

Canon released software that turns the camera into a webcam

With the EOS Webcam Utility Beta software, Canon camera users just need to install the software and connect the camera to a computer to turn it into a webcam.

Currently, there are many applications that turn the phone camera into a webcam in the absence of a laptop, or if you want to use the camera to make a webcam, you will have to use an image collector like Cam Link, which costs about 160 USD, a price that not everyone can afford. Recently Canon has released the EOS Webcam Utility software, allowing users to take advantage of their cameras to make webcams for online meetings on Microsoft Teams, Skype, Hangouts .

This software will certainly create quality images, adequate lighting conditions to transmit image content when meeting online. According to Canon, some cameras are supported when connecting to a computer with a USB port, then launching the software to turn the camera into a webcam. The interface of EOS Webcam Utility is very simple, easy to use, allowing the choice of interchangeable lens cameras (ILC) of EOS and PowerShot cameras as webcams for video conferencing.

Due to the use of USB to connect, the user background does not need to worry because of the issue of whether their models support transferring images via HDMI or not. However, this software is currently in beta form and only works on Windows 10-64bit version. Sample images are supported using the software below.

EOS DSLR Cameras

EOS-ID X Mark II
EOS-ID X Mark III
