Why should you buy bluetooth speakers?

Bluetooth speaker is an audio amplifier device capable of connecting to many electronic devices such as smartphones and tablets without wires. With outstanding features, these speakers are increasingly popular and become the first choice of many "real" music players:

1. Energy saving
2. Compact design, allowing users to move to many places, especially suitable for carrying travel, picnic
3. Easy to use, not entangled by wireless connectivity to many electronic devices
4. Sound quality is good, not inferior to any loudspeaker

Bluetooth speaker with outstanding advantages

Advice on how to choose the best bluetooth speaker

Not every expensive bluetooth speaker will be good or cheap speakers will be worse. In fact, when buying this device you should pay attention to some of the following points

1. Speaker size

Bluetooth speakers come in many types with different styles and sizes. The average weight of a bluetooth speaker can range from a few hundred grams to a few kilograms. Should choose a small weight device if you want to regularly travel, picnic. On the other hand, if you only serve the needs of listening to music at home, you can choose bigger speakers.

2. Capacity

The capacity of small bluetooth speakers is only a few W, large can reach hundreds W. The larger the power speaker, the bigger the volume, the heavier the weight and vice versa. How to choose speakers with capacity depends on the needs of each person.

3. Battery capacity

Bluetooth speakers usually have battery capacity from several hundred mAh to several tens of thousands of mAh. Devices with large battery capacity are often chosen by many people because they can operate continuously for hours without regular charging.

4. Bluetooth technology

Wireless connection technology is a characteristic element of each bluetooth speaker. Currently, the latest wireless connectivity technology standard is version 4.2. Obviously, the higher the Bluetooth speaker, the more modern it is. In addition to the bluetooth standard, users should also consider some other connectivity

capabilities of the speaker such as wifi or port connected to peripheral devices.

5. Manufacturer

Prestigious manufacturers always bring quality assurance products at reasonable prices. So you should and should only choose to buy bluetooth speakers coming from these brands.

Only buy bluetooth speakers from reputable brands

How to connect bluetooth speakers to electronic devices

Thanks to bluetooth technology, users can easily play music from phones, laptops, and tablets via speakers without wires. To use this feature, you can follow the instructions below:

Step 1 : Start and turn on bluetooth mode on the speaker (Pairing button)

Step 2 : Turn on bluetooth mode on the phone / tablet then search.

Step 3 : Select the device to connect

Step 4: Open the playlist on your phone / tablet, select your favorite song and press play button.

What to note when using bluetooth speakers?

For bluetooth speakers to be durable and emit the best sound quality, users need to pay attention to some of the following:

Do not turn on the volume is too large : Many people think that speakers have to open max volum then hear 'new, new pulse'. But in fact, the loudspeaker opening is too big will cause the speaker membrane to fail quickly, the sound emitted is also not standard, easy to crack, distort. According to experts, bluetooth speakers should only open up to 70% of the volume.

Charge the battery at the right time : Users often have the habit of depleting a new battery or charging or charging the battery for too long. These are all things that make the battery more susceptible to bottles and faster deterioration. So, to protect the battery, you need to charge it before it drops below 20% and should unplug the charger before the device is 100% full.

Do not open the speaker when the speaker is sealed : Have you ever turned on the speaker then put it in your pocket, bag or face down the speaker? If yes, stop now! Because these seemingly harmless actions make the loudspeaker covered, easily torn, the sound is obstructed and 'lost'.

Use properly to protect bluetooth speakers
