Learn about wall grooving machines

What is a wall groove cutting machine? Structure of wall cutters

Wall groove cutting machine is called with many different names such as wall cutters, wall grooving machines, wall slotting machines, slot cutters, portable wall groove cutters . This is a specialized device used to cut wall grooves thanks to the movement of the blade.

A wall cutter with basic structure consists of the following parts:

1. **Engine** : It is the task of converting electricity into a blade movement. The engines of the current wall cutters are often designed to prevent vibration and minimize noise.
2. **Case** : Mainly made of high quality plastic with many advantages such as high strength, light weight, bearing capacity and good heat resistance. The casing protects the details inside the machine as well as the safety of the user.
3. **Wall cutting blades** : The cutting blades of wall milling machines are usually made of super-hard steel with good corrosion resistance and high heat resistance. A wall cutter can have from 2 to 8 blades, but the most common is the 5-blade wall-groove cutting machine and 2-blade wall slot cutter.

4. **Handles** : Wall groovers with handles are designed to be compact, compact, fit to the user's hand. In addition to the main handle, the machine can have extra handles for easier operation.

Wall groove cutting machine

What is the application of wall cutters?

Currently, wall milling machines are used to serve the construction of water transmission lines at construction sites. Thanks to this device, builders can complete the job quickly, easily and ensure more aesthetics. In addition to brick walls, wall grooving machines can also work on concrete walls, brick walls, etc.

Dust-free wall groove cutting machine

The wall cutters can be divided into two types: conventional wall cutters and dust-free wall cutters. In fact, when working, both of these wall cutters produce dust, but the difference is that the dustless wall cutters are equipped with additional water pumps or vacuum cleaners. Thanks to the support of water pump parts / vacuum cleaners, dustless wall grooving machines can prevent dust from entering the air causing environmental pollution, affecting users' health. Possessing superior features compared to conventional wall milling machines, in return the price of the dustless wall cutters is usually more expensive.

Dust-free wall groove cutting machine

What kind of wall grooving machine should I buy most today?

There are countless types of wall cutters on the market with different styles and prices. Here are some suggestions we want for you:

2-blade wall groove cutting machine FEG EG-113W

FEG EG-113W is one of the typical brands of FED wall cutting machines. Thanks to the powerful engine and sharp cutting blade, the device can easily create precise, beautiful cuts. Ergonomically designed handles, soft, anti-slip grip, making it easy for users to manipulate. Not only that, FEG EG-113W 2-blade wall trimming machine is also equipped with dust and ventilation system to protect the engine. **Price of 2-blade wall groove cutting machine FEG EG-113W: 1,590,000 VND.**

Technical specifications

1. Capacity: 1250W
2. Power source: 220V / 50Hz
3. Speed: 12,000 rpm
4. Cutting blade size: 110mm
5. Maximum cutting angle: 35mm
6. Warranty period: 3 months

2-blade wall groove cutting machine FEG EG-113W

Ken 4125 double blade groove cutting machine

Ken 4125 double blade wall cutter is designed and manufactured by Ken brand in China. With a sturdy structure and powerful engine, Ken 4125 quickly became a powerful assistant for many professional electric and water builders. It has good vibration resistance and low noise. Dust insulation systems and ventilation parts have been significantly improved compared to previous versions of Ken's wall grooving machines. **Electric wall chisel machine price Ken 4125: 2,740,000 VND.**

Mini specs

1. Voltage source: 220V / 50Hz
2. Blade diameter: 125mm
3. Color: Silver red
4. Capacity: 1800W
5. No-load speed: 5500 rpm
6. Product weight: 4.5kg
7. Warranty period: 3 months

Machine for cutting 5 wall grooves TCVN WC3836

5 blade hand-held wall cutting machine TCVN WC3836 owns powerful engine with an operating capacity of 4800 W. Cutting blade is made of high-quality material so it is extremely solid and sharp. The part of the handle is compact, good anti-slip, making it easy for users to manipulate. **Price of 5-blade wall trimming machine TCVN WC3836: 5.350.000d.**

Technical specifications

1. Cutting ability: 38mm x 36mm
2. Voltage source: 220V / 50Hz
3. Color: Silver blue
4. Capacity: 4800W
5. Warranty period: 3 months

Makita SG1251J 1400W wall cutting machine

Makita brand Makita SG1251J 1400W wall trimming machine impresses the compact design, strong and beautiful design. Aluminum cutting blade is durable, sharp and flexible. The machine allows to adjust the depth of the cutting line from 0 - 30 mm. In addition, Makita SG1251J 1400W wall cutter is also equipped with a system to protect the motor in case of overload.**Price for Makita wall cutters SG1251J 1400W: VND 9,500,000.**

Technical specifications

1. Size: 35cm x 15.1cm x 17.8cm
2. Maximum cut depth: 30mm
3. Blade diameter: 125mm
4. Noise level: 108dB
5. Vibration: 1.5 m / sec²
6. No-load speed: 10,000 rpm
7. Grinding disc diameter / cutting: 125mm
8. Length of power cord: 5m
9. Duration: 6 months

Makita SG1251J 1400W wall cutting machine
