Call Recorder - ACR is a free call recorder application on Android, many options: record incoming calls with any phone number, arrange call recording by date, ... This is the way to record the call. Call with Call Recorder - ACR for you.

Call Recorder - ACR is a free call recorder application on Android, many options: record incoming calls with any phone number, arrange call recording by date, . This is the way to record the call. Call with Call Recorder - ACR for you.

Some Android OS phones have a built-in recording feature, but some models do not. Due to the needs of the job you need to record the call, so how to do it? Currently, there are many applications with the main call recording feature that allows users to review any calls they have recorded. Call Recorder - ACR is an application on Android operating system with such features.

ACR will help users to select and record any call. Besides, the program also automatically arranges the recordings by date, making it easy to manage and find the call if necessary. Especially the password setting feature for recordings, ensures absolute safety. Check with the Network Administrator to see how the ACR application performs call recording on Android.

Step 1:

First of all, please download the Call Recorder app - the latest version ACR following the link below.

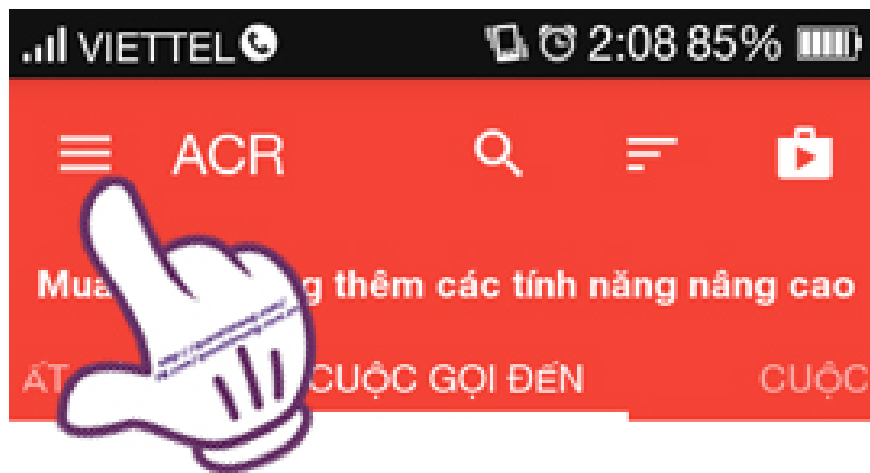

1. Download the ACR app for Android

Step 2:

Then, launch the application on the phone. You will see ACR notifying you of some warnings. You need to **tick all the alerts** and click **OK** to proceed with the use.

Step 3:

In the main interface, you will see ACR divided into **Incoming calls** , **Outgoing calls** , **Important calls** . Next, click on **the 3 dashes icon** above to access the ACR menu.

Step 5:

If you access the **Recording** section, you will see the setting for the Recording section. Here, we can set the recording settings for the application as follows:

1. **Record recording** : if you push the horizontal bar to the right, a message will appear saying you want to delete or store the recording. Otherwise, it will automatically store the recording.

2. **Automatic recording deletion** : select the time for the application to automatically delete recordings. Click **Save** to save the number of days to automatically delete the recording.

1. **Start recording** : You can select **Auto** to ARC recording or press the **Manual** recording button.
2. **Sound source** to be in Auto mode.

CHẾ ĐỘ GHI ÂM

Bắt đầu ghi âm (Tự động)

Bắt đầu ghi âm tự động hoặc bằng tay bằng cách tự ấn nút ghi âm

Nguồn âm thanh (Tự động)

Tự động được dùng mặc định và nó sẽ ghi âm cả hai chiều (nếu điện thoại của bạn hỗ trợ ghi âm cuộc gọi). Nếu nó không hoạt động, hãy thử các nguồn âm khác

Định dạng ghi âm (3GP)

Chọn định dạng ghi âm

Tăng âm lượng (0dB)

