In this direct printing mode, the image is also automatically adjusted. PIXMA iP6600D integrates Easy-WebPrint software, which helps Windows users fully print website information and colors.

The product is equipped with a 3.5-inch LCD monitor and ChromaLife100 technology, reproducing natural color image. It has a 6-color ink system, resolution up to 9,600 x 2,400 (dpi) and design LED ink cartridges, replacing indirect ink. When the ink is low, the LED indicator blinks and flashes faster if the ink is depleted.

It has automatic dual printing function, self-copy two sides of paper, which helps to reduce the cumbersome when having to flip documents manually. Photo paper is supplied in two lines, allowing paper to be stored in a tray and adjusting the paper in another tray, without having to move between two trays. When printing, the paper is loaded with both trays, with up to 300 sheets.

PIXMA iP6600D produces 4-by-6-inch photos, each taking about 46 seconds.
