

Buy any brand coolers?

On the market today there are many brands of coolers imported or produced domestically, with numerous models and different features that make consumers extremely anxious before choosing which products are suitable for them. needs of family use. To make it easier for consumers to choose which network administrators will lead to a good brand name cooling device?

Coolers are seen as substitutes for air conditioners in the summer because of their quick cooling and usability in the open space, because of these utility features that coolers are becoming increasingly popular and more manufacturers, making consumers confused whether to choose a **good cooler**. So TipsMake.com will point to the coolers brand to help users easily choose more.

1. Daikio cooler

Daikio coolers are manufactured using Japanese technology and are very friendly to use. Daikio's products are now diversified in terms of patterns and are widely used in civil and industrial applications. And this is the first choice in the best air freshener brands today.

Daikio coolers are produced based on the principle of natural water evaporation. The normal steam temperature is 28 ° C. During running, the water will move through the cooling plate and here the temperature will drop to about 25 ° C.

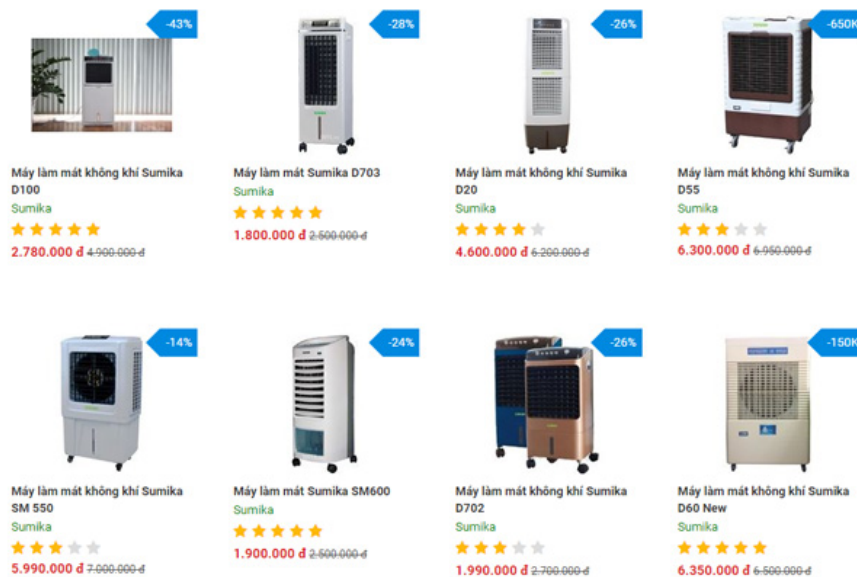

The air will then continue to be blown into the cooling plate when the fan is operating. This process helps the air to cool down to about 26-28 ° C. The wind generated at this heat is basically very cool, equivalent to the temperature in the environment when you stand in the shade next to the cool rivers and streams with the wind blowing gently.

Refer to the cool models Daikio sells at META:

1. Daikio DK-800A air cooler
2. Air cooler Daikio DK-5000A
3. Air cooler Daikio DK-4500A

2. Sumika cooling machine

Beside Daikio, the Sumika cooler is also a popular brand. The product quality of Sumika coolers has also been verified and is a brand widely used by many people. Sumika coolers have many product lines with beautiful design, high competence. Prices of products are generally very competitive.

In general, Sumika coolers have a larger design and stronger cooling than other brands' coolers. Should be suitable in places where there is a need for more people.