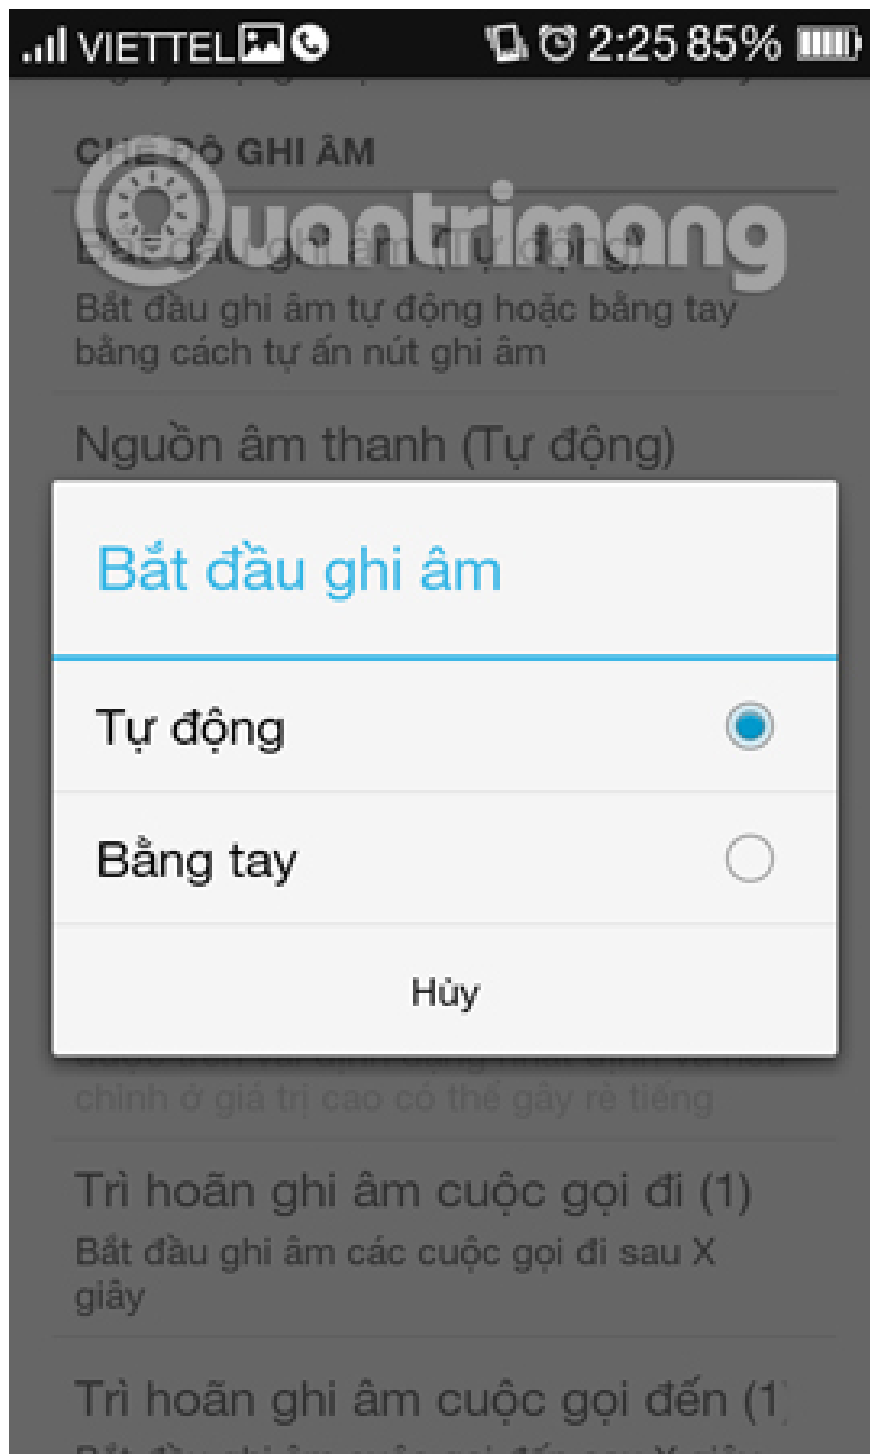

Điều chỉnh âm lượng ghi âm. Chỉ dùng được trên vài định dạng nhất định và nếu chỉnh ở giá trị cao có thể gây rè tiếng

Trì hoãn ghi âm cuộc gọi đi (1)

Bắt đầu ghi âm các cuộc gọi đi sau X giây

Trì hoãn ghi âm cuộc gọi đến (1)

Bắt đầu ghi âm cuộc gọi đến sau Y giây

1. **Audio format** : ARC allows you to select a variety of audio formats for recording. Default to 3GP.
2. **Bluetooth recording** : you can turn recording mode on or off when using a Bluetooth headset.

Định dạng ghi âm
