## Experience buying genuine memory cards, cheap

### Choose a memory card that matches your device

On the market today, there are countless different types of memory cards and not all types of cards will adapt to your device. Therefore, based on the needs to use to choose the type of card that suits you.

For example, if you buy the grapes to use for smartphones, you should choose a microSD card line with a size that fits the phone, or if you buy a memory card for the camera, you can use SD cards with a capacity of and compatible with that device . Avoid buying unsuitable memory cards that can not be used and causing waste.

### **Choose a memory card with the appropriate storage capacity**

Storage is also a factor you should not ignore when choosing to buy a memory card. Ideally, please base on the work as well as your storage needs to choose the right size. You should not buy a memory card with a capacity too large just to serve the needs of normal document storage. This will be a waste, should only buy a memory card with sufficient capacity from 8GB to 16GB memory card. Unless you often have to store documents, photos, videos in full HD, high resolution, you can use memory cards with a capacity of over 16GB.

### **Card read / write speed**

The read / write speed of the memory card is also an important criterion for choosing a suitable memory card. Accordingly, there will be 4 speed levels on the types of memory cards commonly found on the market, also known as Class Speed, each class specifies a different minimum writing speed. Classification of Speed ??Class - memory card writing speed is as follows:

1. Class 2: Minimum write speed of 2Mbps.
2. Class 4: Minimum write speed of 4Mbps.
3. Class 6: Minimum write speed of 6Mbps.
4. Class 10: Minimum write speed 10Mbps.

Typically, cards of speed Class2, Class r, Class 6 will have the same read / write speed. If different, it will be in the Class 10 memory card line. This memory card is very suitable for those who need to buy memory cards for the storage of high-resolution photos, videos and applications.

## Memory card price

The price of genuine memory cards of different brands will not be the same, not to mention the size, configuration, format . of different cards also lead to different prices. Therefore, depending on the characteristics of the memory card, its price will be decided. In general, the price of memory cards will range from a few tens of thousands to several million. Buyers can only base on demand and other factors to choose the most suitable price.

### Choose where to buy the memory card

A good, genuine and suitable memory card will help you carry out storage tasks effectively, quickly and simply. However, to find a genuine memory card you need to find a address that is trusted, reputable, experienced and appreciated by users. Moreover, the products purchased here will be genuine warranty from 3 to 5 years depending on the brand. Not to mention that you will receive good advice and attractive incentive policies.
