These are the compact 'Classmate' computers, making it easy for Vietnamese children to get acquainted with computers, technology and modern learning methods. This is an Intel social support program that will be implemented in mid 2007.

Mr. Gary Willihnganz, General Manager of Marketing Asia - Pacific, Intel Corporation for PV *VietnamNet* , this program will be cooperated with the Ministry of Education and Training of Vietnam and domestic IT enterprises, in the immediate future. completely free with Primary schools.

Classmate PC is small, light, vivid color

The 'classmate' computers are characterized by a very small size, just a student notebook, which looks like a tiny laptop. Dedicated to young students still active, so the device is equipped with anti-collision devices, scratches. Classmate PC manages students by fingerprint identification, pre-installed learning programs of the Ministry of Education and Training of Vietnam, using some Vietnamese software .

Although it is a small computer, only for children in developing and underdeveloped countries, but " *the processors of these machines are the best, the latest on Intel's current market* ", Mr. Gary confirmed. These computers are currently well received by children in Africa.

During a working visit with Vietnamese enterprises, observing the retail stores firsthand, Gary Willihnganz said that the consumption of IT products of the Vietnamese market is huge. The market is developing quite well. Mr. Gary said that in the next few weeks, Intel will offer the largest marketing program ever in Vietnam, in which all Intel products are sold at the best prices.
