying capacity. For example, families with 3-4 people, you can choose the type of cabinet with a drying weight of 5-6 kg with a capacity of about 2000-2300W. For large families, you can choose one with a larger drying capacity, ranging from 7- 10 kg with an output of over 2500W.

Features included

Typically, the basic function of a drying oven is the function of drying clothes. However, nowadays, manufacturers also retrofit products with some modern features to serve for drying clothes more conveniently such as the function of drying timer, remote control, system. wheels to help move the cabinet easily or increase or decrease the capacity accordingly . However, you should note, the more the dryer has the support features, the higher the price. Therefore, please consider before choosing the product!

Choose brand of oven

Currently there are many brands of dryers, clothes dryers with different origins. However, to ensure the product is safe and durable, you should choose to buy ovens from reputable and well-known brands such as Sunhouse, Tiross, Korihom, Nagakawa . On the contrary, you should not buy cheap products, floating origin, no labels, names on the market to avoid buying in unusable, fast or damaged products are not safe.

Consider the price

The price of the product is always an important factor affecting whether you own the product or not. For clothes drying lines, usually, rectangular box dryers will cost slightly more than round ones. However, it also depends on the brand of manufacture, the capacity and drying capacity of the cabinet.

In general, the prices of current clothes dryers range from VND 500 to under VND 2 million. This is considered to be a quite reasonable price compared to the average income of most Vietnamese families and is also a much more economical price than the cost of a type of washing machine combined with dryer or specialized clothes dryer. .
